

COMMONWEALTH OF KENTUCKY
BEFORE THE UTILITY REGULATORY COMMISSION

* * * * *

In the Matter of:

ADJUSTMENT OF RATES OF GENERAL)
TELEPHONE COMPANY OF KENTUCKY,) CASE NO. 7669
INC.)

O R D E R

On November 27, 1979, General Telephone of Kentucky (Company) filed its Notice with this Commission wherein it proposed to increase its intrastate telephone rates and charges by \$16,289,000 annually to become effective on and after December 17, 1979. In order to determine the reasonableness of the proposed increase the Commission, by Order dated November 27, 1979, suspended the proposed rates for a period of five months on and after the effective date.

The following parties of interest were granted intervention: the Attorney General's Division of Consumer Intervention; Interconnect Telecommunications Systems, Inc.; the Kentucky Interconnect Association; the University of Kentucky; the Commonwealth of Kentucky's Department of Finance; and Sidney R. Marshall, Jr. Hearings were conducted by the Commission on December 19, 1979, January 9, 1980, January 23, 1980, March 4, 1980, and April 15, 1980.

All briefs were filed with the Commission on May 9, 1980. The entire record, including the Company's responses to numerous requests for additional information was then submitted to the Commission for final determination.

TEST PERIOD

The twelve months ending August 31, 1979, has been used as the test year in this matter for purposes of determining the reasonableness of the rates and charges proposed herein. In accordance with Commission policy, pro-forma adjustments have been included when found appropriate.

VALUATION METHODS

Net Investment

The Company introduced an adjusted intrastate Net Investment rate base of \$229,590,928¹ as of the end of the test period.

¹Marler Exhibit 2.

The Commission generally agrees with the Company's proposed rate base with the following exceptions outlined below:

1. Known Adjustment to Telephone Plant:

General Telephone proposed an adjustment to its August 31, 1979, investment in telephone operations of \$14,716,471,² the intrastate portion of which is \$10,904,406, to reflect what it termed, "known contractual additions to telephone plant and the depreciation associated with these additions."³ The Company, moreover, made the corollary adjustment to reflect the increased capital associated with this investment and further proposed to reflect the annual depreciation expense, property taxes and the toll settlement revenue related to the toll portion of these assets as adjustments to its Income Statement.

The Commission has carefully reviewed the evidence with respect to the inclusion of these out-of-period additions to investment and capital. Although the Company has proposed to include the toll settlement revenue that will increase as a result of the additional investment in toll plant, the Company has made no adjustment to quantify the effects on local service revenue and on operating expenses resulting from these capital additions. Since the end of period levels of local service revenue and operating expenses were not adjusted to reflect the effects of these capital additions, the Commission concludes that the adjustment to investment for ongoing additions to plant may have the effect of distorting the test period level of earnings. Therefore, these adjustments have been excluded from capital and net investment.

2. Interest During Construction (I.D.C.)

The Federal Communications Commission (F.C.C.) changed the method of accounting for interest on construction effective January 1, 1979. Primarily this change required that telephone companies could capitalize interest only on long-term projects, where prior to this change the interest on all construction had been capitalized.

The Company proposed an adjustment to its Income Statement to reduce the level of revenues associated with IDC as a result of this accounting change. However, the Company failed to make the offsetting adjustment to normalize the level of Construction Work in Progress. Company witness, Mr. Marler, agreed on cross-examination that a corresponding adjustment to Construction Work in Progress was proper. The Commission, therefore, has accepted the revenue change of \$706,501⁴, the intrastate portion being \$513,452, and made the adjustment to Construction Work in Progress accordingly.

3. Cash Working Capital

The Company proposed to include a Cash Working Capital Allowance of \$2,679,435⁵, the intrastate portion being \$2,217,607, as a component of its Net Investment rate base. The Commission has rejected this proposal in accordance with past decisions on this issue.

4. Depreciation Reserve - Lexington Toll Switch

The Company proposed an adjustment of \$400,000⁶, the intrastate portion of which is \$294,022, to its Depreciation Reserve to reflect the higher annual depreciation expense associated with its Lexington toll switch facilities. The Commission has rejected this expense adjustment, as will be discussed in another section of this Order, and, therefore, rejects the offsetting adjustment to Depreciation Reserve.

⁴Marler, Exhibit 4.

⁵Marler, Exhibit 2.

⁶Marler, Exhibits 2 and 4.

5. Prepayments:

The Commission has adjusted the level of Prepayments included in the investment calculation by \$49,118⁷, the intrastate portion being \$36,541, to reflect the thirteen month average balance in this account. It is the Commission's opinion that the August 31, 1979, balance in this account does not reflect a representative level of Prepayments.

6. Rural Upgrade Program

The Company made a final adjustment of \$6,466,643⁸ to its intrastate investment calculation to exclude the investment in upgrading four and eight party service. The Company, moreover, made similar adjustments to capital, revenues and expenses to entirely separate the effects of the Rural Upgrade Program from its other operations. The Company's position on this issue stemmed from its feelings that this program was unique and, therefore, should be afforded special or separate consideration and treatment.

The Commission did in fact recognize the urgency and necessity for improving the service to four and eight party customers in Case No. 6951, and granted the Company an additional annual revenue increase of \$2.5 million to be used for the improvement of that service. The Commission still recognizes the priority of upgrading this service and expects and encourages the Company to continue to meet its goals in this area. However, the Commission, for rate-making purposes in this case, does not consider that separate treatment is called for and, therefore, has not excluded the financial effects of this program from the Company's operations.

⁷\$500,987 - \$451,869 = \$49,118.

⁸Marler, Exhibit 2.

Therefore, the Commission finds the appropriate intrastate Net Investment rate base in this case is \$298,848,729, the intrastate portion of which is \$222,679,587, set out as follows:

Telephone Plant:

In Service	\$ 295,406,416
Under Construction	11,882,575
Held for Future Use	324,024
Acquisition Adjustment	334,078
Materials and Supplies	5,702,059
Prepayments	336,160
Subtotal	\$ 313,985,312

Less:

Depreciation Reserve	\$ 68,168,900
Unamortized Deferred Taxes	22,631,392
Unamortized Pre-Job Development	
Investment Tax Credit	505,433
Subtotal	\$ 91,305,725
Net Investment	\$ <u>222,679,587</u>

Capital Structure

The Company proposed an adjusted capital base of \$292,145,172.⁹ As discussed above, the Commission has rejected the Company's proposed adjustments for plant additions and the Rural Upgrade Program, therefore, the Commission finds that the appropriate capital base is the August 31, 1979 level of \$285,808,980.

As set out above, the intrastate portion of Net Investment is approximately 74.5%.¹⁰ As a result, that portion of capital allocated to intrastate operations would be 74.5% or \$212,963,418, the components of which are set out below:

	Amount	%
Mortgage Bonds	\$ 100,263,177	47.08
Debentures	3,684,267	1.73
Other Long Term Debt	85,185	.04
Short Term Debt	10,115,763	4.75
Preferred Stock	14,481,513	6.80
Common Equity	84,333,513	39.60
Total Capitalization	\$ <u>212,963,418</u>	<u>100.00</u>

⁹ Mason, Exhibit 2.

¹⁰ \$222,679,587 ÷ \$298,848,729 = 74.5%

As can be noted above, the Commission has allocated the Job Development Credit (JDIC) to the other capital components based on their relative weights to total capital excluding JDIC. This method is consistent with the Internal Revenue Service regulations concerning this issue and in further calculation does assign the overall cost of capital to JDIC.

The Commission is aware of other methods of valuation which were not included in the evidence of record. The Commission has, however, given due consideration to all elements of value as required by Kentucky law in determining the reasonableness of the matter herein.

REVENUES & EXPENSES

The Company introduced several pro-forma adjustments to more clearly reflect current operations.¹¹ As previously discussed, the Commission has rejected the revenue and expense adjustments related to the out-of-period plant additions and the Rural Upgrade Program. The Commission is of the opinion that the remaining adjustments are proper and have been accepted with the following exceptions:

1. End of Period Adjustments:

The Company proposed a series of adjustments to its operations to reflect the end of period price and volume of activity at that time. With the exceptions of the end of period adjustments for Other Operating Expenses and Operating Taxes, the Commission accepts the Company's adjustments as proposed. Our review of the Company's adjustments to Other Operating Expenses and Operating Taxes¹², disclosed that the Company overstated the portion of these end of period adjustments charged to expenses. The process employed by the Company in each instance was to annualize three months of total expenditures including the capitalized portion and deduct the actual amount capitalized during the test period. The remainder was then compared to the actual portion expensed during the test period. The proper method would be to bring the capitalized portion of these expenditures

¹¹Marler, Exhibit 4.

¹²Company's Response to Staff Request No. 2, Item 7(b), pages 7, 9 and 10 of 13.

to an end of period level, deduct this amount from the total annualized expenditure and then compare the end of period level charged to expense to the actual level. The Commission has, therefore, reduced these adjustments by \$304,388¹³ and \$61,583¹⁴, net of the toll settlement, respectively.

The Commission has made one additional change related to the Company's end of period adjustments. The Commission recognizes a higher level of fixed charges than the Company used in this adjustment due to the higher cost rate on short term debt. Thus the Commission has reduced the combined state toll revenues \$155,838¹⁵ more than the \$611,745 proposed by the Company.

2. Employee Concession Service:

In accordance with the findings in Case No. 6951, the Company made an adjustment of \$236,415¹⁶ to eliminate the effects of employee concession rates in its revenues. The Company further proposed to adjust expenses by this amount to reflect an increased level of employee benefits that would result from the elimination of employee concession rates. The Commission is of the opinion that the expense adjustment for increased employee benefits is improper as there is no assurance or justification to prove that management would increase benefits in the event employee concession rates were discontinued.

3. Wage Increase

General Telephone proposed to increase its end of period wages by \$1,607,996¹⁷, net of the toll settlement associated with this expense increase. This adjustment is comprised of a basic wage and salary increase to union, non-union hourly and management employees; the increase in overtime resulting from the basic wage changes; the effects of an additional holiday granted employees; and an adjustment for a management salary range change.¹⁸

¹³\$519,143 - \$214,755 = \$304,388.

¹⁴\$300,984 - \$239,401 = \$61,583.

¹⁵\$(767,583 - \$(611,745) = \$(155,838).

¹⁸Company's Response to Staff Request No. 2, 1977.

¹⁶Marler, Exhibit 4.

¹⁷IBID.

The Commission is of the opinion that the adjustment for the additional holiday and the management salary range change are improper. The adjustment for the additional holiday cost was based on "adding enough hours to make up the lost productive time¹⁹." At best this adjustment is an estimate and, moreover, it is the Commission's opinion that productivity should increase to make up the lost hours without an additional increase in expenses. The adjustment for the management salary range change has been rejected as the basic wage increase in management salaries was based on a historical factor which should include any range change incurred. Therefore, the Commission has disallowed this adjustment on the basis of double counting. The net effect of these adjustments is to reduce the total wage adjustment, as proposed by the Company, by \$162,887²⁰ to \$1,445,109.

4. Pension Increase Due to Higher Wages

The Company calculated the increase in pension benefits charged expense associated with the total basic wage increase of \$3,627,759²¹. However, the Company inadvertently failed to give effect to the portion of that increase which will be capitalized. The Commission concludes that the expensed portion of the basic wage increase was \$2,761,623²². The Commission further concludes that the increase in pension cost charged expense based on this level of wages is \$147,674, which is \$46,588²³ less than the increase claimed by the Company.

5. FICA Increase Due to Higher Wages

The Company proposed to increase Operating Taxes, net of the toll settlement by \$123,211²⁴ to reflect the FICA taxes associated with the wage increase. As previously noted, the Commission has rejected a portion of this adjustment and, therefore, the related FICA tax increase is thereby eliminated.

¹⁹IBID, page 46 of 80.

²⁰\$336,078 - \$173,191 = \$162,887.

²¹Company's Response to Staff Request No. 2, Item 8, page 56 of 80.

²²IBID, page 47 of 80.

²³\$90,080 - \$43,492 = \$46,588.

²⁴Marler Exhibit 4.

Further, the Commission finds from the detail to this adjustment that the Company again calculated this tax increase based on the total wage adjustment without giving effect to the capitalized portion of these costs.²⁵ The Commission has recalculated this adjustment based on the accepted expense portion of the wage increase and thus has reduced the Company's adjustment by \$34,053²⁶ to \$89,158, net of the settlements.

6. Depreciation Increase for Lexington Toll Switch

The Company proposed to increase the annual depreciation expense on its Lexington Toll Switch facilities by \$400,000, making the net adjustment after toll settlements \$251,097.²⁷ The Commission after careful consideration of the evidence of record on this issue has denied this adjustment. The Company offered no study or detailed support for the change in depreciation rates and it is also unclear as to whether the incompatibility of this plant with the system is an industry concern or unique to the Company.

7. Rate Case Expense

The Commission has adjusted the Company's proposed rate case expenses of \$25,860²⁸, net of toll settlements, by \$12,930²⁹, to amortize these expenses over a two year period in accordance with past policy decisions and the rate case history of the Company.

The Commission has made an additional adjustment to the Applicant's operations to reduce advertising expenses by \$56,729³⁰, the net effect after toll settlements being \$28,288³¹. The Commission finds that this advertising expense, which has been allocated from the Company's parent corporation, General Telephone and Electronics, is institutional in nature, describes services which are advertised locally and provides no benefits to the Kentucky ratepayers.

²⁵Company's Response to Staff Request No. 2, Item 8, page 57 of 80.

²⁶\$63,714 - \$29,661 = \$34,053.

²⁷Marler, Exhibit 4.

²⁸Marler, Exhibit 4.

²⁹\$25,860 ÷ 2 years = \$12,930.

³⁰Company's Response to Staff Request No. 2, Item 10.

³¹\$56,729 - \$28,441 = \$28,288.

The Commission has determined from the record that the adjusted intrastate operating income, as proposed by the Company, is \$15,749,384.³² After giving effect to the intrastate portion of the adjustments described above, and net of income taxes calculated in the manner proposed by the Company, the Commission finds that the appropriate intrastate adjusted operating income level is \$16,231,990. Kentucky State Income Taxes have been calculated using the rate approved in the 1980 legislative session effective retroactively on January 1, 1980.

RATE OF RETURN

Applicant's adjusted intrastate net operating income for the test year allowed a rate of return on Net Investment of 7.29%³³, which in the Commission's opinion is insufficient based on test year conditions. In determining the proper rate of return in this case, the Commission has considered the following factors:

- (1) The Company's Capital Structure;
- (2) Cost of debt and preferred stock; and
- (3) Cost of equity.

The Commission has used the embedded cost of long term debt and preferred stock of 7.66% and 9.50%, respectively³⁴. In supplemental testimony presented at the hearing of April 15, 1980, the Company proposed a cost rate on short-term debt of 16.91%³⁵. The Commission has used a rate of 14.0% as the cost of short-term debt, due to evidence indicating that interest rates have reached their peak and are now declining. Moreover, the Commission is of the opinion that a proper rate of return on equity in this case is 12.5%.

Thus, the overall cost of capital in this case is 10.0% which will produce net operating income of \$21,304,081. This income requirement, therefore, provides the Company the opportunity to earn a rate of return on Net Investment of 9.57%, the rate of return found reasonable in this case.

³²Marler, Exhibit 3; and Company's Response to Cross-Examination, No. 9.

³³\$16,231,990 ÷ \$222,679,587 = 7.29%.

³⁴Mason, Exhibit 10.

³⁵Mason, Exhibit 10, Supplemental.

The additional revenue required is computed as follows:

Adjusted Net Operating Income	\$ 16,231,990
Net Income Found Reasonable	21,304,081
Deficiency	<u>\$ 5,072,091</u>
Deficiency Adjusted for Taxes	<u>\$ 9,992,299³⁶</u>

The increase granted herein is therefore \$9,992,299.

COIN TELEPHONE AND DIRECTORY ASSISTANCE CHARGES

The Company has proposed to increase coin telephone charges from ten cents to twenty-five cents. The charge for this service has remained unchanged for twenty-five years. During that time, plant costs and operating expenses throughout all areas of the Company's operations have increased substantially. As a result of preserving the ten-cent rate during this period of ever increasing costs, the general ratepayers, through their monthly bills for basic telephone service, have been subsidizing the use of coin telephones. The Commission is of the opinion that an increase in coin telephone charges is an appropriate means of allocating a portion of the costs of this specific service to those for whom it is incurred. It has, therefore, approved the Applicant's proposed coin telephone charge of twenty-five cents.

In addition the Company has proposed to institute a charge for directory assistance service. The directory assistance proposal as presented by the Applicant provides the following principal features:

(1) Each subscriber will receive a five call directory assistance allowance and get up to two numbers per call.

(2) Each subscriber shall be allowed one intrastate long distance directory assistance call for each sent paid intrastate message toll call appearing on the subscriber's bill.

(3) Any unused portion of an allowance for local directory assistance calls may be applied to reduce the number of chargeable long distance directory assistance calls.

(4) A \$.20 charge for each directory assistance call to local or intrastate long distance in excess of the five call allowance. A \$.20 surcharge is applicable to all calls connected to long distance directory assistance by the "0" operator provided that the "0" operator is not the only source for long distance directory assistance.

³⁶\$5,072,091 ÷ (1.0 - .4924) = \$9,992,299.

This plan is comparable to that approved by the Commission in Case No. 6924 for use by South Central Bell Telephone Company.

The Commission is of the opinion that charges for directory assistance inquiries are a fair method of reducing the vast number of unnecessary calls that are made for information that is readily available on an ongoing basis and of allowing those using the service excessively to pay accordingly. The Commission has, therefore, approved the Applicant's proposed plan for directory assistance charges to begin on the date of this Order.

FINDINGS AND ORDER

The Commission after consideration of all the foregoing and all other evidence of record and being advised, FINDS:

- (1) That the rates proposed by the Company are unjust, unfair and unreasonable in that they produce revenues in excess of the revenues necessary to produce a reasonable return on the Applicant's investment.
- (2) That the Rate Schedules attached as Appendix "A" hereto are fair, just and reasonable and further that such rates are equitable and nondiscriminatory as between customers and classes of customers and should be approved.
- (3) That the Commission, after study and investigation, finds the rates for competitive services proposed by the Applicant and set out in Appendix "A" are compensatory and reasonable and should be approved.
- (4) That all other provisions concerning construction and reporting contained in the Order of Case No. 6951 are still in force and effect.

IT IS THEREFORE ORDERED that the proposed Schedule of Rates for intrastate service as set forth in the Company's Notice of November 27, 1979, be and the same are hereby denied.

IT IS FURTHER ORDERED that effective with the date of this Order, General Telephone Company of Kentucky is hereby authorized to place in effect the Schedule of Rates set out in Appendix "A" attached hereto and made a part hereof.

IT IS FURTHER ORDERED that within twenty (20) days of the date of this Order, the Company shall file its tariffs with the Commission which will produce \$99,444,393 based on the station development at August 31, 1979.

Done at Frankfort, Kentucky, this the 16th day of May, 1980.

*Business rural rates apply to existing business four-party service.

The above rates for basic local exchange service are related to the total number of main stations including Centrex main stations, PBX main stations (where Direct Inward Dialing is provided) and PBX trunks (where Direct Inward Dialing is not provided) in the local calling area.

BASIC LOCAL EXCHANGE RATE SCHEDULE (Continued)

Semi-Public	50% of Business 1-Party
Key Telephone Trunk	125% of Applicable 1-Party Rate
PBX Trunk	200% of Applicable 1-Party Rate

LOCAL DIRECTORY ASSISTANCE SERVICE

In addition to providing telephone directories to all local exchange service customers, the Company furnishes Local Directory Assistance service whereby customers may obtain assistance in determining telephone numbers.

The rates and allowances set forth below apply to customer requests for Directory Assistance service in determining or attempting to determine the telephone number of any party located in, or thought to be located in, the local calling area.

Application of Charges and Allowances

The charges specified in "Rates", following, will be applicable to all customers, except:

Public and Semi-public Coin Telephone users;

Hotel/Motel guests and Hospital patients; (1)

Customers who have been certified by a physician or appropriate agency as unable to use a telephone directory because of a visual or physical handicap.

Customers served by an out of state Directory Assistance Bureau. This exemption shall terminate for each of these areas as facilities and associated operator assistance become available.

Chargeable Calls

For charging purposes a call to Local Directory Assistance is defined as a call:

Resulting in obtaining a maximum of two telephone numbers, or

Resulting in obtaining no telephone number because there was no such listing or there was a non-published (private) listing.

- (1) Hotel, motel and hospital accounts will be exempted until facilities are available to identify guest and patient calls from administrative calls.

There will be an allowance of five calls per billable month at no charge for each basic local exchange main telephone, Key or PBX trunk, ETSX telephone, main mobile telephone, and nondormitory main Centrex. For Dormitory Centrex Service, the allowance applies to each dormitory main station number. Call allowances are not transferable between separate accounts, even for the same customer.

Any unused portion of the monthly allowance described above will not be credited to the customer's account in any other month service is rendered.

There will be a charge for all customer calls to Local Directory Assistance, except as specified above.

Rates

A charge of \$.20 will apply for each Local Directory Assistance call in excess of the allowance.

A surcharge of \$.20 will be applicable to all calls connected to Local Directory Assistance by the "0" operator, provided that the "0" operator is not the only source for Local Directory Assistance.

Note:

Intrastate Long Distance Directory Assistance Services will be administered in accordance with South Central Bell Telephone

PUBLIC TELEPHONE SERVICE

MESSAGE CHARGES

Local messages from public telephones are charged for at \$.25 (1) each, and toll messages at the Company's established toll rates.

SEMI-PUBLIC TELEPHONE SERVICE

CHARGES

Local messages are charged for at the rate of \$.25 (1) each. Toll messages are charged for at the established long distance telephone rates. No commissions are paid on message receipts.

SERVICE CHARGES

Line Reconnection Charge

Applicable to restoring service following a denial of such service.

Wiring Charge

Applicable for work done to install, extend, or move wiring and any associated connecting apparatus or miscellaneous equipment such as extension bells, gongs, buzzers, horns, switches, wiring plans auxiliary receivers, etc.

Premises Visit Charge

Applicable if an employee visits the customer's premises and completes requested work.

Change Charge

Applicable for work done at the customer premises in changing a telephone or other terminal equipment.

Cord Charge

Charges listed are applicable for each non-standard line or handset cord, available from stock, requested by a customer. Cords requiring special ordering will be billed for based upon the costs involved.

Maintenance of Service Charge

A Maintenance of Service Charge is a nonrecurring charge applicable for work done by the Company when it is determined that the service difficulty was due to a condition in a customer-provided terminal or communication system which is arranged for connection to Company facilities.

Service charges are not applicable to changes in grade of basic exchange service.

Residence customers furnished Key or PBX equipment are subject to the appropriate Key or PBX service charges.

Service charges do not apply when the service is assumed by a receiver or trustee, executor or administrator of an estate of the former customer.

No duplication of service charges is made when, owing to the lack of standard equipment specified on an applicant's or customer's order, installation of other standard equipment is made with the customer's consent in order to provide service.

When service is reestablished at a location which has been destroyed or made untenable by fire, wind, or flood, or if, due to the same reasons, the customer desires service at a new location for a temporary period, service charges will not apply. However, when reestablishing service which was temporarily relocated, service charges will apply.

DEFINITIONS

Customer Request

The term "Customer Request" as used in conjunction with Service Ordering Charges means all work or service ordered by one customer to be performed or provided at the same time on the same premises on the same system. Where both business and residence service is furnished on the same premises, "Customer Request" treatment is applicable separately for each service. When more than one service ordering charge applies at the same time on the same premises, only one premises visit charge is applicable.

APPLICATION OF CHARGES

Service Ordering Charge

One supersedure service ordering charge is applicable when service is assumed by a customer prior to discontinuance by another customer and there is no change of telephone number.

Line Connection Charge

When telephone numbers have been reserved for future use, one line connection charge per line will apply at the time the numbers are placed in service.

Line Reconnection Charge

In the event service is temporarily suspended for nonpayment such service will be restored upon payment of charges due, or at the discretion of the Company a substantial portion thereof. One line reconnection charge applies for restoral.

Premises Visit Charge

When more than one service ordering charge applies at the same time at the same premises, only one premises visit charge is applicable. (See definition of Customer Request, preceding.)

On an order where the preinstalled wiring charge is applicable, no premises visit charge is made for installing the jacks; however, if any customer requested work is done at the same time, the visit charge will apply.

Preinstalled Wiring - Commercial

Preinstallation of wire and/or cable in commercial buildings is provided as a service to the owner and future occupants of the building. In the event the occupant of the building or portions thereof chooses a customer provided telephone system, the Company will sell such wiring as may be involved at cost plus 20 percent. In the event the occupant refuses to pay for such preinstalled wiring, the Company reserves the right to remove same or bill it to the building owner.

Change Charge

One change charge is applicable for each telephone instrument or other terminal equipment changed on the customer premises (see "Change" definition preceding.)

Change charges are not applicable to single line business and residence customers.

Change charges are not applicable to stations associated with contract or non-contract Vintage Plans provided there are specific nonrecurring charges for this activity listed in the Vintage Tariffs.

Cord Charge

One cord charge is applicable for each non-standard line cord or handset cord requested by the customer.

One cord charge is applicable for each non-standard cord replaced or changed at the request of the customer.

Maintenance of Service Charge

The customer shall be responsible for the payment of Company charges for work done by the Company when a service difficulty or trouble report results from customer-provided equipment facilities.

Charges

Except as provided above, the following Service Charges apply in addition to all other applicable rates and charges associated with the service being provided:

	<u>Single Line Business or Residence (1)</u>	<u>Key, PBX, ETSX, Trunks, Tie Lines, Centrex</u>
Service Ordering		
Initial Order, each	\$ 8.00	\$10.00
Subsequent Order, each	5.00	8.00
Supersedure Order, each	15.00	20.00
Line Connection, each	8.00	13.00
Line Reconnection, each	15.00	20.00
Premises Visit	15.00	20.00
Wiring Charge (2)		
Standard Wiring, per termination	7.00	12.00
Preinstalled Wiring, per order (Maximum 4 outlets)	30.00	-
Each additional outlet, same order	5.00	-
Change Charge, per station	-	5.00
Cord Charge		
Non-Standard Line or Handset Cords, up to 15 feet, each	4.00	4.00
15 to 25 feet, each	5.25	5.25
Maintenance of Service Charge	30.00	30.00
Deposit (per portable telephone)	17.00	-
Customer may acknowledge liability by contract providing credit is acceptable.		

1. Single Line Service Charges are applicable for Intrastate Wide Area Telecommunications Service (WATS), Mobile Telephone Services, Personal Signaling (Paging) Services and Data Equipment Services.
2. Wiring charges consider use of standard single line jacks as terminations. See "Jack Equipment and Adapters" elsewhere in this tariff for other jack charges.

BULK RATING OF SERVICE CHARGES

Service charges as well as other applicable nonrecurring charges associated with the service being provided, may be bulk rated in accordance with the following:

To qualify, each customer request for station installations, inside moves or changes (or a combination of inside moves and changes) must exceed 10 stations, be associated with the same system on the same premises, and carry the same requested completion date for all stations on that order.

<u>No. of Stations</u>	<u>Rate</u>
1 to 10	Basic
Over 10	Basic filed rate less 25%, each

Extension telephones, each		.85	.85
Restricted telephones, each		3.65	3.65

GENERAL RULES AND REGULATIONS

PAYMENT FOR SERVICES AND FACILITIES

PAYMENT FOR SERVICE

An administrative charge of \$5.00 will be applied by the Company for each time a check or bank draft is returned by a bank to the Company for the reason of insufficient funds. The Company may refuse to accept checks for payment of service where checks have previously been dishonored or where credit rating is unsatisfactory.

DIRECTORY LISTINGS

NON-PUBLISHED TELEPHONE NUMBERS

Non-published Telephone Numbers - Under this arrangement the name, address, and telephone number is not available to the public as a listing in the directory, and does not appear on the information records of the Telephone Company. The charge for each non-published telephone number is \$1.50 per month.

EXTENSION STATIONS

RATES

The monthly rate for business or residence extension telephones is \$.85 per month.

OFF PREMISES EXTENSION STATIONS

RATES

The appropriate station rates apply for intraexchange service in addition to mileage charges and where applicable, line conditioning charges.

	<u>Monthly Rate</u>
