Good afternoon, Ms. Polzin –

Pursuant to your request, attached is an Excel spreadsheet which identifies the LG&E and KU generation units, including unit names and numbers and each unit's operator, that experienced unplanned outages, derates or failures to start during the event (December 21 through December 26, 2023):

The contact person who can provide any technical information about the operation of these units is:

Michael P. Drake
Director of Generation Services for LG& and KU
[redacted]

We are also attaching a file entitled "FERC Data Request Elliott Events with OMC" which contains the GADS data during the event period.

Finally, attached are two documents that LG&E and KU have prepared related to Winter Storm Elliott:

Kind regards,
Matt

You don't often get email from [redacted] Learn why this is important

EXTERNAL email. STOP and THINK before responding, clicking on links, or opening attachments.

Dear Messrs. Jessee and Bowling and Ms. Keisling:

We worked together in the inquiry into the January 2018 event. I am currently co-leading the inquiry into Winter Storm Elliott, and sent the below email to Mr. Crockett, who is listed on the FERC website as the point of contact, but have received no response. I am hoping that one of you can forward the email to the appropriate LGE-KU counsel who can handle our data request. Given that the date for responding has passed, the new date will be **March 1, 2023.**
I appreciate any assistance you can provide.

Subject: Winter Storm Elliott-Joint FERC-NERC-Regional Entity Inquiry

John Crockett
General Counsel, Chief Compliance Officer and Corporate Secretary
Louisville Gas and Electric Company and Kentucky Utilities Company

Dear Mr. Crockett:

We are the co-leads from the Federal Energy Regulatory Commission for the inquiry into bulk-power system conditions during winter storm Elliott. Because the event covered a large portion of the United States, the inquiry is prioritizing those entities whose bulk-power systems were most affected during the event. We have identified your company as one of those most-affected entities. We are requesting some initial information that we would like to obtain quickly so that we can issue data requests to the generator owners/operators for those units that failed to perform during the event.

Please provide the following in an Excel spreadsheet format at your earliest convenience, or by COB Wednesday, February 8:

For all generation units that experienced unplanned outages, derates or failures to start during the event (**December 21 through December 26, 2023**):

- **The generating plant with unit names/numbers**

- **The name of each unit's owner/operator**
- **Owner/operator contact information, which includes the contact person (name, phone#, e-mail address) that could provide the technical information (for example, the person who regularly provides operational information to the BA/RTO/ISO)**

We would also like to receive any sequence of events, presentations, internal event analyses or reports, or other overviews of the event once you have completed them. You should expect to receive additional requests for operational data from us in February, but we would appreciate receiving this list as soon as possible so that we can begin gathering the generator performance data.

We thank you in advance for your cooperation and look forward to working with you. Please call either of us with questions, and reply all (our NERC co-leads are cc'd) with any written questions or response.

Dave Huff and Heather Polzin
