RE: Case No. 2014-00267 – Surcharge Activity Report

Mr. Derouen,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

Currently 7 of the 10 Zone Meters are giving usable data to help in leak detection. With the data given we are comparing those numbers with our billing numbers to determine average daily use billed and, average daily use through the Zone Meter. With this process we were able to determine and repair 2 minor leaks in the Zone 8 area in addition to 2 minor leaks in unzoned areas. The 3 Zone Meters that are not in operation are still awaiting firmware. This has been an ongoing problem that is being addressed with the contractor.

Also, to help in the discovery of leaks, KRWA will have leak detection equipment on site June 14-15 to assist in finding leaks within the system.

Lastly Cannonsburg Water District has been talking with Sensus Engineers and Project Managers about a pilot project with a leak detection monitoring system.

If at any time you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in black ink that appears to read "Tim Webb".

Tim Webb
General Manager
