Re: *Application of Kentucky Utilities Company for an Order Authorizing the Restructure and Refinancing of Unsecured Debt and the Assumption of Obligations and for Amendment of Existing Authority - Case No. 2010-00206*

Dear Mr. DeRouen:

Pursuant to Ordering Paragraph No. 9 of the Kentucky Public Service Commission's Order, dated September 30, 2010, in the aforementioned case, attached is a Form 8-K filed with the Securities and Exchange Commission ("SEC") on October 3, 2013.

Please confirm your receipt of this filing by placing the File Stamp of your Office with date received on the extra copy and returning it to me in the enclosed envelope. Should you have any questions regarding the information filed herewith, please call me or Don Harris at (502) 627-2021.

Sincerely,

A handwritten signature in blue ink that reads "Rick E. Lovekamp".

Rick E. Lovekamp

Section 8 - Other Events

Item 8.01 Other Events

On October 3, 2013, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU" and, together with LG&E, the "Companies") issued a press release announcing that they plan to build an approximately 700 megawatt ("MW") natural gas combined-cycle generating unit at KU's Green River generating site in western Kentucky. Subject to regulatory applications, permitting and construction schedules, the facility is planned to be operational in 2018. The project's anticipated cost is approximately \$700 million. The Companies also announced plans for a potential 10 MW solar generation facility to be operational in 2016 costing approximately \$25 million.

A copy of the Companies' press release is filed herewith as Exhibit 99.1 and incorporated herein by reference.

Section 9 - Financial Statements and Exhibits

Item 9.01 Financial Statements and Exhibits

(a) Exhibits

99.1 - Press Release dated October 3, 2013 of Louisville Gas and Electric Company and Kentucky Utilities Company.

Statements in this report and the accompanying press release, including statements with respect to future events and their timing, including the Companies' potential regulatory outcomes, as well as other statements as to future costs or expenses, regulation, corporate strategy and performance, are "forward-looking statements" within the meaning of the federal securities laws. Although the Companies believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these expectations, assumptions and statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: regulatory construction approvals and permitting; market demand and prices for electricity; political, regulatory or economic conditions in states, regions or countries where the Companies conduct business; and the progress of actual construction or purchase of the relevant assets or facilities. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation's, LG&E and KU Energy LLC's and the Companies' Form 10-K and other reports on file with the Securities and Exchange Commission.

SIGNATURES

rsuant to the requirements of the Securities Exchange Act of 1934, the Registrants have duly caused this report to be signed on their behalf by undersigned hereunto duly authorized.

**LG&E and KU Announce Plans to Build Second Natural Gas
 Combined-Cycle Generating Station and a Solar Generation Facility**
*Both plants to be located on existing properties;
 NGCC to create about 40 full-time, 250 construction jobs*

LOUISVILLE, Ky.) – Louisville Gas and Electric and Kentucky Utilities companies announced today that they plan to file for a certificate of public convenience and necessity with the Kentucky Public Service Commission for permission to construct a second natural gas combined-cycle generating station (NGCC) and a solar generating facility. The NGCC plant, to be located in Muhlenberg County, is expected to create about 40 permanent full-time jobs and several hundred construction jobs in western Kentucky.

In order to meet our customers' energy needs and considering ever-increasing federal environmental regulations, LG&E and KU previously announced they are retiring 800 megawatts of older coal-fired generation — at Cane Run, Green River and Tyrone stations — and building a 640-megawatt NGCC unit at Cane Run. A request for proposals was issued in September 2012 to address the remaining lost generation and long-term load growth.

LG&E and KU evaluated competitive bids which included renewable energy, existing energy within Kentucky and building new generation. The utilities also considered short-term proposals (from one to five years) and long-term proposals (from 10 to 20 years). After careful analysis, building a second NGCC at the existing Green River site proved to be the best long-term solution for baseload generation. While the details are being finalized, the plant is expected to have about 700 megawatts of capacity and cost approximately \$700 million to construct. Additionally, the companies will be seeking to construct about a 10-megawatt solar facility costing approximately \$25 million at one of its existing generating stations. Several sites are still being evaluated in order to determine the optimal location.

In order to continue to meet our customers' energy needs and considering ever-increasing federal environmental regulations, this has been a lengthy and complicated bid process. We're pleased that the outcome creates economic development in western Kentucky and provides LG&E and KU customers with reliable, low-cost energy that will meet the latest set of federal EPA regulations," said Paul W. Thompson, LG&E and KU chief operating officer.

LG&E and KU plan to file the certificate of public convenience and necessity for the new NGCC plant and solar facility with the KPSC before the end of the year. The utilities intend to have the NGCC plant online in 2018 and the solar facility online in 2016. If approved, LG&E and KU generation capacity will be 59 percent coal-fired, 40 percent natural gas-fired and 1 percent renewable.

###

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com.
