Jackson Energy really appreciates the Commission's willingness to work with the utilities mitigating our concerns regarding the revisions to the regulations.

We still have concerns with 807 KAR 5:006 Section 7(5)(c) and recommend that this section be eliminated. The proof that the service and the meter was inspected should not require meter readings.

Please don't hesitate to contact us if you have any questions.

Carol Wright, COO
Jackson Energy

Stakeholders,

Attached is the revised language that was discussed at the meeting today.

Please note that this language may change based upon the discussions at the meeting.
