RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Mathews,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CWD is continuing its efforts, with the guidance of the PSC, in planning a water loss and detection project to further capture and reduce water loss. At this time, CWD is obtaining pricing for such a project. Once a project estimate is obtained and locations of further detection set, a motion will be filed to revise the water loss detection plan. In the meantime, we will continue our efforts in leak detection with all available means.

As a status up date to the existing zone meters, the manufacturer of the 2 troubled meters (Siemens) has been on site to evaluate the meter communications with CWDs metering system. The 2 meters in question are operating in test mode only due to not communicating as designed by Siemens. Siemens engineers are evaluating the cause and will be updating CWD as soon as they determine the defect and solution.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink that reads "Tim Webb". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Tim Webb
