Frankfort, Kentucky 40602

Re: Cannonsburg Water District **PSC Case No. 2015-00181**

Dear Mr. Derouen:

Please be advised that we are submitting certain corrections to the original Application filed in the above reference case: (a) Paragraph 4(vi) should read "(vi) replacement of 2,800 water meters with new water meters and an associated tower meter read system"; and (b) references to the principal amount of the Bonds in paragraph 5 and the wherefore clause should be \$1,668,000 not \$1,688,000.

Also, please be advised that the intention of the proposed Project is to: (i) alleviate low pressure problems in certain service areas; (ii) upgrade certain outdated equipment; (iii) renovate several water storage tanks; and (iv) convert old residential water meters to new radio read meters thus providing more accurate information on water usage.

We are enclosing for your information the certified bid tabulations.

The information on the meters is contained in Section 13600 (Automatic Water Meter Read System) of the Specifications on file with the Commission. The District is utilizing the "Sensus" brand AMR meter read system.

If you need any additional information or documentation, please let us know.

Sincerely,

Rubin & Hays

By 
W. Randall Jones
