RE: Case number 2011-00167 Cingular Wireless

Dear Mr. Briggs:

The location of the proposed tower and wireless facility has been inspected.  
Please note the following:

We do not have planning and zoning in the area of construction.

A County Stormwater and erosion control permit is required prior to the start of excavation. It can be obtained thru our office by calling 606-928-1285. There is no charge for the permit.

All contractors working on the project must have a current Boyd County Business license prior to the start of work. It can be obtained by calling Susan Campbell at 606-739-0164 at the Boyd County Clerk's Office.

There are no objections to the project by our County Judge Executive William Stevens.

If you have any questions, please call us at 606-928-1285.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve Sturgill".
