Case No. 2006-00015

I would like to submit a motion to intervene against the proposed increase in our water rates. You will find I am a customer in good standing, paying in full and on time. The rate increase will seriously affect my farming practices especially during winter and drought times.

I feel the 34 to 35 % increase is extreme in the very least. If an increase is necessary an average of the proposed increases would be more tolerable. I understand an increase is inevitable, but not a such an outrageous amount.

Respectfully,

*Danny Allison*
