## SOUTH KENTUCKY R.E.C.C.

## LINE LOSS REDUCTION

South Kentucky RECC has historically used, and continues to use programs to reduce line loss on its system. During the period of November 2010 through October 2012, South Kentucky RECC reconductored and /or multiphased several lines, which has helped to improve losses all across the system.

During this same time period, SKRECC has also implemented an AMI system that included installing all solid state digital meters, which have also helped reduce losses significantly. For many years we have taken losses into consideration when purchasing special equipment such as transformers and meters. Additionally, during the above mentioned time period we improved our right-of-way program that helped in service reliability as well as line loss.
