agreement with BCSD by which BCSD has agreed to treat the wastewater generated by the Hunters Hollow Collection System through December 31, 2016. The manner in which Bullitt Utilities will provide treatment services after December 31, 2016 has not yet been determined. Paragraph 13 of the Agreement between Bullitt Utilities and BCSD provides that they shall work to develop a long term solution to the failure of the Hunters Hollow WWTP. Bullitt Utilities will also continue to provide collection services to its customers.

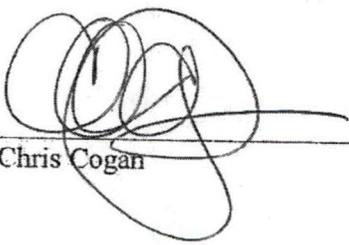

Witness: Chris Cogan.

Information Request No. 9. Refer to Bullitt Utilities' supplemental response to Staff's First Request, Items 8.a. and 8.b. In the calendar years 2011 through 2013, Bullitt Utilities reported that its chemical costs ranged from \$3,709 to \$12,753, but from August 14, 2014, through January 15, 2015, Bullitt Utilities was invoiced for \$95,691 in chemicals. Provide a detailed explanation for the drastic increase in Bullitt Utilities' chemical costs.

ANSWER: The increase in Bullitt Utilities' chemical costs is primarily due to the need to operate the Veolia temporary WWTP, which WWTP relies heavily on chemicals for treatment of the wastewater.

Witnesses: Chris Cogan, Chris Crumpton and Lawrence W. Smither.

Certification: The Responses of Bullitt Utilities set forth above are true and accurate to the best of my knowledge, information and belief.
