Would it be acceptable to Meade county Recc to pay only ninety percent of my monthly bill?

As of today JAN. 23, 2013 lights flickered as bad as last month, prior to new line. It is true most days the flickering has improved since the single phase line was installed, but is still very noticeable and disturbing.

My Records do indicate Hilltop Quarry Crusher working well after dark to include times of seven and eight (PM). Friday Jan. 11, 2013 Records indicate flickering both AM & PM (after-dark). Also Records indicate flickering on FRI and Sat. which isn't the norm.
