Kentucky Pubic Service Commission

Dear PSC:

Regarding 2008-00011, I had a call left on my answering machine from a Mr. Cornett of Blue Grass Energy. Mr. Cornett's message was as follows: "I can give you a closer number as to what the proposed rate increase would do to your car wash as far as affecting the bill." I realize that Mr. Cornett is just doing his job, but the purpose of my previous correspondence was to **stop** any proposed increase for the reasons previously stated and not to discuss any increase! I already know how an increase would "affect" my bill. If Mr. Cornett can supply the already strapped consumer with enough to make up for the rate increase so that I may raise my prices to cover same that would be helpful. If, in fact, he cannot, he needs to call me and others affected and tell us that **the rate increase is unjustified in this recessionary environment.**

Thank you,

Kenneth Ledford
