State: KY
Zip: 40807

Comments:
I am a Eastern Kentuckian out of Benham Kentucky but I live within the town of Harlan Kentucky as Benham is my city, I had seen you all were getting ready to approve a new AI datacenter being built, and connect it to your towns local power grids. I would like to voice my opinion on the topic of Terawulfs datacenter.

As many AI datacenters as of late are being closed and or shutdown before ever operating or opening their doors, this means we as Kentuckian citizens will be forced to deal with their consequences. This data center if it fails would be making it lose millions in wasted electricity being sent into a building that will never operate. Wasting all that power that could have been routed to schools, hospitals, or even back to family homes where winter is around the corner making it more prominent than ever we have stable power grids.

I may not be a citizen of your town, but over in Benham Kentucky I believe AI data-centers pose major risks to local community power grids and infrastructure. So I would ask that the board stop this datacenter or at least halt it from being created on the basis that it can lead to wasted energy on a building type that has since the mid of 2026, had major repercussions on other power grids.

Service List for 2026-00323
