

Murray No. 3 Water District  
P.O.Box 643  
Murray, Ky 42071

2004-00274

September 30, 2003

In response to the two deficiencies noted in a letter dated September 12, 2003.

1. Murray Water District 3 has talked to the Murray Water Systems about the testing of their master meter which serves our water district. Their response was "that in the near future they would be testing their master meters."
2. Murray Water District 3 has two employees. Both of us run our individual part of the utility from our own homes. Basically the only contact we have with each other is by telephone.

In consideration of the above there would be only a very remote chance of using CPR on each other.

We hope Kentucky Public Service Commission will agree on this point.

Murray Water District 3
