Dear Sir/Madam:

I just read a letter in the Lexington Herald which referenced an article concerning a rate increase proposed by Kentucky Utilities. The writer stated that KU said the rate increase would be for 9.57%, but that is incorrect. The price increase has the basic residential service rate going from \$10.75 to \$18.00 per month. This is a rate increase of 67.5%; not 9.57%.

I implore the Commission to turn down KU's proposal. My husband is on disability and I have not had a wage increase in several years. My husband and I are living paycheck to paycheck as it is; as I'm sure most people are.

It seems to me that every time you turn around one of the utility companies is asking for a rate increase. Before you know it, people won't be able to pay for their utilities.

Sincerely,

Belinda Johnson
