**Subject:** Program Chair Invitation: AWEA Wind & Transmission Workshop

**AWEA Wind &  
Transmission Workshop**

**March 17 - 18, 2009  
Overland Park, KS**

Dear Fellow Wind Energy Professionals,

The US transmission system is poised for unprecedented growth and change. The American Recovery and Reinvestment Act of 2009 provides funding for new transmission, and transmission legislation is ready to be introduced in Congress to remove roadblocks for private investment in green power superhighways. The AWEA Wind & Transmission Workshop, March 17 - 18, 2009 in Overland Park, KS, will connect you with the people on the forefront of these initiatives to explain what they will mean for wind development.

Wind projects face evolving interconnection standards, interconnection queue process changes, new transmission project opportunities, and increasing challenges from utilities concerned about grid operations and power system balancing. To learn more about these challenges and potential solutions for tapping the massive quantities of renewable resources and sharing them, I invite you attend the AWEA Wind & Transmission Workshop.

I truly feel you will benefit from attending this workshop, and hope you can join us at The Sheraton Overland Park, Overland Park, KS, March 17 - 18, 2009. Now is the time to be developing integral solutions and this workshop will identify these solutions with insight from policy makers and industry leaders.

Sincerely,

**Kris Zadlo**, Vice President, Transmission, Invenergy LLC  
AWEA Wind & Transmission Workshop Program Chairperson
