COMMONWEALTH OF KENTUCKY

BEFORE THE PUBLIC SERVICE COMMISSION

IN THE MATTER OF

PETITION OF CAPITAL)
COMMUNICATIONS CONSULTANTS, INC.)
FOR DESIGNATION AS AN ELIGIBLE) CASE NO. 2011-00029
TELECOMMUNICATIONS CARRIER)
IN THE COMMONWEALTH OF KENTUCKY)

RESPONSE OF CAPITAL COMMUNICATIONS CONSULTANTS, INC.
TO FIRST DATA REQUEST OF COMMISSION STAFF

Capital Communications Consultants, Inc. ("Capital Communications"), by its counsel, files the following responses to Commission Staff's first set of data requests in the above-referenced matter.

Question 1 Provide Capital Communications' purpose for requesting Eligible Telecommunications Carrier ("ETC") status in Kentucky. What does the company hope to achieve? Why not just purchase resale Lifeline access lines from your underlying carrier if the purpose of ETC designation is solely to provide Lifeline and Link-Up?

Responsible Party: Bryan Michael, President and Secretary of Capital Communications.

Response: Capital Communications' purpose for requesting ETC status in Kentucky is to make more eligible consumers aware of the Lifeline and Link-Up programs, consistent with the objectives announced by Governor Beshear and Chairman Armstrong on September 13, 2010, when they issued a joint press release noting that "there are many eligible Kentuckians who do not participate in the program." That announcement, made during "Lifeline Awareness Week" underscores the FCC data cited by Capital Communications in its Petition.

Case No. 2011-00029 Capital Communications Consultants, Inc. ETC Application

Question 2 Provide any resale or commercial agreements you currently have in Kentucky with other telecommunications carriers. Include signed evidence of the agreements along with invoices detailing both Unbundled Network Elements ("UNE") and resale charges.

Responsible Party: Bryan Michael, President and Secretary of Capital Communications.

Response: Attached as Exhibit A is correspondence from the Commission acknowledging the filing of the interconnection agreement between Capital Communications and AT&T-Kentucky. The agreement is posted on the Commission's website at this URL: <http://162.114.3.165/PSCICA/0000/00597/>. As there are no customers currently served in Kentucky, there have been no invoices for network elements or resold service.

Question 3 Describe the process in which Capital Communications orders a Section 251 loop and commingles it with Section 271 elements to provide service. Provide copies of orders or contracts that show the process.

Responsible Party: Bryan Michael, President and Secretary of Capital Communications.

Response: Whether through its current interconnection agreement on file at the Commission or any supplemental or successor agreement, Capital Communications intends to order Section 251 loops commingled with Section 271 elements as provided by federal law as explicated by the Commission. In its December 12, 2007 Order in Case No. 2004-00427,¹ the Commission conclusively determined that the so-called commercial agreements offered in Kentucky by AT&T-KY to CLECs (such as that offered to Assurance) provide access to “facilities,” including network elements required by § 271(c)(2)(B), the competitive checklist requiring RBOCs to provide UNEs.² The Commission found that AT&T’s commercial agreements fulfill AT&T-KY’s Section 271 obligations to continue providing those network elements that are no longer required to be provided under Section 251. Loops, of course, continue to be required by Section 251; and, as the Commission’s reasoning with regard to whether network elements are supplied pursuant to AT&T’s commercial agreements applies to an ETC analysis just as surely as it applies to a Section 271 compliance analysis, it necessarily follows that Assurance’s commercial agreement provides for Section 251 loops to be provided in combination with Section 271 switches. Accordingly, when it orders under the agreement, the Applicant uses UNEs in its network³ and satisfies the requirement set forth in Section 214(e)(1)(A).

¹ *In the Matter of Petition of BellSouth Telecommunications, Inc. to Establish Generic Docket to consider Amendments to Interconnection agreements Resulting from Changes of Law* (Final Order dated Dec. 12, 2007).

² “There can be no mistake that 47 U.S.C. § 271(c)(1)(A) requires AT&T Kentucky to enter into “binding agreements that have been approved under Section 252 of this title . . . Moreover, pursuant to 47 U.S.C. § 271(c)(2)(A), these very agreements regarding access and interconnection must also include each element of the competitive checklist.” Case No. 2004-00427, Order (December 12, 2007) at pp. 6-7. The Commission further determined that the rates for these *network elements* are to be market based. *Id.* at p. 11 (emphasis added).

³ *See Qwest Corp. v. Pub. Util. Comm’n*, 479 F.3d 1184 (10th Cir. 2007) (agreements relating to mass market switching and shared transport are agreements for network elements, even if provided under Section 271).

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 5.2.1 Calls are measured in durational increments identified for each service. All calls, which are fractions of a measurement increment, are rounded-up to the next whole unit.

SECTION 5.0 – NETWORK SERVICES DESCRIPTIONS (CONTINUED)

5.3 Distance Calculations

Where charges for a service are specified based upon distance, the following rules apply:

5.3.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is not telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

5.3.2 The airline distance between any two rate centers is determined as follows:

Step 1: Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.

Step 2: Compute the difference between the "V" coordinate of the two rate centers; and the difference between the two "H" coordinates.

Step 3: Square each difference obtained in step (b) above.

Step 4: Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.

Step 5: Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

Step 6: Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

5.3.3 The formula for distance calculations is:

$$\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}$$

- (P) Caller ID - Deluxe:** Permits the end-user to view a Directory Name and Directory Number of the calling party on incoming telephone calls. Information is displayed on a specialized CPE not provided by the Company. The feature also provides the date and time of each incoming call. In some situations, the calling party's city and state may be displayed rather than a Directory Name, depending on available call data.
- (Q) Anonymous Call Rejection:** Permits the end-user to automatically reject incoming calls when the call originates from a telephone number which has blocked delivery of its calling number (see Calling Number Delivery Blocking). When active, calls from private numbers will be routed to a special announcement then terminated. The feature may be turned on or off by the end-user by dialing the appropriate feature control code. Anonymous Call Rejection is offered as a stand-alone feature or as an add-on to Caller ID Deluxe.
- (R) Call Block:** Allows the end-user to automatically block incoming calls from up to six end-user pre-selected telephone numbers programmed into the feature's screening list. Upon activation, it will redial the number automatically and continue to check the number every 45 seconds for up to 30 minutes if the number is busy. SECTION 8.0 - DIRECTORY ASSISTANCE AND LISTING SERVICES

8.1 Directory Listings

8.1.1 General

The following rules apply to standard listings in light face type in the white pages (alphabetical section) of the telephone directory and to the Directory Assistance records of the Company.

Only information necessary to identify the Customer is included in these listings. The Company uses abbreviations in listings. The Company may reject a residence listing, which is judged to be advertising. It may also reject a listing it judges to be objectionable. A name made up by adding a term such as Company, Shop, Agency, Works, etc. to the name of a commodity or service will not be accepted as a listing unless the subscriber is legally doing business under that name.

A name may be repeated in the white pages only when a different address or telephone number is used.

8.1 Directory Listings, (Continued)

8.1.2 Composition of Listings, (Continued)

(B) Designation

The purpose of a business designation is to identify the listed party and not to advertise the business. No designation of the nature of the business is included if this is sufficiently indicated by the name. Where a listed party is engaged in more than one general line of business, one additional business designation may be included in the listing when necessary to identify the listed party. When a listed party has two or more listed telephone number or two or more business addresses, designations indicating the branches of the organization may be included where necessary to assist the public in calling.

A designation may include a title to indicate a listed party's official position, but not the name of the firm or corporation with which the individual is connected. Individual names or titles are not shown following the name of a firm or corporation. A term such as "renting agent" may be included in a listing indented under the name of a building, provided the agent maintains a renting office in such a building.

A designation is not ordinarily provided in a residence type listing except for residential service as permitted under the terms of this tariff. A professional designation is permitted on residence service in the case of a physician, surgeon, dentist, osteopath, chiropractor, podiatrist, optometrist, chiropractor, physiotherapist, Christian Science practitioner, veterinary surgeon, registered nurse or licensed practical nurse, provided that the same name and designation is also listed on business service of that subscriber or another subscriber in the same or different directory.

The listing of service in the residence of a clergyman may include the designation "parsonage," "rectory," "parish house," or "manse," and any such listing may be indented under a listing in the name of the church. Where residence service is furnished in a church study, the listing may include the designation "study."

(D) Telephone Number

Each listing may include only one telephone number, except in an alternate telephone number listing where each number listed is considered a line for rate purposes.

A listing may include only the telephone number of the first line of a PBX system or incoming service group, except that a trunk not included in the incoming service group of a PBX system, or the first trunk of a separate incoming service group of a PBX system may be listed to meet special conditions where a corporation and its subsidiaries use the same PBX system.

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls, Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

11.1.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A:** Customer select the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.

- Option D:** Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.
- Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.
- Option F:** Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.
