PUBLIC SERVICE
COMMISSION

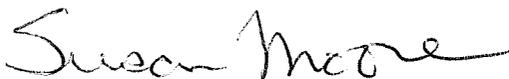

Dear PSC:

I believe the proposed rate hike (case # 2006-00415) is unnecessary. A bill from Inter County consists of energy charge, fuel charge, minimum bill charge, environmental surcharge, and school tax. Inter County energy should be making enough money from the minimum bill charge to cover what ever expenses they may have.

I do not believe that it should be legal to charge a minimum bill charge if you have a monthly bill. This cost me an extra \$66.60 a year on top of my regular bill.

Also, I believe the need for the rate hike to pay for the very expensive building that was recently built. Did it really need to be as elaborate as it is?

Thank you.
