PUBLIC SERVICE
COMMISSION

RE: Confidentiality Request of the information submitted to Kenergy
Case No. 2014-00376

Dear Mr. Derouen:

NISC is aware that Kenergy has submitted to the Kentucky Public Service Commission the required Application for a Certificate for Public Convenience and Necessity (CPCN) associated with their proposed deployment of an automated metering infrastructure (AMI) solution on their electric distribution system. NISC submitted a proposal that was accepted by Kenergy to provide certain components of this system. Kenergy committed to vendors that it would maintain confidentiality of the vendor's pricing and other proposal content that was marked as "proprietary" and "confidential".

Items considered proprietary or confidential include trade secrets, commercially sensitive or proprietary information, research, development, inventions, processes, methods, specifications, protocols, designs, drawings, diagrams, knowhow, engineering, marketing data, techniques, documentation, customer information, pricing information, procedures, data concepts, business and marketing plans or strategies, financial information, business opportunities, requests for proposals or information, software and related documentation, hardware information, services and products (both existing and planned) and product road maps.

Please consider this letter as NISC's request to the Commission to honor the confidential nature of this information.

Sincerely,

J. Charles Griggs
