A. Page Numbering - Page numbers appear in the upper right hand comer of the page. Pages are numbered sequentially. From time to time new pages may be added to the tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between Pages 3 and 4 would be numbered 3.1.

B. Page Revision Numbers – Revision numbers also appear in the upper-right corner of the Page. These numbers are used to determine the most current page version on file with the Commission. For example, 4th Revised Page 4 cancels 3rd Revised Page 4.

C. Paragraph Numbering Sequence - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level of coding. For example,

2.
2.1.
2.1.1.
2.1.1.A.
2.1.1.A.I.
2.1.1.A.I.(a)

D. Check Sheet - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.
