Subject: Winter Storm Elliott Events
Attachments: Winter Storm Elliott LKE Event Summary 12-23-22 to LB-JC.docx

John,

Please find attached a brief narrative of the recent Winter Storm Elliott events. This document focuses on challenges LKE faced in meeting native load, other activities including electric Distribution storm outage restoration and Gas LDC performance are being covered by other efforts.

As previously noted, an LKE team has been assembled to look very broadly at all aspects of LKE's performance during Elliott. This work will continue in the coming weeks with numerous issues being worked in parallel.

After you have reviewed the narrative, it might be helpful to have a brief discussion early next week to answer questions you may have. If you agree we can arrange a discussion on Monday. (I have the BC hearing starting Tuesday morning.)

Lonnie
