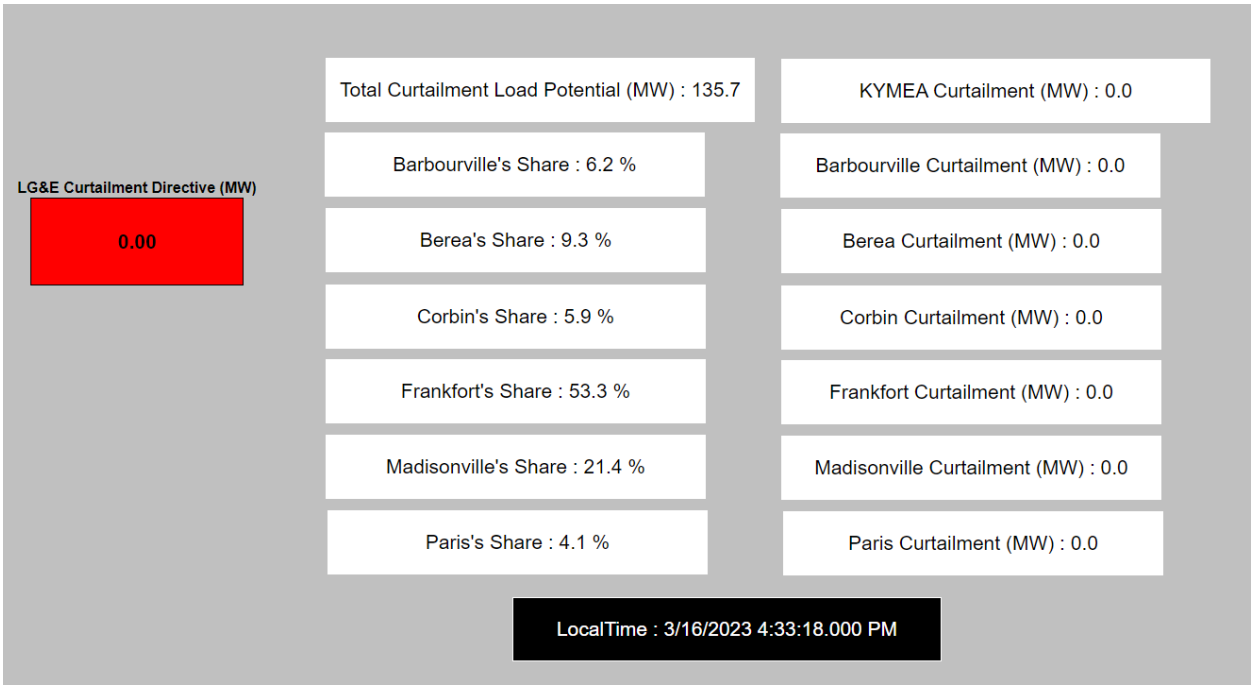
KYMEA Curtailment Plan

1. LG&E/KU notifies ACES that KYMEA must curtail (X)MWs of load to balance supply and demand.
2. ACES shall comply with the directives of LG&E/KU to initiate load curtailment.
3. ACES will enter the curtailment amount (X)MWs into the "LG&E Curtailment Directive (MW)" entry box located inside the PME diagram Curtailment 2, shown in Figure 1. This will calculate in real-time what each member's share of the curtailment directive is both as a percentage and as a MW value.

Figure 1 (PME Curtailment 2)



4. ACES will notify the members of the directive as well as each member's allocation by way of an email distribution list as well as a text message distribution list. KYMEA members will determine which circuits to open on their systems to comply with the curtailment volume directive. The contact list is shown in Figure 2 below.
5. ACES will continue to communicate with LG&E/KU on the status of the curtailment directive and adjust as instructed.
6. ACES will communicate with KYMEA staff that curtailments have been directed by LG&E/KU and will communicate status changes as time permits.

7. As curtailment directives subside, ACES will contact members of such reductions until operations return to normal.
8. ACES and KYMEA will discuss what actions were taken and summarize.
