A PERSONAL COMMUNICATIONS SERVICES	)	
FACILITY IN THE B-263 BASIC TRADING AREA	)	
(THE L-KY-056-010 FACILITY)	)	

O R D E R

On September 9, 1998, Powertel/Kentucky, Inc. ("Powertel") filed an application seeking a Certificate of Public Convenience and Necessity to construct and operate a wireless telecommunications facility. The proposed facility consists of a monopole antenna tower not to exceed 105 feet in height, with attached antennas, to be located at 5025 Shelbyville Road, Louisville, Jefferson County, Kentucky. The coordinates for the proposed facility are North Latitude 38° 15' 9.00" by West Longitude 85° 37' 12.13".

Powertel has provided information regarding the structure of the tower, safety measures, and antenna design criteria for the proposed facility. Based upon the application, the design of the tower and foundation conforms to applicable nationally recognized building standards, and the plans have been certified by a Registered Professional Engineer.

Pursuant to KRS 278.650(1), Powertel has submitted a proposal to construct a wireless telecommunications facility to the Louisville and Jefferson County Planning

Commission ("Planning Commission"). The proposal was approved by the Planning Commission. Powertel has filed applications with the Federal Aviation Administration ("FAA") and the Kentucky Airport Zoning Commission ("KAZC") seeking approval for the construction and operation of the proposed facility. Both the FAA and KAZC determined that approvals for the proposed construction were not required.

Powertel has filed notices verifying that each person who owns property within 500 feet of the proposed facility has been notified of the pending construction. The notice solicited any comments and informed the property owners of their right to request intervention. In addition, notice of the proposed construction has been posted in a visible location for at least two weeks after filing the application. To date, no comments have been filed with the Commission.

Pursuant to KRS 278.280, the Commission is required to determine proper practices to be observed when it finds, upon complaint or on its own motion, that the facilities of any utility subject to its jurisdiction are unreasonable, unsafe, improper, or insufficient. To assist the Commission in its efforts to comply with this mandate, Powertel should notify the Commission if it does not use this antenna tower to provide service in the manner set out in its application and this Order. Upon receipt of such notice, the Commission may, on its own motion, institute proceedings to consider the proper practices, including removal of the unused antenna tower, which should be observed by Powertel.

The Commission, having considered the evidence of record and being otherwise sufficiently advised, finds that Powertel should be granted a Certificate of Public Convenience and Necessity to construct the proposed facility.

IT IS THEREFORE ORDERED that:

1. Powertel is granted a Certificate of Public Convenience and Necessity to construct a monopole antenna tower not to exceed 105 feet in height, with attached antennas, to be located at 5025 Shelbyville Road, Louisville, Jefferson County, Kentucky. The coordinates for the proposed facility are North Latitude 38° 15' 9.00" by West Longitude 85° 37' 12.13".

2. Powertel shall immediately notify the Commission in writing, if, after the antenna tower is built and utility service is commenced, the tower is not used for a period of 3 months in the manner authorized by this Order.

Done at Frankfort, Kentucky, this 13th day of November, 1998.
