

COMMONWEALTH OF KENTUCKY  
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF THE WEBSTER COUNTY )  
FISCAL COURT FOR A CERTIFICATE OF ) CASE NO. 94-044  
PUBLIC CONVENIENCE TO CONSTRUCT A )  
SEWER COLLECTION SYSTEM )

O R D E R

IT IS ORDERED that Webster County Fiscal Court ("Webster") shall file the original and 10 copies (two copies of engineering-related materials) of the following information with the Commission with a copy to all parties of record within 14 days from the date of this Order. Webster shall furnish with each response the name of the witness who will be available at the public hearing, if one is held, for responding to questions concerning each item of information requested.

1. The financial information filed with the original application indicates that the total project cost is \$2,015,000. Webster proposed to finance this cost with a \$1,270,000 loan from the Kentucky Infrastructure Authority and a \$745,000 Community Development Block Grant. Information filed on April 1, 1994 indicates that the total project cost is \$2,360,792. Based on the above, clarify which total project cost is correct and how the correct total project cost is to be funded. Also provide the appropriate funding agency documentation including an amortization schedule.

2. Force Main No. 1 has both peaks and valleys in its present piping layout. The first peak appears to be the highest encountered and the subsequent valley has a steep gradient falling away. Both of these conditions could affect the operation of Pump Station No. 1.

Based on the above, provide the calculations utilized in designing Force Main No. 1 and selecting Pump Station No. 1. Include the various operating conditions expected to be encountered during normal operation. Describe how Pump Station No. 1 is expected to operate. (Any engineering information filed in response to this Order which is prepared and filed by a registered Professional Engineer, should include the engineer's seal, signature and date as required by KRS 322.)

3. Are the rates listed on page 8 of the application the rates which Webster proposes to charge?

4. How will the water usage for each customer be obtained for billing purposes?

5. What is the monthly water consumption of the Webster County School Complex for the year ended 1993?

6. What is the 1993 average monthly water consumption for a non-residential facility, excluding schools?

7. What is the 1993 average monthly water consumption for a residence?

8. Is most of the water used by residences for household purposes or for agricultural and gardening purposes?

Done at Frankfort, Kentucky, this 13th day of May, 1994.
