I am single 68 and live on a disability pension. About 4 years ago I bought my house and over the past 3 years I have spent approximately \$10,000 making my house energy efficient. I had energy efficient double pane replacement windows installed, 4 new storm doors, new energy efficient water heater, refrigerator, kitchen range, dish washer, washer & dryer. New energy efficient gas furnace and central air unit. I also had 1 foot of fiberglass insulation blown into the attic. I do laundry once a week with cold water and never use the automatic dish washer more than once a week. My home is a 3 bedroom 2 bath brick with a basement which I don't heat. My house is so energy efficient that my Delta natural gas bill averages \$73.00 per month. My complaint concerning Kentucky Utilities is that my electric bill in November 2009 was \$103.45 and December 2009 was \$111.13 but in January 2010 my electric bill doubled to \$224.69 for no known reason as nothing electrical has changed at my house. I talked to KU three times without any resolution. I would like a reasonable explanation why my January KU bill doubled and a adjustment on my January 2010 KU bill and any future overcharges.

Thank You,
Charles S. Carter Jr.
