

## **Wireless Carriers, Pay Phone Providers, and Providers of Pre-Paid Calling Card Services**

Wireless carriers, pay phone providers, and providers of pre-paid calling card services that wish to provide service in Kentucky and that have not previously filed a notice of intention to do business in this state are required to submit a letter to the Commission which contains:

- (1) The name and address of the utility;
- (2) Articles of incorporation or partnership agreement, if applicable; and
- (3) Name, street address, telephone number and fax number, if any, of the person who should be contacted to address customer complaints and regulatory issues.

**Updates to this information must also be submitted.**

Wireless carriers, pay phone providers and providers of pre-paid calling card services are not required to file tariffs. Wireless carriers and providers of pre-paid calling card services must, however, continue to file gross operating revenue reports and continue to pay Commission assessments pursuant to KRS 278.130, KRS 278.140, and KRS 278.150. Pay phone providers are not required to file gross operating reports or pay Commission assessments.

In addition, wireless carriers must continue to apply to this Commission, in those areas outside the jurisdiction of local planning commissions, pursuant to 807 KAR 5:063 and statutes pertaining to antenna tower construction. The elimination of a requirement to tariff services does not exempt wireless carriers from collecting and remitting Commission-ordered universal service funding or complying with other regulatory requirements.
