*Re: Case No. 2014-00141*

Dear Mr. Derouen:

Enclosed please find for filing an original and seven copies of Kentucky American Water's June 17, 2014 Responses to: (a) Commission Staff's First Set of Information Requests; and (b) Complainants' First Set of Information Requests. I hereby certify that a true and accurate copy of the responses has been served upon Complainants on this 17<sup>th</sup> day of June, 2014 at their address of 3649 Winding Wood Lane, Lexington, Kentucky 40515, via United States Mail.

Very truly yours,

Stoll Keenon Ogden PLLC

Lindsey W. Ingram III

**CASE NO. 2014-00141**  
**COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

---

**Witness: Keith Cartier**

1. A description of all work done on the water meter unit with serial #90537102 from 11/5/13-3/7/14 and to provide the results of that work.

**Response:**

Other than the testing of the meter, there was no "work" performed on that meter. Please see the following table for the various meter reading and testing dates.

<b>Device</b>	<b>Meter reading date</b>	<b>Description</b>	<b>Meter reading recorded</b>
090537102N	1/31/2014	Meter tested	691
090537102N	1/29/2014	meter changed	690
090537102N	1/24/2014	service order reading	689
090537102N	1/7/2014	AMR Meter Reading	684
090537102N	12/27/2013	service order reading	681
090537102N	12/5/2013	AMR Meter Reading	545
090537102N	11/5/2013	AMR Meter Reading	350

2. Provide all findings in the investigation by KAWC regarding the unit with serial #90537102 for the time period 11/5/13-3/7/14.

**Response:**

On December 5, 2013, an automatic meter reading (AMR) of 545 units of water was obtained for meter #090537102N. An automatic meter reading is obtained when a KAW employee drives a vehicle in close proximity to a meter and usage data is transmitted electronically to that employee's equipment. Because that reading showed atypical use, a service order was generated on December 23, 2014 to compare the reading from November 5, 2013 (which was 350 units) to the reading on December 5, 2014 of 545 units. That service order was generated because KAW's system automatically generated an exception case on December 6 due to the atypical use. The service order was issued on December 23, 2014 and worked on December 27, 2014. When the service order was worked on December 27, 2014, the KAW field service representative (FSR) verified the reading as of that date of 681 units. He also indicated the meter was not moving when he read it, which proves there was no water flowing through the meter at the time of the reading.

KAW's system also generates an exception event when a bill is atypically high (as opposed to usage), so, when the bill was generated for usage between November 6, 2013 and December 5, 2013, another exception event was generated. This review was completed on January 7, 2014 and validated the amount with verification performed in the field before the bill was released and sent to the customer. A "high bill letter" was sent to the customer to alert them that high consumption was noted on their account.

Also on January 7, 2014, an AMR reading of 684 was obtained for the next billing cycle. The system automatically generated another exception due to the high dollar amount of the bill and it was reviewed by the accounts resolution team.

The customer called KAW on January 20, 2014 and was upset that the dispute had not been resolved. She was then informed that it can take 30 days to resolve a billing dispute. KAW also received an email from the customer on January 20, 2014, requesting that the meter be checked due to the high bill. The customer was upset because she was advised that she would be called to set up the meter check. Thus, a meter check service order for high/low usage was created at that time. Another email was received on January 22, 2014 from the customer stating that there were no leaks inside or outside her property. On January 24, 2014, the meter check service order was completed stating "checked, no movement on meter today. App read from 1/7/14 was 0684. The reading today is 0689. 5 cubic feet usage. No water passing through meter. Appears no leaks. May need to pull meter for meter test. No movement on meter detected."

**KURT AND LAYNE NETHERTON V. KENTUCKY-AMERICAN WATER COMPANY**  
**CASE NO. 2014-00141**  
**COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

---

KAW received notification from the Public Service Commission on January 24, 2:42 pm of an informal complaint inquiry on this account. This complaint was reviewed on January 27, 2014 by KAW staff at its Richmond Road location.

On January 26, 2014, another email was received from the customer. She was upset that the meter had not been tested. On January 26, 2014, another email from the customer was received stating that the meter should have been tested and was reread over a month ago. The customer advised that she had filed a complaint with the PSC. The customer called KAW on January 27, 2014 and stated that she received the water bill for the time period of November 6 through December 5 and another one for December 6 through January 7.

KAW's local personnel called the customer to discuss the PSC informal complaint inquiry on January 27, 2014. During that call, the customer stated that she is still dissatisfied and wants to know what else can be done to verify the bill's accuracy. KAW offered to test the meter. Residential meters are not tested in the field. Instead, they are removed and tested at KAW's facilities. When a meter is removed for testing, a replacement meter is installed. The customer was informed that she would be permitted to witness the testing if she desired. The customer was also informed that if the meter tests accurately, she would be obligated to pay the bill in full.

On January 29, 2014, an FSR removed the meter so that it could be tested at 2300 Richmond Road and another meter was installed at the property with a starting read of 0. On January 31, 2014, the meter was tested at KAW facilities and found to be accurate. The PSC picked up the meter on February 11, 2014 so that it could perform its own testing.

On February 4, 2014, the KAW customer advocate supervisor spoke to the customer about the process and the steps taken to verify that the bill is accurate. The supervisor explained that: (a) the readings were verified; (b) the meter serves the customer's residence; (c) there had been no meter changes prior to January 29, 2014; (d) water passing through the meter is registered by the dials on the meter; (e) KAW does not and cannot know how the water is used after it passes through the meter; and (f) KAW offers to credit the customer half of the bill to resolve the dispute. The customer was not satisfied. The call was escalated to the Field Operations Manager and he left a message with the customer on February 4, 2014.

On February 6, 2014, the customer called again and another meter test service order was created. The call handler offered the customer to witness the test and notes that the customer declined the opportunity to witness. Once the call handler reviewed the service orders listed on the account, she realized that the meter test service order had already been created and performed, so she cancelled the request for the second meter test.

The Field Operations Manager spoke with Ms. Netherton on February 6, 2014 and explained the investigative process. A letter was sent to the customer on February 7, 2014 to report the results of the service order on January 24, 2014.

**KURT AND LAYNE NETHERTON V. KENTUCKY-AMERICAN WATER COMPANY**  
**CASE NO. 2014-00141**  
**COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

---

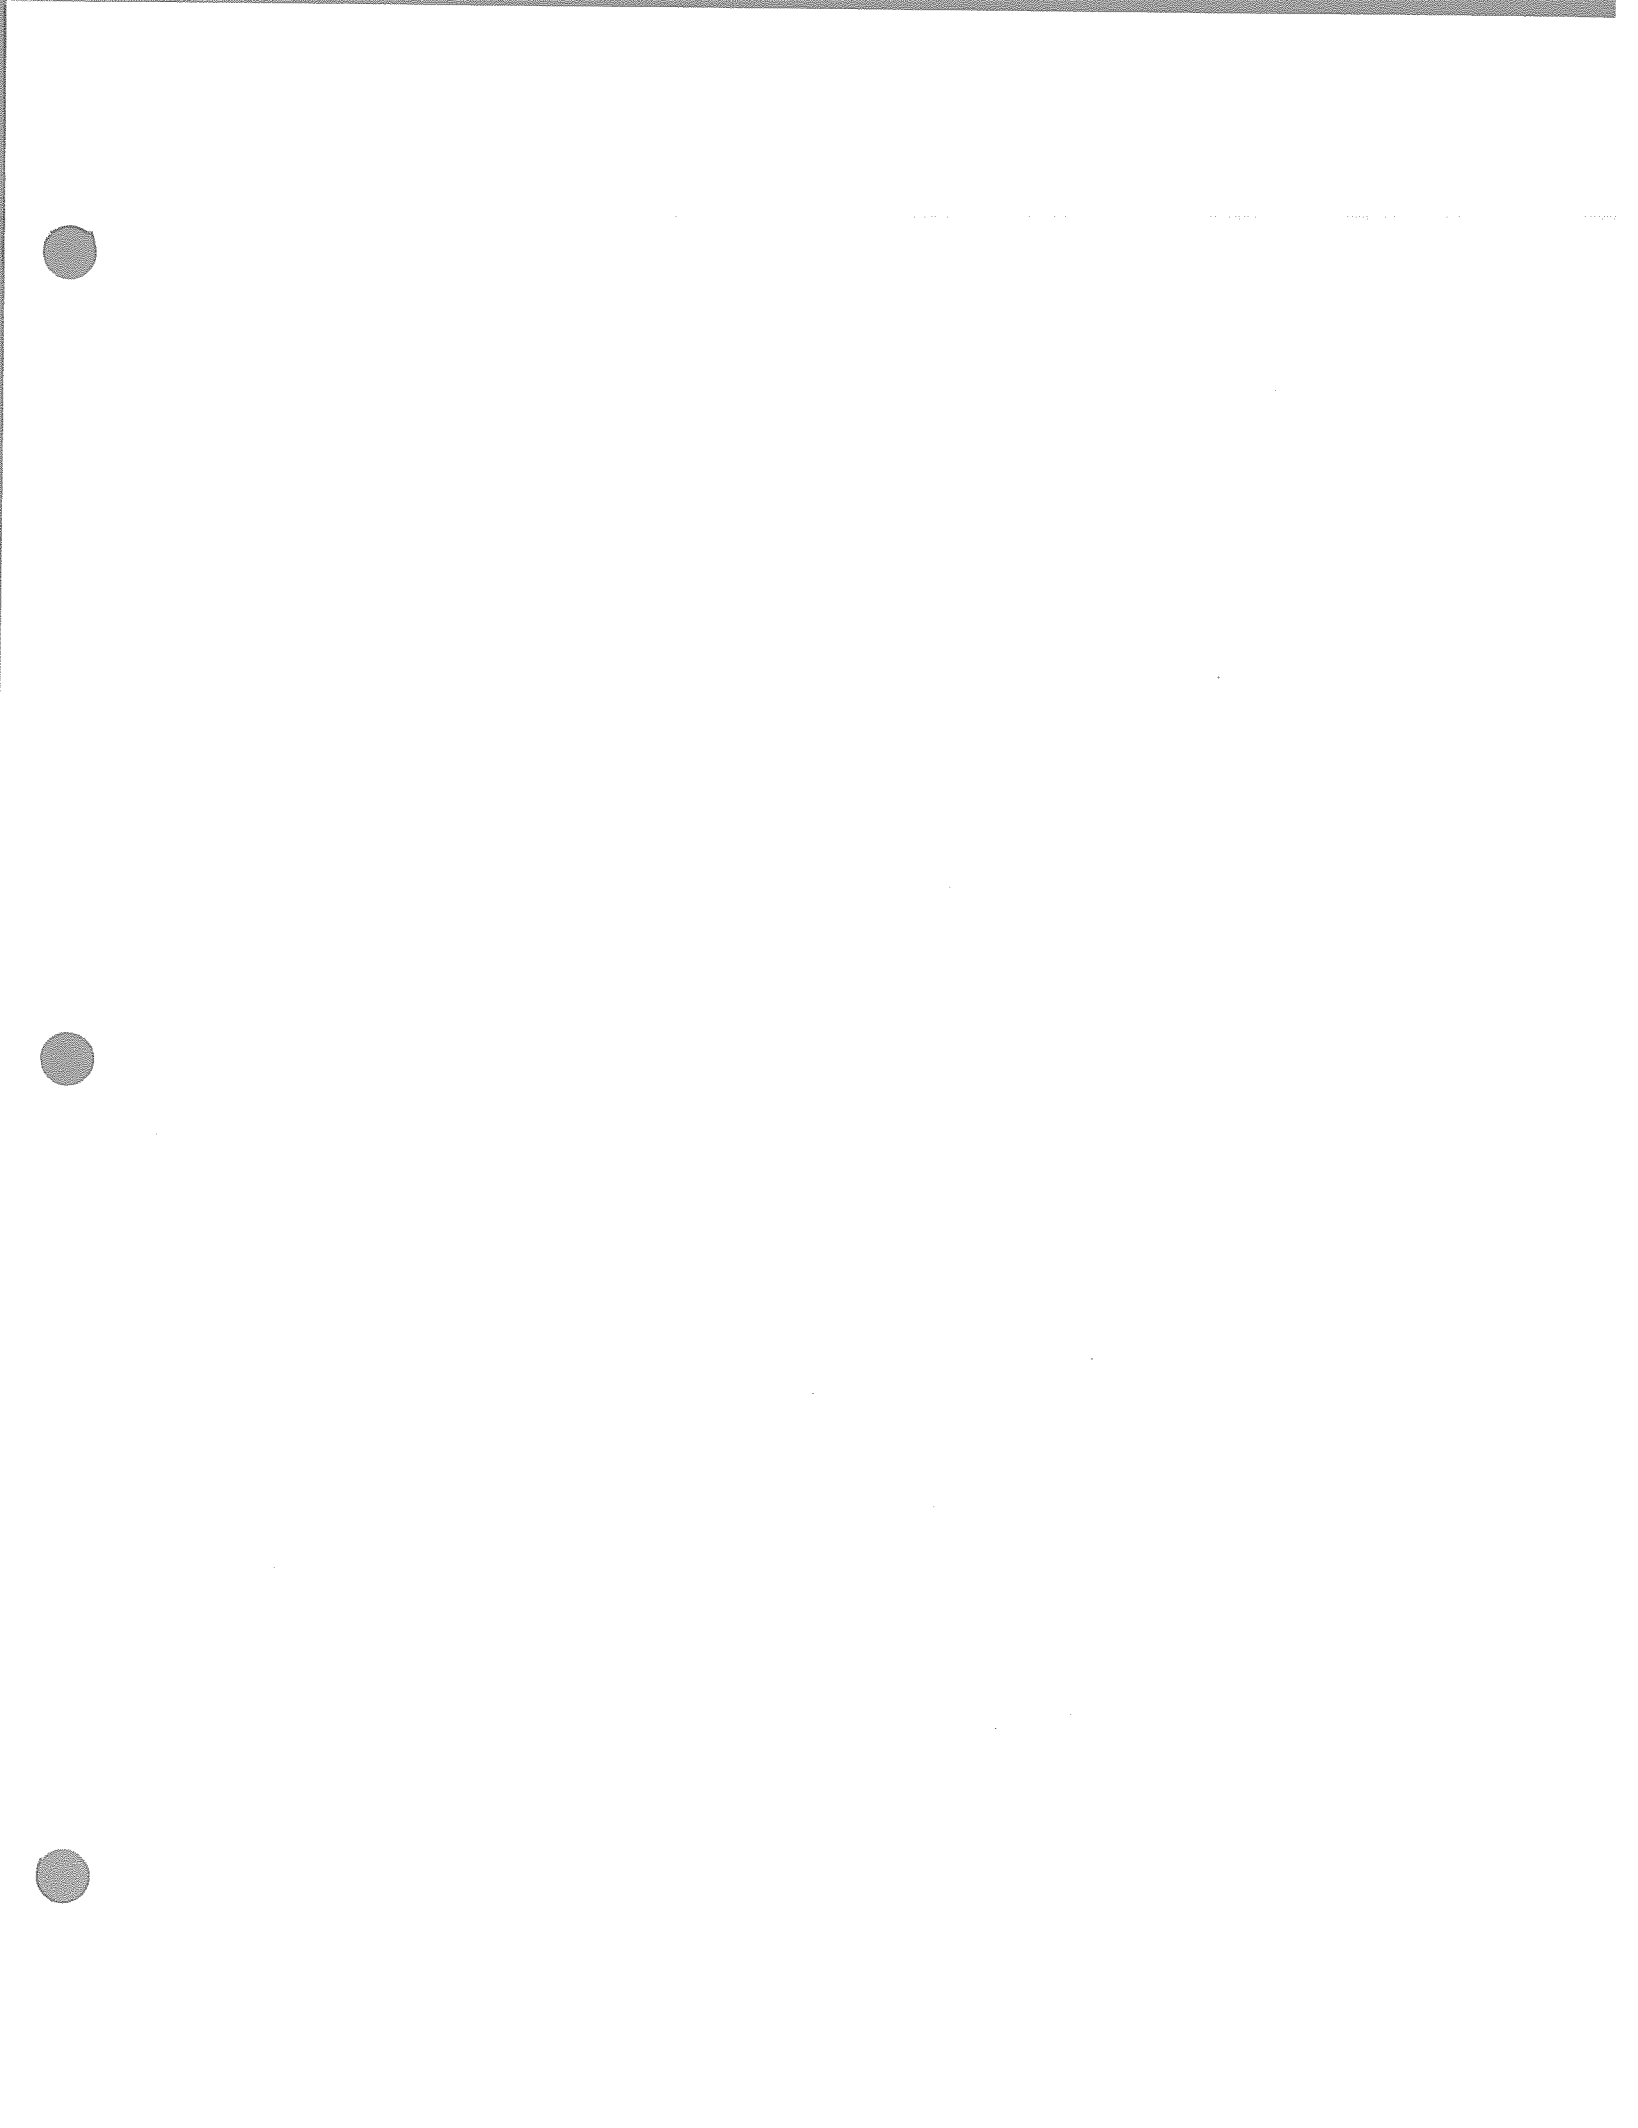

On February 11, 2014, the Field Operations Manager spoke with the customer again, and, since neither party can fully explain how the water was used, another offer was made to settle the dispute by crediting half of the bill. Still unsatisfied, the customer asked for other options to escalate the dispute. The Field Operations Manager offered that the PSC test the meter.

A letter from the customer dated February 10, 2014 was received by KAW President Cheryl Norton on February 13, 2014 explaining the case and results of the meter test. Another letter from the customer dated March 20, 2014 was received at the American Water call center, stating that the account is in formal dispute.

On March 25, 2014, the customer advocate supervisor, Rachel Cole, called the customer and informed her that the results of the PSC meter test were in. The customer informed Rachel Cole that she was in the process of filing the papers for the PSC formal complaint.

The customer called the call center about the statement dated March 7, 2014 for \$1,524.99 to note that the account remains in dispute and that she was submitting payment for \$80.80. On April 12, 2014, a disconnection letter was sent to the customer, but, on April 18, 2014, the account was placed on hold until July 31, 2014.

**Witness: Keith Cartier**

3. Provide the current location of unit with serial #90537102.

**Response:**

To the best of KAW's knowledge, the meter remains at the Public Service Commission where it has been since PSC personnel picked it up from KAW on February 11, 2014.

**KURT AND LAYNE NETHERTON V. KENTUCKY-AMERICAN WATER COMPANY  
CASE NO. 2014-00141  
COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

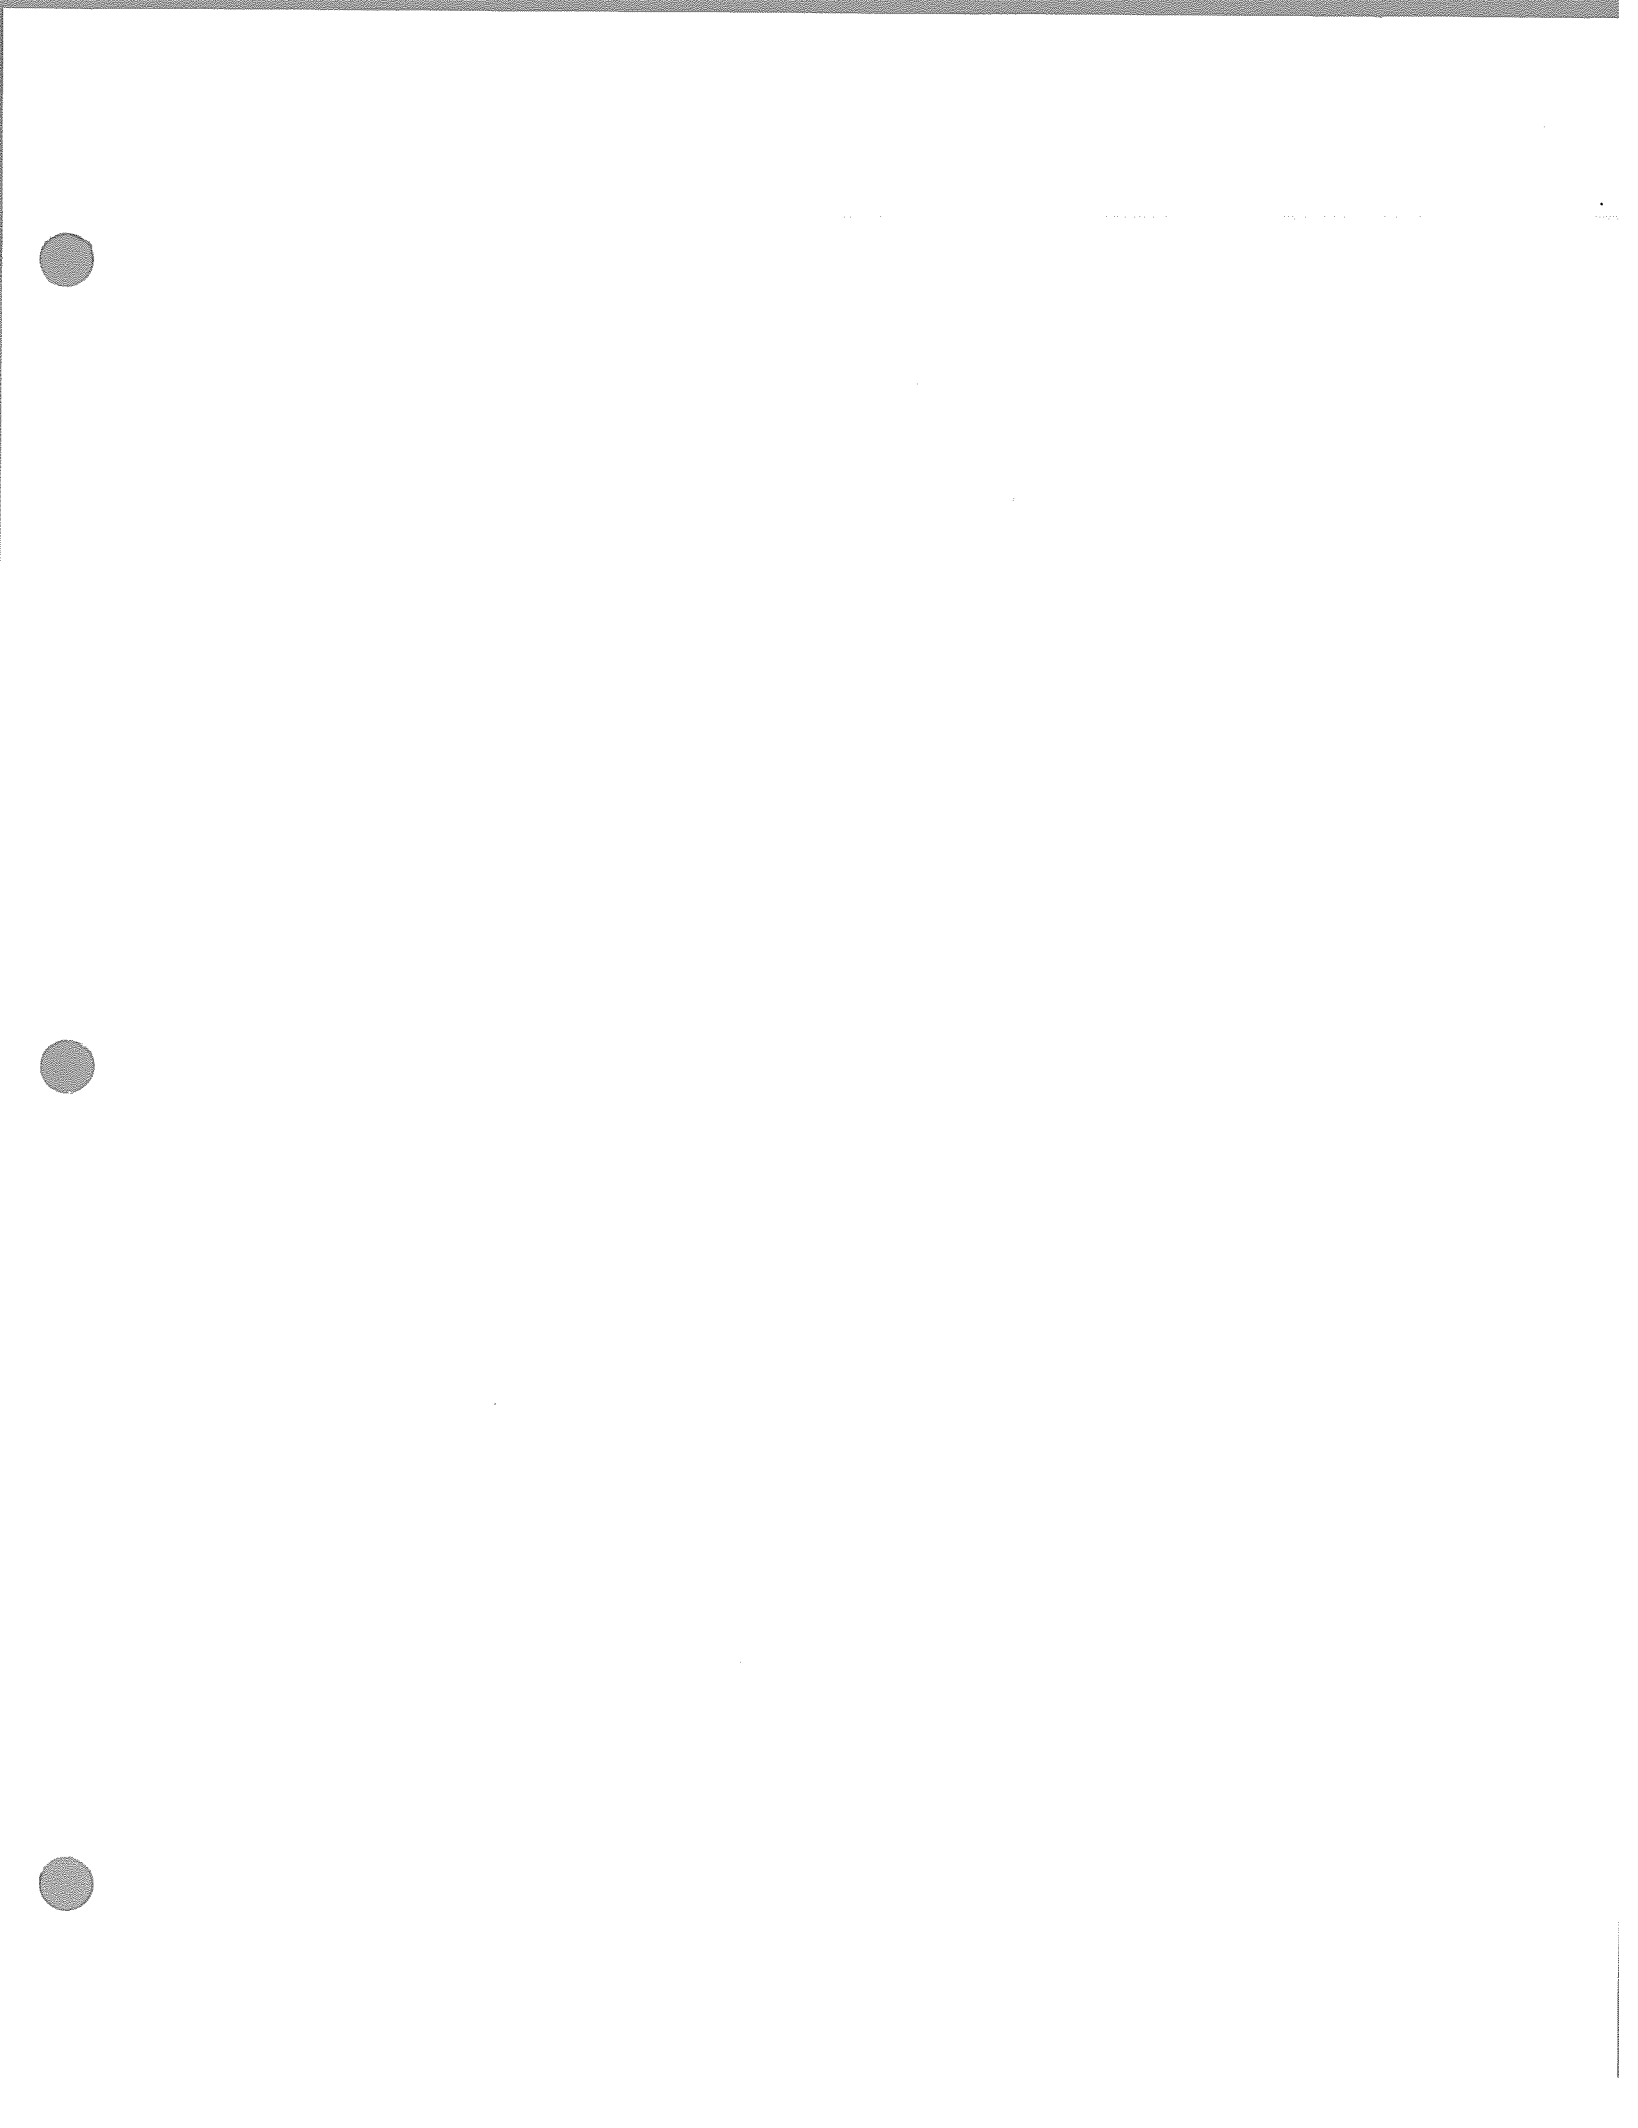

---

**Witness: Keith Cartier**

4. Provide explanation regarding why the unit was not returned to our property after it was deemed to be working properly.

**Response:**

When KAW tests a residential meter for accuracy, it does so at its facilities on Richmond Road, so it must be removed and a replacement meter is installed. When that occurs, the removed meter is never returned to the customer's residence because that would generate unnecessary manpower costs. Furthermore, in this case, the meter could not have been returned to the customer's residence because the PSC obtained the meter.

**KURT AND LAYNE NETHERTON V. KENTUCKY-AMERICAN WATER COMPANY**  
**CASE NO. 2014-00141**  
**COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

---

**Witness: Keith Cartier**

5. Provide explanation of process for reading the meter to determine the usage. Was the same process and equipment used each time? Provide all relevant details regarding the specific equipment used to read the meter each time it was read during the time period between 11/5/13-3/7/14.

**Response:**

Almost all of KAW's meters are automatic radio read meters. These meters are read automatically by electronically transmitted data as the meter reader drives throughout our service territory each month while performing routine meter reading activities. When meters are manually read, the employee obtaining the meter reading in the field opens the lid and observes the meter's dials and records this reading. The current period's reading is compared to the previous period's reading to calculate the amount of water consumed.

Please see the following events for the Netherton residence.

<b>Device</b>	<b>Meter Reading Date</b>	<b>Meter Read Description</b>	<b>Process</b>
H013289897	3/6/2014	AMR Meter Reading	Reading was obtained with a Hersey Street Machine mobile data collector.
H013289897	1/29/2014	Meter Changed - Installed	Manually read.
090537102N	1/29/2014	Meter Changed - Removed	Manually read.
090537102N	1/24/2014	Service Order - Hi/Lo Usage	Manually read.
090537102N	1/7/2014	AMR Meter Reading	Reading was obtained with a Neptune Model MRX920 mobile data collector.
090537102N	12/27/2013	Service Order - Read for Billing	Manually read.
090537102N	12/5/2013	AMR Meter Reading	Reading was obtained with a Neptune Model MRX920 mobile data collector.
090537102N	11/5/2013	AMR Meter Reading	Reading was obtained with a Neptune Model MRX920 mobile data collector.

**KURT AND LAYNE NETHERTON V. KENTUCKY-AMERICAN WATER COMPANY**  
**CASE NO. 2014-00141**  
**COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

---

**Witness: Keith Cartier**

8. What is the malfunction history or malfunction percentage ratio of the Neptune 5/8 x 3/4 cubic feet meter?

**Response:**

KAW objects to the term "malfunction" as being ambiguous as it relates to the functioning of a water meter, however, KAW does have data relating to meters it has tested that failed either high or low on any of the minimum, intermediate or maximum accuracy flow rates. If a meter falls outside of these limits, even if only on one flow, the meter fails the test. Determination of meter accuracy for a 5/8 x 3/4" meter is based on the following accuracy limits:

Flow	Accuracy Limits	
Minimum Flow	95.0%	101.0%
Intermediate	98.5%	101.5%
Maximum	98.5%	101.5%

Between June 1, 2012 and May 31, 2014 KAW had approximately 181,524 meters in service. During that time KAW had 244 Neptune 5/8 x 3/4" meters fail when they were tested. This represents a failure percentage of 0.134%. Meters are tested only when there is a suspected problem.

**Witness: Keith Cartier**

9. Provide a list of all complaints or "rereads" related to the employees that read and/or reread our meter from 11/5/13-1/17/14.

**Response:**

KAW does not keep its records in a way that allows for a feasible and efficient way to determine which employees take a reading which later needs to be re-read for some reason. However, it is important to understand that initial meter readings, like the December 5, 2013 meter reading in this case, were performed through radio transmission and this is automatically compiled on data collectors located in KAW meter reading vehicles. That data is then uploaded electronically for billing. Re-reads are also generated automatically, and, typically, those re-reads occur manually rather than automatically, just as occurred in the Netherton case. The employees that read manually verify the reading in the field by opening the lid and observing the meter dials.

10. Provide specific information regarding what type of meter is currently in place on our property located at 3649 Winding Wood Lane, Lexington, KY.

**Response:**

The meter currently in place is a Hersey-Mueller 5/8" AMR meter.

**Witness: Keith Cartier**

11. Provide information regarding the age of the meter with serial #90537102 and the average "life span" for Neptune 5/8 x 3/4 meters.

**Response:**

Meter #90537102 was purchased March 31, 2011 and installed at the Complainants' premise August 29, 2011. The life span is up to 15 years for a 5/8" meter. Also, please see the attached Neptune warranty documentation.

# Neptune Certificate of Warranty

## Neptune T-10, HP Turbine, Tru/Flo® Compound Cold Water Meters

### 1. Terms of Limited Warranty.

With respect to its Neptune T-10, HP TURBINE, TRU/FLO COMPOUND Water Meters (collectively the "Water Meters"), Neptune Technology Group Inc. ("Neptune") warrants the following on meters sold on or after 11/1/92:

The Water Meters will be, at the later of (i) the date of original purchase from Neptune or (ii) the date of original shipment from Neptune-authorized distributor of Water Meters (that later date is referred to as "the Date of Shipment") and will remain for a period of 18 months from the Date of Shipment, or 12 months from date of installation, free from manufacturing defects in workmanship and material.

- (a) **Maincase.** The no-lead high copper alloy or Brass maincase of the Water Meters will be at the Date of Shipment free from manufacturing defects in workmanship and material for the life of the Water Meter.
- (b) **Frost Protection.** All Neptune T-10 Cold Water Meters shipped with a synthetic polymer or cast iron bottom cap will, commencing upon the Date of Shipment, be warranted against chamber damage for a period of 10 years.
- (c) **Registers.** Standard, roll sealed registers of the Water Meters will be at the Date of Shipment, and shall remain for the following periods, free from manufacturing defects in workmanship and material for a period of 10 years. The performance of the Water Meters Pulsar RM remote is guaranteed for 1 year from Date of Shipment. The ARB®, ProRead™ (ARB VI), and E-Coder™ (ARB VII) system registers are warranted for 10 years from Date of Shipment. All ProRead encoder receptacles shipped after January 1, 2001 shall be warranted for five years from the Date of Shipment. All other components and parts are covered under Neptune's standard one year material and workmanship guarantee.
- (d) **Meter Accuracy for Neptune T-10.** Neptune T-10 Meters are warranted to meet or exceed, as listed herein, accuracy standards of the AWWA Standard C700-95 for a period of: (i) five (5) years from Date of Shipment for 5/8", 3/4" and 1" meters; (ii) for a period of two (2) years from the Date of Shipment for 1 1/2" and 2" meters; or (iii) the applicable registration shown below, whichever occurs first. Neptune further guarantees that the Neptune T-10 will perform to at least Repaired Meter Accuracy Standards, according to AWWA Manual M-6 Chapter 5 (1999) Table 5.3 for an additional ten (10) years or the registration shown below, whichever occurs first.
- (e) **Meter accuracy for HP Turbine and TRU/FLO.** The HP Turbine and TRU/FLO Compound Cold Water Meters will perform, for a period of one (1) year from the Date of Shipment, to American Water Works Association ("AWWA") accuracy standards for new water meters.

SIZE	EXTENDED LOW FLOW ACCURACY	NEW METER ACCURACY	REPAIRED METER ACCURACY
5/8" & 5/8" x 3/4"	1/8 US gpm @ 95% 5 years or 500,000 gallons	500,000 gallons	1,500,000 gallons
3/4"	1/4 US gpm @ 95% 5 years or 750,000 gallons	750,000 gallons	2,250,000 gallons
1"	3/8 US gpm @ 95% 5 years or 1,000,000 gallons	1,000,000 gallons	3,000,000 gallons
1 1/2"	3/4 US gpm @ 95% 2 years or 1,600,000 gallons	1,600,000 gallons	5,000,000 gallons
2"	1 US gpm @ 95% 2 years or 2,700,000 gallons	2,700,000 gallons	8,000,000 gallons

## 2. Warranty Return.

If a Neptune Water Meter fails an accuracy test during an applicable warranty period, it may be returned to Neptune for repair or replacement at Neptune's option. An accuracy test shall be conducted by the customer according to AWWA standards. If foreign material causes the meter not to perform appropriately, all such material shall be removed prior to the customer conducting the test. Any meter being returned for repair to Neptune under this performance guarantee must be returned with a copy of the customer's test results. If the meter is returned to Neptune without a copy of the test results or if Neptune's factory test shows the meter to meet current AWWA standards the customer will be charged a nominal testing fee by Neptune in such cases. Neptune will repair or replace the meter at Neptune's option after the meter has been tested by Neptune. Meters repaired or replaced under the performance guarantee will be guaranteed to perform to AWWA repaired meter accuracy standards.

## 3. Warranties are exclusive.

THE WARRANTIES SET FORTH IN THIS CERTIFICATE OF LIMITED WARRANTY ARE IN LIEU OF ANY OTHER WARRANTY, GUARANTEE OR REPRESENTATION, WHETHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE WARRANTY OF MERCHANTABILITY AND THE WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

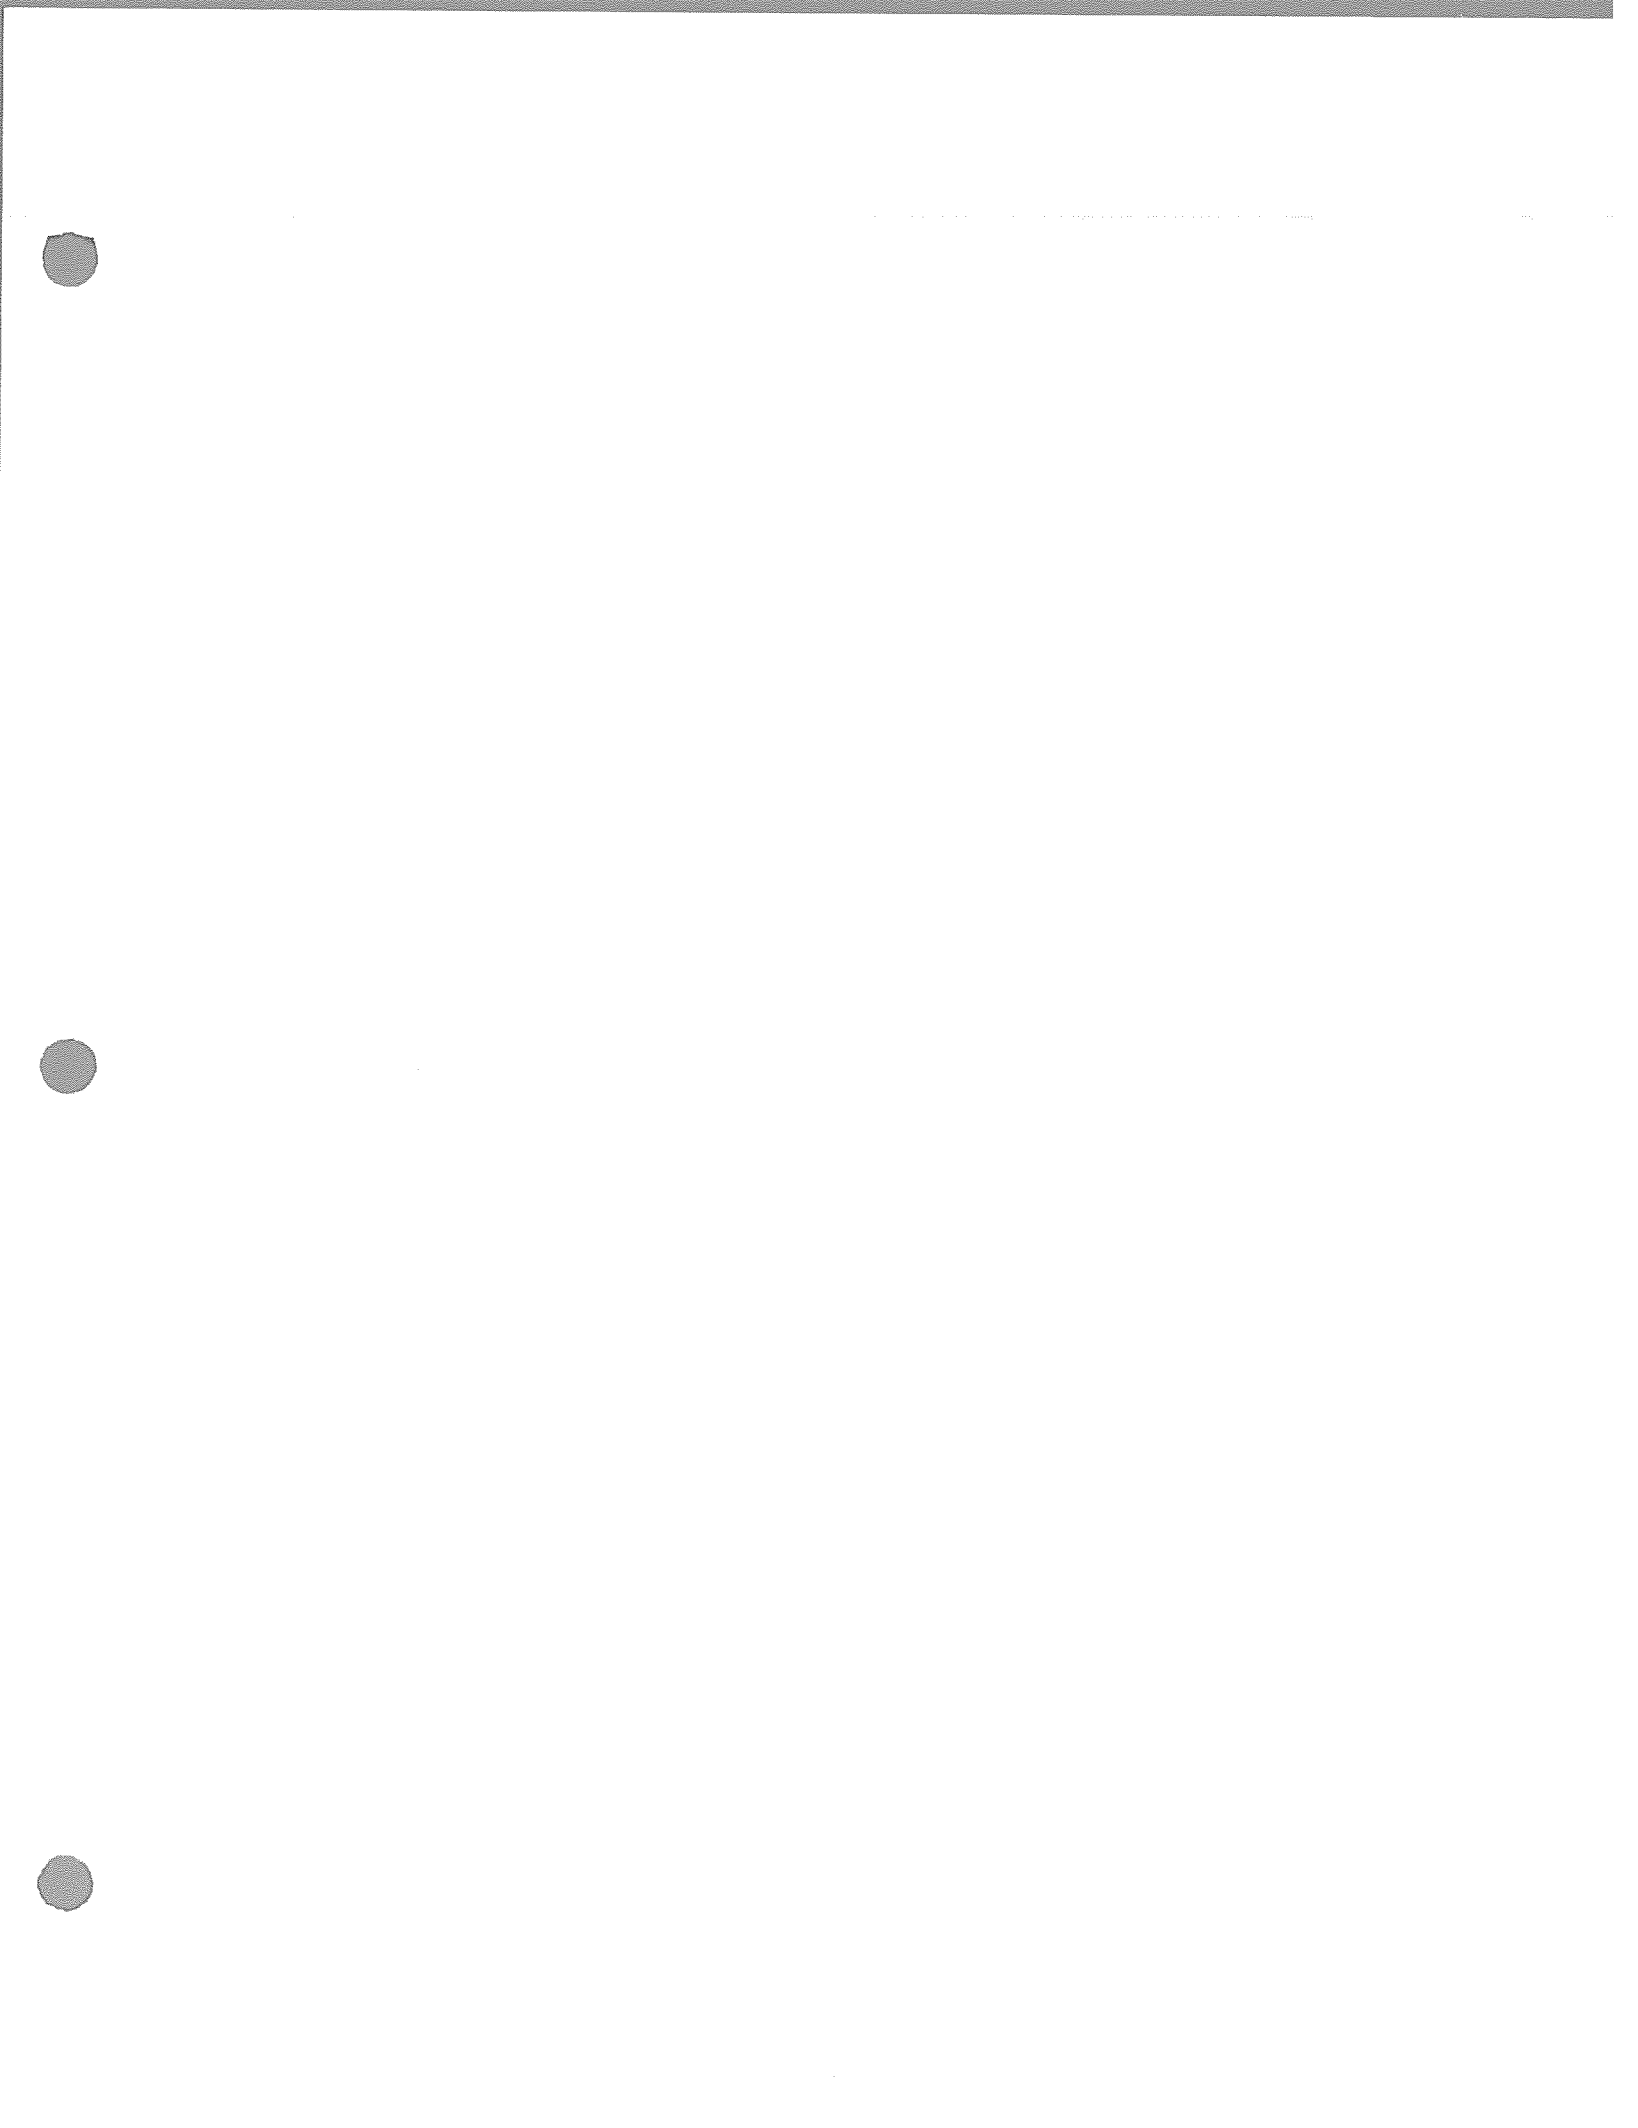

## 4. Damages limited to costs of replacement and repair.

If the Water Meter fails to meet the warranties set forth in Paragraph 1 of this Certificate of Limited Warranty, Neptune, at its option shall, without charge of labor or materials, repair or replace the Water Meter or part thereof, provided that (a) the Water Meter is delivered to a Neptune representative, (b) the Water Meter is accompanied by a Material Return Authorization, and (c) all costs of delivery to Neptune are assumed by the purchaser of the Water Meter. Neptune's liability is limited to its costs of replacement and repair of the defective water meter. Damages resulting from miscalculation of water usage or lost revenue or profit are not recoverable from Neptune. It is the responsibility of the customer to periodically verify the operation and accuracy of its meters.

## 5. Warranties are inapplicable under certain conditions.

The warranties set forth in this Certificate of Limited Warranty do not apply to any Water Meter that has been damaged by, or subjected to, conditions which, in the opinion of Neptune, have affected the Water Meter's ability of performance, including but not limited to: misuse; improper handling, application or installation; excessive operating conditions; foreign materials in the water; aggressive water conditions; tampering or unauthorized repairs or modifications; accidental or intentional damage; acts of God. This Certificate of Limited Warranty shall not apply if product is placed in non-recommended installation, is connected or altered by other than Neptune recommended procedures, is used with other than genuine Neptune meter registers and components or read by equipment not approved or licensed by Neptune. Neptune makes no claims concerning operability and/or compatibility or third party reading systems. In addition, this Certificate of Limited Warranty shall not apply if third party reading equipment is believed to have caused damage to the meter or register. In order to determine its liability, if any, under this certificate of Limited Warranty, Neptune shall have the right to inspect any Water Meter or part thereof that is claimed to be defective at Neptune or other location designated by Neptune.

NEPTUNE'S LIABILITY WITH RESPECT TO BREACHES OF THE FOREGOING LIMITED WARRANTY SHALL BE LIMITED AS STATED HEREIN. NEPTUNE'S LIABILITY SHALL IN NO EVENT EXCEED THE PURCHASE PRICE. NEPTUNE SHALL NOT BE SUBJECT TO AND DISCLAIMS THE FOLLOWING: (1) ANY OTHER OBLIGATIONS OR LIABILITIES ARISING OUT OF BREACH OF CONTRACT OR OF WARRANTY (2) ANY OBLIGATIONS WHATSOEVER ARISING FROM TORT CLAIMS (INCLUDING NEGLIGENCE AND STRICT LIABILITY) OR ARISING UNDER OTHER THEORIES OF LAW WITH RESPECT TO PRODUCTS SOLD OR SERVICES RENDERED BY NEPTUNE, OR ANY UNDERTAKINGS, ACT OR OMISSIONS RELATING THERETO, AND (3) ALL CONSEQUENTIAL, INCIDENTAL, SPECIAL, MULTIPLE, EXEMPLARY, AND PUNITIVE DAMAGES WHATSOEVER.

**KURT AND LAYNE NETHERTON V. KENTUCKY-AMERICAN WATER COMPANY**  
**CASE NO. 2014-00141**  
**COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

---

**Witness: Keith Cartier**

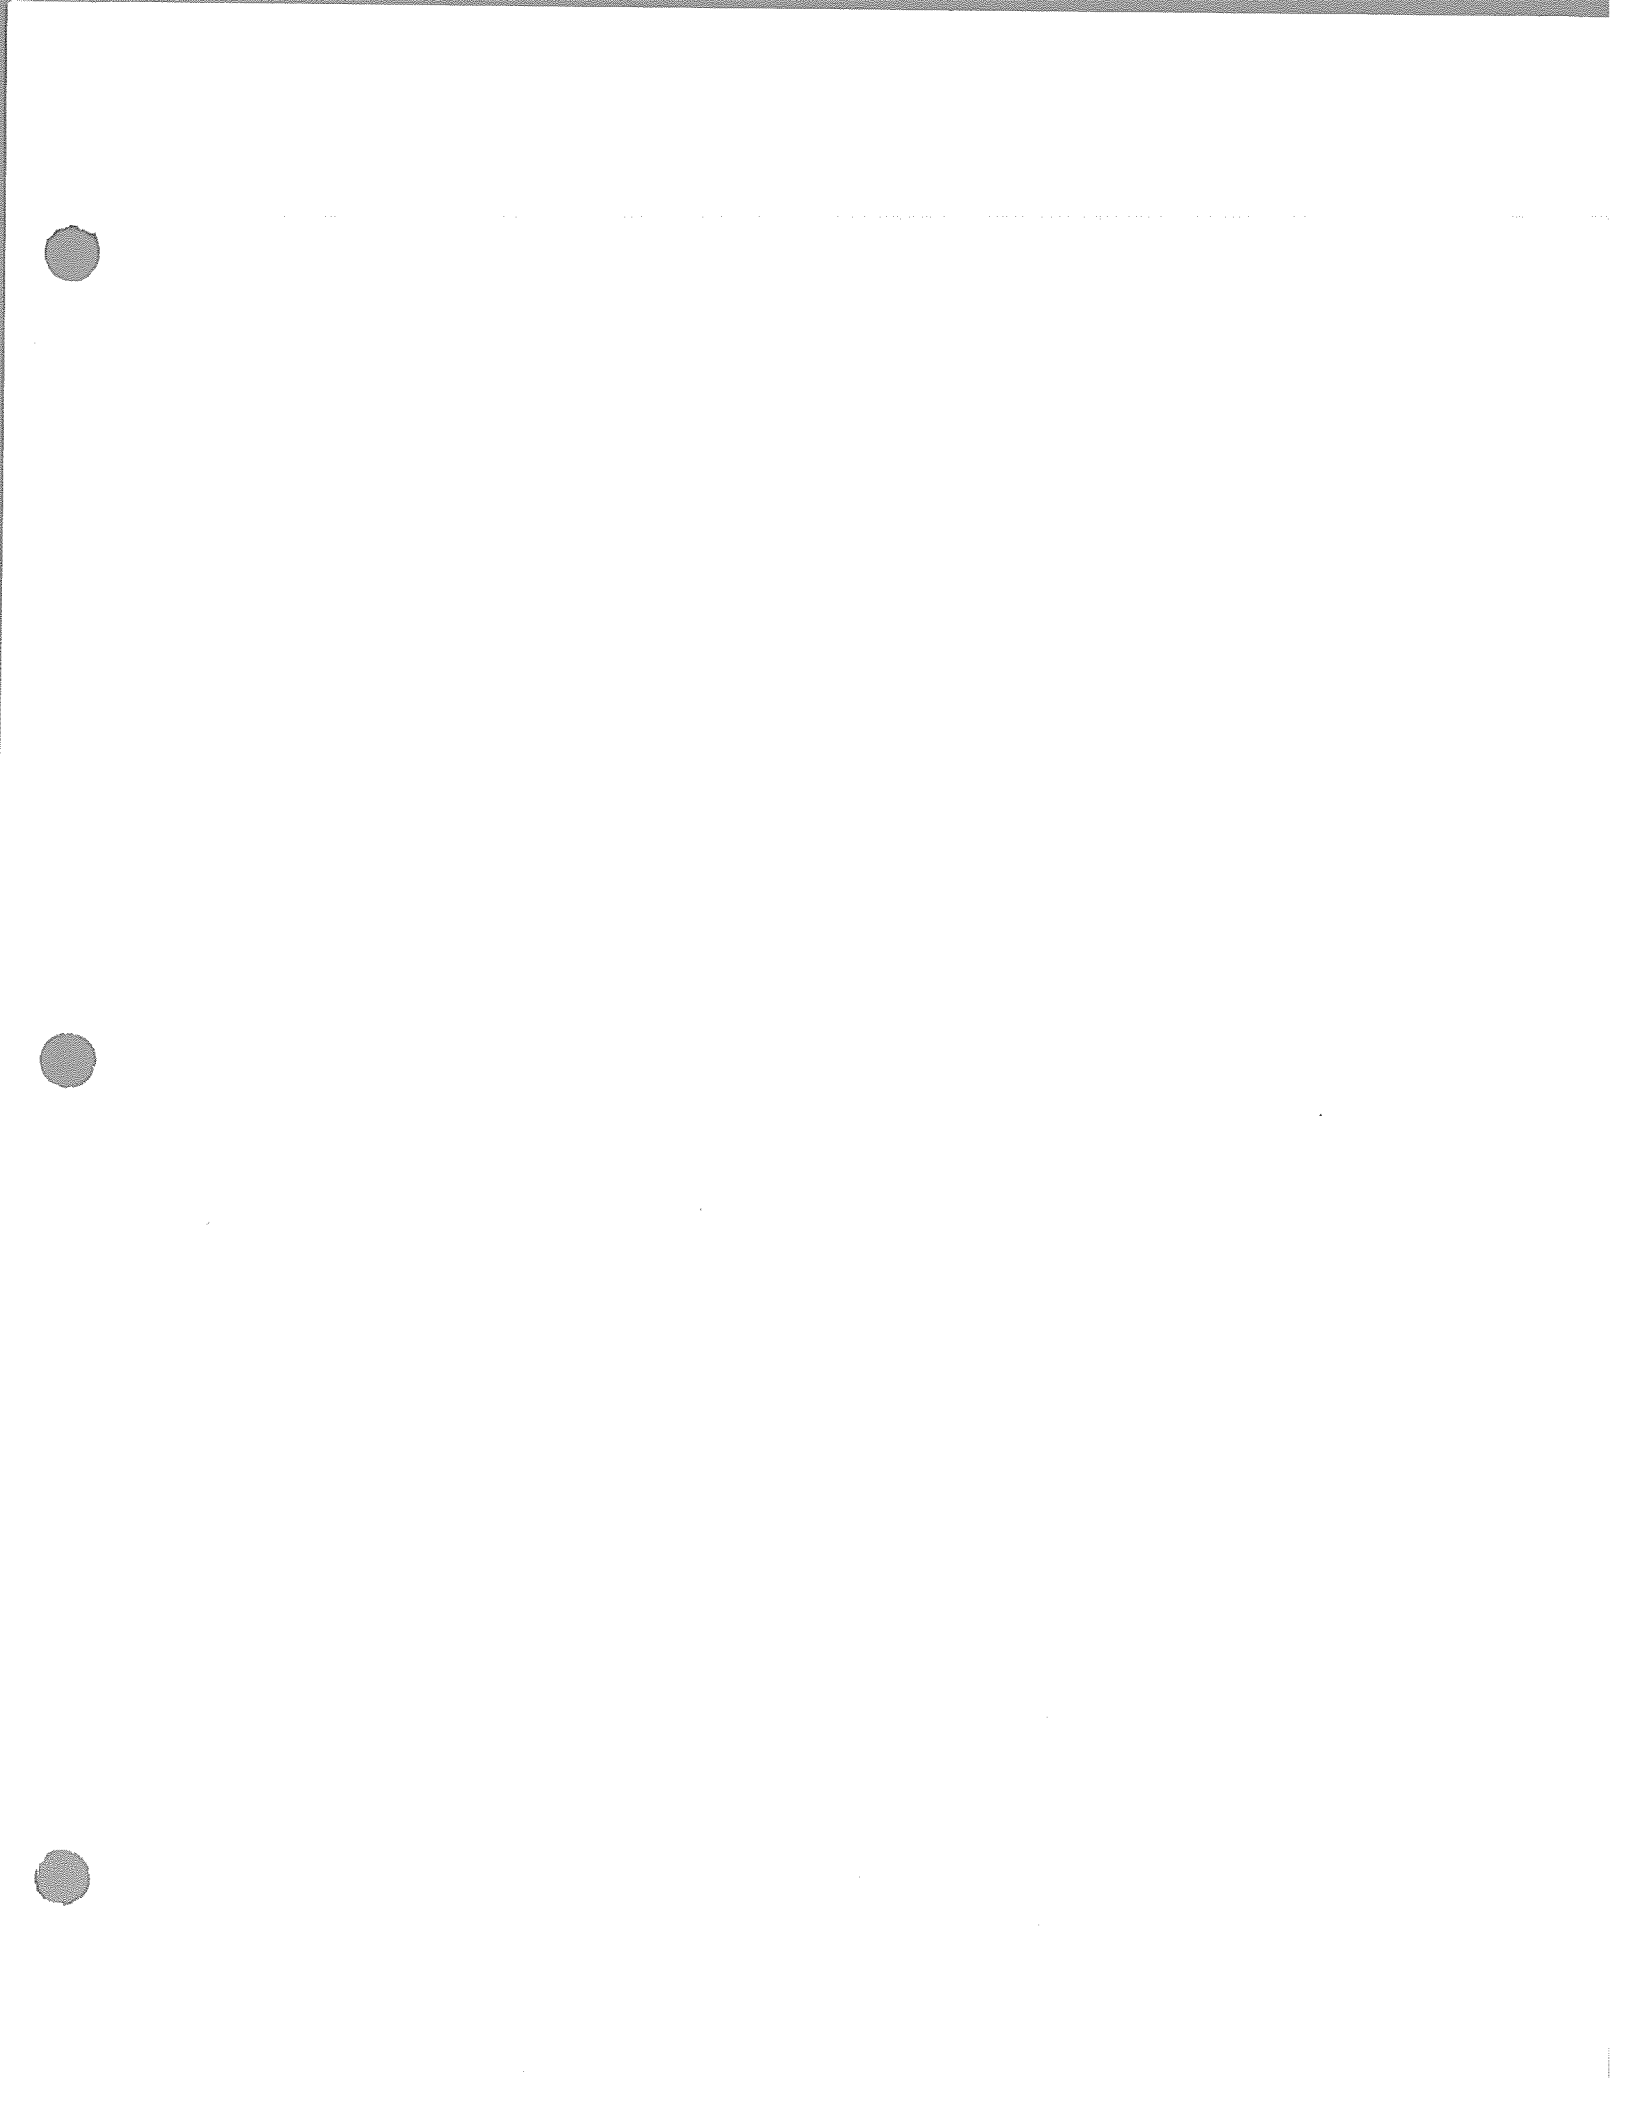

12. Provide explanation of how and why a Neptune 5/8 x 3/4 typically malfunctions.

**Response:**

As stated previously, KAW objects to the term “malfunction” as it relates to the functioning of a of a water meter, however, KAW states that 5/8 x 3/4” meters typically perform within the following accuracy limits:

Flow	Accuracy Limits	
Minimum Flow	95.0%	101.0%
Intermediate	98.5%	101.5%
Maximum	98.5%	101.5%

Over time, meters can fall outside these limitations due to a variety of reasons including clogging or debris that can bind the disc or restrict water flow. Notably, this would result in a meter reading that is lower, not higher, than actual usage. Sediment can also build up and act as debris to bind the meter. If a meter falls outside of these limits, even if only on one flow, the meter fails the test.

**KURT AND LAYNE NETHERTON V. KENTUCKY-AMERICAN WATER COMPANY**  
**CASE NO. 2014-00141**  
**COMPLAINANTS' FIRST REQUEST FOR INFORMATION**

---

**Witness: Keith Cartier**

13. Provide an explanation of other instances where KAWC has seen usage of 250,000 gallons of water consumed in 63 days. Has this ever been recorded in a household containing two people?

**Response:**

KAW is not able provide explanations for high usage on individual accounts and has no way of knowing how many occupants a residential rate premise may contain. KAW is not able to answer the specific question of 250,000 in 63 days. However, the attached file contains a listing of each occurrence where the usage for a residential rate account exceeded 125,000 gallons in a single billing period.
