RE: Case No. 2014-00267 – Surcharge Activity Report

Mr. Derouen,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CWD is continuing to monitor the data received from the 8 flow meters in use at this time. According to flow records, CWD has two areas that are showing a substantial amount of loss. Attempts to locate visually have been unsuccessful due to the number of main and service line creek and stream crossing. CWD has purchased a portable flow monitor and digital leak detector to aid in finding leaks. KRWA has been notified and has scheduled to train CWD staff on leak detection and locating.

On 3/13/17, CWD meet with staff from the PSC for an informal conference. This meeting was very informative and productive and CWD staff looks forward to working more with PSC staff in regards to water loss. CWD will continue to develop a revised plan to increase water loss detection and prevention and submit accordingly.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink that reads "Tim Webb".

Tim Webb
General Manager
