O R D E R

BellSouth Telecommunications, Inc. ( BellSouth ) seeks clarification of the Commission s December 18, 2002 Order in this proceeding. Therein, the Commission determined that Computer Innovations, LLC ( Computer Innovations ) and Hopkinsville Electric, two customers of BellSouth, appear to be similarly situated customers, but were receiving different rates for primary rate interface ( PRI ) service. The Commission ordered BellSouth to make PRI service available to Computer Innovations at a price no greater than \$650 per month to be effective as of the date Computer Innovations had PRIs installed.

BellSouth asks for clarification regarding whether the Commission intended that PRI services be provided to Computer Innovations on the same contract terms and conditions as specified in BellSouth s contract with Hopkinsville Electric or whether the Commission intended that only the rate of a maximum of \$650 per month be adopted.

The Commission clarifies its Order to state that the issue in the case involved the rate and not the applicability of other terms and conditions of the Hopkinsville Electric contract.

Thus, the Commission having been sufficiently advised, HEREBY ORDERS that BellSouth's motion is hereby granted to the extent of clarifying that the December 18, 2002 Order intended only to require that the rate contained in the Hopkinsville Electric contract be made available to Computer Innovations as specified herein.

Done at Frankfort, Kentucky, this 28<sup>th</sup> day of January, 2003.

By the Commission
