

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

PETITION OF AMERICAN CELLULAR)
CORPORATION PETITION FOR)
DESIGNATION AS AN ELIGIBLE) CASE NO. 2005-00130
TELECOMMUNICATIONS CARRIER)
PURSUANT TO SECTION 214(E) OF THE)
TELECOMMUNICATIONS ACT)

O R D E R

On March 29, 2005, American Cellular Corporation (“ACC”) filed an application seeking Eligible Telecommunications Carrier (“ETC”) status within the territory of which it is licensed to operate.

The Commission set a procedural schedule in this case that allowed for public comments, data requests, and requests for a hearing. No comments on the application have been filed and no request for hearing has been made.

Discussion

47 U.S.C. § 254(e) provides that “only an eligible telecommunications carrier designated under Section 214(e) shall be eligible to receive specific Federal universal service support.” Pursuant to Section 214(e)(1), a common carrier designated as an ETC must offer and advertise the services supported by the federal universal service mechanisms throughout the designated service area.

Section 214(e)(2) of the Act provides state commissions with the primary responsibility for performing ETC designations. Under Section 214(e)(6), the Commission may, with respect to an area served by a rural telephone company, and shall, in all other cases, designate more than one common carrier as an ETC for a

designated service area, consistent with the public interest, convenience, and necessity, so long as the requesting carrier meets the requirements of Section 214(e)(1). Before designating an additional ETC for an area served by a rural telephone company, the Commission must determine that the designation is in the public interest.¹

An ETC petition must contain the following: (1) a certification that the petitioner offers or intends to offer all services designated for support by the Commission pursuant to Section 254(c); (2) a certification that the petitioner offers or intends to offer the supported services “either using its own facilities or a combination of its own facilities and resale of another carrier’s services”; (3) a description of how the petitioner “advertise[s] the availability of [supported] services and the charges therefore using media of general distribution”; and (4) if the petitioner meets the definition of a “rural telephone company” pursuant to Section 3(37) of the Act, the petitioner must identify its study area, or, if the petitioner is not a rural telephone company, it must include a detailed description of the geographic service area for which it requests an ETC designation from the Commission.

Offering the Services Designated for Support

ACC has demonstrated through the required certifications and related filings that it now offers, or will offer upon designation as an ETC, the services supported by the federal universal service mechanism. As noted in its petition, ACC is authorized to provide cellular mobile radiotelephone service (“CMRS”). ACC certifies that it now provides or will provide throughout its designated service area the services and

¹ 47 U.S.C. § 214(e)(6).

functionalities enumerated in Section 54.101(a) of the Federal Communications Commission's ("FCC") rules. ACC has also certified that, in compliance with Section 54.405, it will make available and advertise Lifeline service to qualifying low-income consumers.

Offering the Supported Services Using a Carrier's Own Facilities

ACC states that it intends to provide the supported services using its existing network infrastructure. ACC currently provides the service using its facilities-based digital network infrastructure and licensed CMRS spectrum in Kentucky.

The Commission finds that ACC has demonstrated that it satisfies the requirement of Section 214(e)(1)(A) that it offer the supported services using either its own facilities or a combination of its own facilities and resale of another carrier's services.

Advertising Supported Services

ACC has demonstrated that it satisfies the requirement of Section 214(e)(1)(B) to advertise the availability of the supported services and the charges therefore using media of general distribution. In its petition, ACC states that it currently advertises the availability of its services, and will do so for each of the supported services on a regular basis, in newspapers, magazines, television, and radio in accordance with Section 54.201(d)(2) of the FCC's rules.

Non-Rural Study Areas

The FCC previously has found designation of additional ETCs in areas served by non-rural telephone companies to be *per se* in the public interest based upon a demonstration that the requesting carrier complies with the statutory eligibility

obligations of Section 214(e)(1) of the Act.² The Commission finds that ACC's public interest showing here is sufficient, based on the detailed commitments ACC has made to ensure that it provides high quality service throughout the proposed rural and non-rural service areas; that is, if ACC has satisfied the more rigorous public interest analysis for the rural study areas, it follows that its commitments satisfy the public interest requirements for non-rural areas.

Rural Study Areas

In considering whether designation of ACC as an ETC in areas served by rural telephone companies will serve the public interest, the Commission must consider whether the benefits of an additional ETC in such study areas outweigh any potential harm. In determining whether designation of a competitive ETC in a rural telephone company's service area is in the public interest, the Commission must weigh the benefits of increased competitive choice, the impact of the designation on the universal service fund, the unique advantages and disadvantages of the competitor's service offering, any commitments made regarding quality of telephone service, and the competitive ETC's ability to satisfy its obligation to serve the designated service areas within a reasonable time frame.

The Commission finds that ACC's universal service offering will provide a variety of benefits to customers. For instance, ACC has committed to provide customers access to telecommunications and data services where they do not have access to a

wireline telephone. In addition, the mobility of ACC's wireless service will provide benefits such as access to emergency services that can mitigate the unique risks of geographic isolation associated with living in rural communities. Moreover, ACC states that it offers larger local calling areas than those of the incumbent LECs it competes against, which could result in fewer toll charges for ACC's customers.

Public Interest Analysis

In determining whether the public interest is served, the burden of proof is upon the ETC applicant.³ ACC asserts that granting ETC designation to ACC will provide rural consumers the benefits of competition through increased choices and further the deployment of new telecommunications services. They also assert that granting the request will not harm consumers. ACC has satisfied the burden of proof in establishing that its universal service offering in this area will provide benefits to rural consumers.

Designated Service Areas

The Commission finds that ACC should be certified as an ETC in the requested service areas served by non-rural telephone companies, as listed in application. The Commission also finds that ACC should be certified as an ETC in the requested service areas served by rural telephone companies, as listed in the application. However, ACC's service area for each rural telephone company does not encompass the entire study area of each rural telephone company. Therefore the study areas of the affected rural carriers must be redefined to smaller study areas such that they will correspond to the wireless carrier's service area. The Commission finds that the study areas of the

affected rural telephone companies should be redefined as necessary to match the licensed service area of the applicant. ACC should petition the FCC for concurrence.

Regulatory Oversight

In addition to its annual certification filing under Sections 54.513 and 54.314 NPCR, Inc. d/b/a Nextel Partners, the first wireless carrier to qualify as an ETC agreed to submit records and documentation on an annual basis detailing: (1) its progress towards meeting its build-out plans; (2) the number of complaints per 1,000 handsets; and (3) information detailing how many requests for service from potential customers were unfulfilled for the past year.⁴ The Commission finds that ACC should be required to file this information and make any other information as it relates to service available to the Commission.

IT IS THEREFORE ORDERED that:

1. ACC shall be designated an ETC in the geographic areas requested and as listed in Appendix A, attached hereto and incorporated herein.
2. ACC shall offer universal support services to consumers in its service area.
3. ACC shall offer these services using its own facilities or a combination of its own facilities and resale of another carrier's services, including services offered by another.
4. ACC shall advertise the availability of and charges for these services using media of general distribution.

⁴ Case No. 2003-00143, Petition of NPCR, Inc. D/B/A Nextel Partners for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Kentucky, (December 16, 2004).

5. ACC is hereby certified as complying with the FCC's criteria, in accordance with 47 U.S.C. § 254(e), and therefore eligible to receive Universal Service Fund support for the current certification period.

6. By September 1, 2006, and each September 1 thereafter, ACC shall make its annual certification filing in Administrative Case No. 381⁵ and shall submit additional records as described herein.

7. ACC shall file with the Commission a copy of its petition to the FCC seeking concurrence in redefinition of the service areas of the rural companies.

8. A copy of this Order shall be served upon the FCC and the Universal Service Administration Company.

Done at Frankfort, Kentucky, this 15th day of August, 2005.
