## PSC STAFF OPINION 2013-019

David Estep  
President & General Manager  
Big Sandy Rural Electric Cooperative  
504 11th Street  
Paintsville, KY 41240-1422

RE: Big Sandy Rural Electric Cooperative Corporation's 2014-2017 Construction Work Plan

Dear Mr. Estep:

Commission Staff acknowledges receipt of your letter dated November 25, 2013, on behalf of Big Sandy Rural Electric Cooperative Corporation ("Big Sandy"), in which you request an opinion as to whether any or all projects contained in Big Sandy's 2014-2017 Construction Work Plan ("CWP") require a Certificate of Public Convenience and Necessity ("CPCN") or whether the projects fall within the "ordinary course of business" exemption and, therefore, do not require a CPCN.

Pursuant to the Commission's recent decision that each construction project contained in a CWP should be analyzed on an individual basis to determine whether that individual project is exempt from the requirement in KRS 278.020(1) to obtain a CPCN, Commission Staff has met and reviewed the amended projects to Big Sandy's 2014-2017 CWP. This letter represents Commission Staff's opinion, which is advisory in nature, and not binding on the Commission should the issues herein be formally presented for Commission resolution.

As with all legal opinions requesting a determination of the exemption from the requirement of a CPCN, Commission Staff's review does not consider the reasonableness or the need for each project. Therefore, because reasonableness and need are not considered herein, or in other non-rate cases, the cost of such a project can be denied recovery in a rate case if found to be unreasonable or unnecessary.

According to its 2014-2017 CWP, Big Sandy proposes construction identified by the following RUS Codes: (1) Code 100 construction for new services at an estimated

total cost of \$2,260,433; (2) Code 300 line conversion and replacement at an estimated total cost of \$339,281; (3) Code 600 for miscellaneous distribution equipment and pole changes at an estimated total cost of \$4,723,393; and (4) Code 700 outdoor lighting at an estimated total cost of \$260,422.

KRS 278.020(1) provides, in relevant part, as follows:

No person, partnership, public or private corporation, or combination thereof shall commence providing utility service to or for the public or begin the construction of any plant, equipment, property, or facility for furnishing to the public any of the services enumerated in KRS 278.010, except retail electric suppliers for service connections to electric consuming facilities located within its certified territory and ordinary extensions of existing systems in the usual course of business, until that person has obtained from the Public Service Commission a certificate that public convenience and necessity require the service or construction.

Regarding the exception to the CPCN requirement, Administrative Regulation 807 KAR 5:001, Section 15(3) provides, in full, as follows:

Extensions in the ordinary course of business. A certificate of public convenience and necessity shall not be required for extensions that do not create wasteful duplication of plant, equipment, property, or facilities, or conflict with the existing certificates or service of other utilities operating in the same area and under the jurisdiction of the commission that are in the general or contiguous area in which the utility renders service, and that do not involve sufficient capital outlay to materially affect the existing financial condition of the utility involved, or will not result in increased charges to its customers.

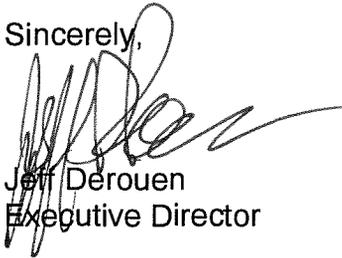

In analyzing whether the proposed projects would materially affect Big Sandy's financial condition, Commission Staff takes notice of Big Sandy's 2012 Annual Report, which shows Big Sandy has a net utility plant of approximately \$33,164,458 as of December 13, 2012. When reviewed individually, each proposed construction project based on its estimated cost would not materially impact Big Sandy's existing financial condition. Therefore, each construction project is generally considered to be an extension in the ordinary course of business. Likewise, the cost estimate of each

David Estep

project considered separately in the 2014-2017 CWP will not have an immediate or significant impact on Big Sandy's rates. Thus, Commission Staff is of the opinion that each of the proposed projects set out in Big Sandy's 2014-2017 CWP satisfy the "ordinary course of business" exemption from CPCN requirement.

This letter represents Commission Staff's interpretation of the law as applied to the facts presented. This opinion is advisory in nature and not binding on the Commission should the issues herein be formally presented for Commission resolution. Questions concerning this opinion should be directed to Quang D. Nguyen at (502) 782-2586.

Sincerely,

Jeff Derouen  
Executive Director
