O R D E R

On April 17, 1984, the Commission entered an Order granting the Warren County Water District ("Warren") a certificate of public convenience and necessity for a waterworks improvement project. The Order also approved the financing for the project.

On November 14, 1984, Warren filed an engineering report, hydraulic analysis and supplemental information for additional waterworks improvements. Warren requested approval to construct these improvements, which consist of installing approximately 3 miles of 10- and 8-inch water line, existing pump station improvements, and the installation of two additional pump stations. These improvements should strengthen the hydraulic capability of the water distribution system. Warren filed construction plans for

the additional improvements on April 8, 1985. Additional information was also filed on May 1, 1985.

Warren has proposed to finance the additional improvements from funds remaining from the recent improvement project which was approved by the Commission's Order of April 17, 1984, and from its Depreciation Fund.

The Commission, after considering all supplemental information and being advised, is of the opinion and finds that:

1. Public convenience and necessity require that the construction proposed in the supplemental information be performed and that a certificate of public convenience and necessity be granted.

2. The financing plan for the supplemental work should be approved.

3. The Commission's Order entered April 17, 1984, should be affirmed in all other respects.
