

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

1. Please provide the total number of water service meters assigned to Lexington as a customer in the base period and in the forecasted test period, and the total revenue requirement assigned to Lexington as a customer in the base period and the forecasted test period.

Response:

As of March 9, 2016, LFUCG has 204 metered water service accounts. No adjustments were made to the LFUCG accounts in arriving at the forecasted test year billing determinants.

The revenue requirement is assigned to the total customer class using billing determinants and usage as a class, not on an individual customer basis.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

2. Under how many different types of customer rate classes does Lexington currently make payments to KAWC? For each type of class, please provide the following information:
- (a) The type of customer rate class;
 - (b) The number of accounts in each such class;
 - (c) Whether such accounts are metered;
 - (d) The account numbers for each separate account;
 - (e) The physical location, by street address, GPS marker (or other easily understood designation) of each separate account;
 - (f) The basis and explanation for treating the account as a separate account, whether it is because it is separately metered or otherwise;
 - (g) The total amount paid by Lexington to KAWC for the provision of water for each of its separate accounts for each year, going back the inception of KAWC's last approved rate increase; and
 - (h) The total net projected impact for each such class under the proposed rate increase.

Response:

- (a-e) See the attachment.
- (b) 5 Residential, 199 OPA, 34 Private Fire, 3 Public Fire
- (c) All accounts except fire service accounts are metered.
- (d) Due to privacy concerns and after discussion with LFUCG counsel, KAW is not filing account information in response to this question.
- (e) See attachment referenced above.
- (f) A separate account is determined by the existence of a service line and meter to serve a specific location.
- (g) See attachment referenced above.
- (h) Please see Exhibit 37, Schedule M, page 7 of 13 for percentage increase by customer class.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: **Kevin N. Rogers**

- 3.** Does KAWC believe that the filing and/or proposed rate increases will in any way change the types of services for which it pays franchise fees to Lexington? If so, please explain.

Response:

No.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

- 4.** Does the franchise fee assessed by Lexington currently apply to public fire hydrants? If so, will the franchise fee apply to the proposed Qualified Infrastructure Program (QIP)?

Response:

Yes, the franchise fee currently applies to public fire hydrants. KAWC believes that the franchise fee will apply to all revenues received under the proposed QIP.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

- 5.** Please list all of the tariffs applicable to the use or consumption of water in Fayette County for which KAWC does not currently pay Lexington a franchise fee.

Response:

The current Franchise Agreement (Resolution No. 21-2016) provides in Section 19 (a) that the company pay a franchise fee of 3% of the "gross revenues" as defined in Section 19 (b), with an exception for nonrecurring charges. Section 19 (b) states that, "Gross Revenues," for purposes of this Ordinance, shall include all revenues received from customers in Fayette County from the sale of water, service charges based upon the size of facilities, municipal fire connections and hydrants, private fire connections and hydrants, temporary service connections for construction purposes, reconnection charges, returned check charges, service line inspection fees, and bulk sales to customers in Fayette County."

The Company has an Application Fee and Late Payment Fee in its tariffs that are not subject to the Franchise Fee. These are nonrecurring fees not expressly mentioned in the definition of "gross revenues" above.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: **Nick O. Rowe/Linda C. Bridwell**

6. Is KAWC amenable to modifying the existing franchise fee tariff for public fire hydrants?

Response:

KAWC is amenable to any discussions that the LFUCG would like to have concerning franchise fees and public fire hydrants.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

7. Does KAWC or any other American Water Company subsidiary have a tariff, contract or other arrangement under which the costs related to public fire hydrants are passed through to one or more of the other customer classes? If so, please list the name of the jurisdiction and provide the details of the arrangement, including any relevant supporting documents.

Response:

Illinois – See attachment for public fire protection service charges for one area of the state that is demonstrative of the state.

Indiana – Public fire protection is paid by the respective municipalities via a hydrant charge that is billed per hydrant located within the municipality. Indiana Code subsection 8-1-2-103(d) provides for the payment of fire hydrant rental costs imposed by a utility (such as Indiana American Water Company) and approved by the Indiana Utility Regulatory Commission (“IURC”) from the ratepayers of Indiana American Water rather than the municipality via a fire protection surcharge. A fire protection surcharge can be set in place once the municipality approves an ordinance ordering that the municipal hydrant charge be passed on to the ratepayers via a fire protection surcharge. Upon approval of the ordinance, the utility determines a fire protection surcharge equal to the elimination of the respective hydrant charge divided by the number of 5/8 inch meter equivalents served within the municipal boundaries, and files a Petition with the IURC for approval of the new fire protection surcharge. Upon completion of the next general rate case, the fire protection surcharge for the municipality is rolled into the single tariff fire protection surcharge rate for all applicable customers. See attachment for Tariff No. W-20-A, Second Revised Page 6 of 9, which is the current Public Fire Hydrant and Public Fire Protection Surcharge tariff that is in effect as approved by the IURC for Indiana American Water Company.

Kentucky -- Customers in Georgetown have a hydrant surcharge added to their bill that is provided to the City of Georgetown, which they utilize to pay their public fire hydrant charges.

Missouri – Public fire protection is included in base rates.

Tennessee - Public fire protection is included in base rates.

Iowa – Public fire protection is included in base rates.

California – Public fire protection is included in base rates.

West Virginia – Public fire protection is included in base rates.

SCHEDULE OF RATES AND CHARGES

CLASSIFICATION OF SERVICE
PUBLIC FIRE SERVICE FOR METERED GENERAL WATER SERVICE

Section 9-223 of "The Public Utilities Act", as amended, authorizes a water utility to recover a charge for fire protection services from municipalities and fire protection districts only when provided for in a separate agreement between the municipality or the fire protection district and the utility. Public Fire Service Charges for the indicated municipalities and fire protection districts within the indicated District of the Company are listed below:

Available For

Public Fire Service in the areas indicated, except where service is provided under the Standard Private Fire Service Agreement included in the Company's Rules and Regulations.

Monthly Charges

All Metered General Water Service Customers located in a municipality or fire protection district in which public fire hydrants are connected to the Company's water mains shall pay a monthly Public Fire Service Charge in the amount as set forth below, such charge being in addition to the rates and charges set forth elsewhere in the tariffs for Metered General Water Service.

FIRE SERVICE

PUBLIC FIRE HYDRANTS

Each municipality or governmental entity responsible for public fire service in the areas listed below shall pay for each public fire hydrant within its boundaries.

Monthly surcharge per hydrant: \$66.50

Where applicable: Clarksville, Seymour, and Summitville.

PUBLIC FIRE PROTECTION SURCHARGE

Applicability

Applies to all customers, with the exception of Sale for Resale customers, not located within the boundaries of the governmental entities responsible for public fire service in the areas listed in Public Fire Hydrants. Applicable to any water customer, with the exception of Sale for Resale customers, located in areas within municipal boundaries or to any water customer within 1,000 feet of a public fire hydrant (measured from the hydrant to the nearest point on the property line of the customer) on the Company's distribution mains in areas not within municipal boundaries. In addition to the charges for water service under currently approved tariffs, a public fire protection surcharge shall be charged to, and collected from, each customer to whom said surcharge is hereby made applicable. If multiple meters are installed the surcharge(s) shall be based upon the total of all meters installed.

Size of Meter	Monthly Charge- Area One and Two	West Lafayette Only
5/8"	\$ 4.78	\$ 3.35
3/4"	7.17	5.02
1"	11.94	8.37
1-1/2"	23.90	16.72
2"	38.23	26.76
3"	71.68	50.17
4"	119.47	83.62
6"	238.95	167.23
8"	382.32	267.58
10"	621.26	434.82
12"	1,027.47	719.12

Note: Unless specified rates are for all areas.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: **Linda C. Bridwell**

- 8.** Do any American Water Company subsidiaries currently have a contract under which they provide sewer billing services on behalf of a local government? If so, please provide the name of the subsidiary and local government and provide a copy of each contract.

Response:

The name of the subsidiary is Illinois-American Water Company and the name of the municipality is the City of Bolingbrook. Please see the attached.

SEWER BILLING AGREEMENT

THIS AGREEMENT is made and entered into this 25th day of July, 2002, by and between ILLINOIS-AMERICAN WATER COMPANY, a corporation organized under the laws of the State of Illinois, hereinafter referred to as the WATER COMPANY, and the VILLAGE OF BOLINGBROOK, ILLINOIS, a municipal corporation of the State of Illinois, hereinafter referred to as the VILLAGE.

WITNESSETH:

WHEREAS, the WATER COMPANY is engaged in the business of providing potable water service to the general public in, inter alia, Bolingbrook, Illinois and areas adjacent thereto; and

WHEREAS, the WATER COMPANY also provides sewer collection services in a portion of the VILLAGE and the VILLAGE provides sewer collection services in the remainder of the VILLAGE and sewer treatment services for the entire VILLAGE and each entity bills its customers for the services it provides; and

WHEREAS, the VILLAGE has requested the WATER COMPANY to perform billing and accounting for customers of the VILLAGE receiving sewer service (both collecting and treating) and the WATER COMPANY has agreed to provide said services to the VILLAGE, all pursuant to the terms and conditions contained herein;

NOW, THEREFORE, for and in consideration of the covenants contained herein, the parties hereby agree as follows:

1. (A) The VILLAGE and the WATER COMPANY shall, jointly, designate and cause to be identified on the WATER COMPANY's computer records, each customer of the WATER COMPANY who is also a sewer treatment customer, a sewer collection customer, or both a sewer collection and treatment customer of the VILLAGE (the "joint accounts"). The WATER COMPANY shall bill all joint accounts for sewer service charges on behalf of the VILLAGE, at the rates provided to it by the VILLAGE pursuant to Section 3.
- (B) Upon receipt of a written request from the VILLAGE, the WATER COMPANY shall also bill the VILLAGE's sewer service customers who are not also WATER COMPANY customers (the "sewer only customers"), if any; provided that the VILLAGE shall furnish to the WATER COMPANY such sewer service information for such customers as may be required by the WATER COMPANY for it to bill such customers for sewer service; and provided, further, that should such sewer only customers:

- (i) receive water from unmetered wells, such customers shall be billed at a flat rate for sewer service from the VILLAGE, as provided to the WATER COMPANY pursuant to Section 3 (the "flat rate");
 - (ii) receive water from a metered water system other than the WATER COMPANY's system, such customers shall be billed by the flat rate, unless the VILLAGE furnishes water meter readings for such a customer to the WATER COMPANY and requests that such customer be billed at the metered rate provided pursuant to Section 3; or
 - (iii) not receive water service from any source (e.g., a landlord whose tenants are directly responsible for their water service), the VILLAGE may request WATER COMPANY to bill such sewer only customer based upon a flat rate to be provided to the WATER COMPANY pursuant to Section 3 or, if the WATER COMPANY provides water service to its customer(s) at the same premises to which such sewer service is rendered, based upon the water use at such premises; provided the WATER COMPANY reserves the right to charge an additional fee, as may be hereafter agreed by the parties from time to time, for the service of determining the total water usage at such premises, in order to calculate such bill.
2. The WATER COMPANY shall be responsible for the sewer customer billing and accounting service for only those users of the sewer system of the VILLAGE identified pursuant to Section 1 above, and only during the term of this Agreement.
3. The VILLAGE shall, prior to the commencement of billing services by the WATER COMPANY pursuant hereto, furnish the WATER COMPANY with the rate or rates to be charged for each sewer collection; sewer treatment; and combination sewer services, including both the flat and metered rates and charges to be applied to delinquent accounts, if any. The VILLAGE may, from time to time, but no more frequently than once per year, notify the WATER COMPANY of any revisions of such rates; provided that such revisions shall not be effective until the billing cycle following the end of the month in which notice has been given.
4. The sewer customers to be billed by the WATER COMPANY pursuant hereto shall be billed on a cycle which is the same as the WATER COMPANY uses for the billing of its customers and on the same bill.

5. (A) The WATER COMPANY shall administer the accounts of the VILLAGE and prepare the bills for all customers of the VILLAGE receiving sewer service subject hereto in accordance with the regular and periodic billing procedure followed by the WATER COMPANY in the billing of its customers receiving water service. The WATER COMPANY agrees to observe the same diligence, policies, and procedures in the billing and accounting of the VILLAGE's sewer accounts subject hereto as it uses in administering and billing its water service accounts.
- (B) The VILLAGE is authorized to act as a customer bill payment collection center during the term of this Agreement. The WATER COMPANY will provide the VILLAGE access to the following WATER COMPANY customer billing records, via internet or e-mail, in conjunction with the bill payment collection services provided by the Village:
- Customer Name(s)
Service Address
Account Number
Current amount due for Water Service
Current amount due for Sewer Service
6. Water bill adjustments, which are granted as a result of over or under estimated water usage, over or under registration of water meters, underground leaks, faulty or inoperative meters, incorrect meter reading, or other recognized and proper adjustments which are granted to water customers by the WATER COMPANY to water customers which are joint accounts shall be accepted by the VILLAGE and be recognized in determining the billing for sewer charges, excluding, however, any flat rate sewer service charge customer. Any resultant adjustment to the sewer charge will be billed at the same time as is the water charge adjustment.
7. The WATER COMPANY will (i) calculate, as set forth above, the applicable sewer charges for each of the VILLAGE's sewer customers identified pursuant to Section 1; (ii) print the sewer bill therefor on the joint accounts' water bills; and (iii) deposit such bill in the United States mail, with a return envelope pre-addressed to the WATER COMPANY.
8. All of the VILLAGE's sewer charges paid by its customers will be collected and receipted by the WATER COMPANY and the WATER COMPANY shall transmit to the VILLAGE, by electronic funds transfer, twice per month, on the 3rd and 18th day of each month (unless such day falls on a Saturday, Sunday, or legal holiday, in which case such transmittal shall be made on the immediately preceding business day), such collections made on behalf of the VILLAGE during

the immediately preceding semi-monthly period (being the 16th through the last day of the immediately succeeding month and the 1st through the 15th day of such month, respectively), net of chargebacks during such period, less all amounts owed to the WATER COMPANY by the VILLAGE for its services pursuant to Section 11 hereof or the provision of water to the VILLAGE.

9. The WATER COMPANY shall maintain customer accounts receivable data for the VILLAGE's sewer customers, including monthly open balance reports, daily transaction reports, daily updating reports, monthly customer record reports, and monthly revenue summary reports, which shall be delivered to the VILLAGE monthly, by the fifteenth (15th) of the month following the month to which such reports relate.
10. (A) The WATER COMPANY shall prepare and mail a second notice on all delinquent accounts.

(B) The WATER COMPANY shall not, however, pursue legal proceedings to force the payment of delinquent accounts.
11. (A) In consideration of the services to be provided to the VILLAGE by the WATER COMPANY pursuant hereto, in addition to all fees payable pursuant to Section 11(D), the VILLAGE shall pay the WATER COMPANY, monthly, a sum equal to the result of multiplying thirty cents (\$0.30) by the number of sewer bills prepared by the WATER COMPANY and delivered to the VILLAGE's sewer customers during the immediately preceding month (the "2002 Bolingbrook Billing Expense"). The "2002 Bolingbrook Expense" shall be increased (or decreased) from time to time consistent with the increase (or decrease) in billing expenses, attributable to the preparation of Bolingbrook bills, experienced by the WATER COMPANY as reflected in rate cases filed before the Illinois Commerce Commission. The effective date of such rate increase shall be the same date as the effective date of the increase in general rates approved by the Illinois Commerce Commission. Such amount shall be withheld from the collections to be paid to the VILLAGE pursuant to Section 8.

(B) The WATER COMPANY shall render a statement to the VILLAGE by the tenth (10th) of each month setting forth the number of sewer bills prepared by the WATER COMPANY during the preceding month, the dollar amount owed therefor pursuant to subsection (A), the amount thereof which has been offset from collections which have been conveyed to the VILLAGE pursuant to such section, and a statement of any past due amount owed by the VILLAGE to the WATER COMPANY. The VILLAGE shall pay each statement so rendered on which there is an outstanding balance within thirty (30) days after the date of such statement.

- (C) Should the term of this Agreement be extended, for each sewer bill which is sent out by the WATER COMPANY, the charge per bill set forth above in subsection 11(A) shall remain in effect unless changed by the WATER COMPANY by giving ninety (90) days' advanced written notice to the VILLAGE prior to the end of the annual contract. At the end of such ninety (90) day period, such new charge shall automatically take effect.
- (D) The WATER COMPANY will absorb the initial costs to establish the WATER COMPANY's books, records, and billing equipment to accommodate the VILLAGE's sewer billing, for those customers identified in Section 1(A), whether such customers are joint customers as of the date hereof or become so in the future. This initial cost is estimated to be \$7,500.00. There may be additional costs associated with those customers identified in Section 1(B), which shall, notwithstanding the preceding, be reimbursed, in full, by the VILLAGE. There shall be no additional charge for Section 1(A) customers added in the future. In the event the VILLAGE subsequently changes its method or rates for sewer billing, it shall pay the WATER COMPANY's expenses to accommodate any such change.
12. The term of this Agreement shall commence with the termination of the Billing and Collection Agreement being executed by the parties contemporaneously herewith and shall continue until December 31, 2042. The Agreement shall automatically renew from year-to-year thereafter, unless one party gives ninety (90) days' advanced written notice to the other party of its intent not to so renew the Agreement. Notwithstanding the above, this Agreement may be terminated for cause, at any time, upon sixty (60) days' advanced written notice to the other party.
13. This Agreement shall be construed to be applicable to only the parties hereto and shall not confer any rights, privileges, or obligations on any third party, including customers of the WATER COMPANY and/or the VILLAGE.
14. It is mutually understood that there may be sewer customers of the VILLAGE who discharge waste into the sewage system of the VILLAGE but who obtain water from a source other than the WATER COMPANY. It is agreed that the VILLAGE may, in its sole discretion, elect to prepare sewer bills for such customers separate and apart from the bills prepared by the WATER COMPANY under this Agreement. The VILLAGE shall not, however, use any other preparation service, nor prepare its own bills, for any joint account, unless mutually agreed by the parties hereto.
15. The VILLAGE shall indemnify and save the WATER COMPANY harmless from and against any and all costs and expenses (including attorney's fees and court

costs) incurred as a result of the WATER COMPANY's reasonable performance hereunder. In no event, however, shall the VILLAGE be required to indemnify the WATER COMPANY for the WATER COMPANY's own intentional acts or acts of negligence.

16. Payments received by the WATER COMPANY on a joint account will be applied to the WATER COMPANY customer account and the VILLAGE sewer customer account on a pro rata basis, such basis to be calculated based on the outstanding balance owed to each the WATER COMPANY and the VILLAGE, unless the customer has designated the party to whom the payment shall be paid, in accordance with the rules and regulations of the Illinois Commerce Commission. If the WATER COMPANY receives an overpayment, such overpayment shall, in accordance with the regulations of the Illinois Commerce Commission, be refunded to the customer or applied to the customer's account with the WATER COMPANY and the Village on a prorated basis.
17. This Agreement may not be assigned by a party without the express written consent of the other party.
18. This Agreement may not be amended, modified, or revised except by a written instrument executed by both parties.
19. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns.
20. This Agreement has been entered into and shall be construed in accordance with the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties hereto have caused their duly authorized agents to execute this Agreement to be effective as of the day and year first above written.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: **Linda C. Bridwell**

- 9.** Please describe in detail any ongoing efforts of KAWC to expand its sale or provision of water.

Response:

KAWC has indicated through continued and casual conversations with other members of the Bluegrass Water Supply Commission (“BWSC”) that it would continue to be willing to discuss regional partnerships with any of the members that were a part of that effort. There have been no new formal conversations with other members of the BWSC that would expand the sale or provision of water, or any neighboring utilities that were not part of the BWSC. There are no ongoing efforts by KAWC to expand its sale or provision of water outside of its normal business development efforts.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

- 10.** Please describe in detail any ongoing efforts of KAWC to expand its involvement with the Partnership for Safe Water or any other treatment programs established by the Environmental Protection Agency.

Response:

Kentucky American Water has participated in the Partnership for Safe Water as a Phase III Director's Award winner for the past 17 years at our Kentucky River Station and Richmond Road Station plants. We are in the process of completing the Phase III Director's Award application for our Kentucky River Station II water plant and plan to have that done by the end of 2016. Kentucky American also has signed up for the Partnership for Safe Water Distribution program.

In 2014, Kentucky American Water's Richmond Road Station water treatment plant in Lexington was recognized as the AWOP Turbidity Champion for 2013 by Kentucky's Energy and Environment Cabinet as part of the U.S. Environmental Protection Agency's Area-Wide Optimization Program (AWOP). In 2015, Kentucky American Water's Kentucky River Station II plant was recognized as runner up AWOP turbidity champion in the state for 2014. Similar to the Partnership for Safe Water, this voluntary program challenges treatment plants to reduce turbidity levels below those required by state and federal regulations and is designed as a mechanism to enhance public health protection of drinking water.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: **Kevin N. Rogers**

- 11.** Please describe in detail any and all lead testing services offered by KAWC to residential customers in Fayette County.

Response:

Kentucky American Water offers lead testing to residential customers who are concerned about the safety of their water. This testing is in addition to the testing performed at the homes of customers every three years as part of lead and copper rule requirements. In both cases, sample bottles are provided to customers with instructions for collecting first draw samples (i.e., water that has been in the lines for a minimum of 6 hours). Kentucky American picks up the samples and provides the sample results to the customers as soon as they are available.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

- 12.** Please provide all information relating to prospective sales of water to communities or facilities outside Fayette County, and more specifically, whether such efforts are being increased due to additional water availability. If not, please explain. Please also explain any marketing or other efforts in detail and provide copies of any business or marketing plans.

Response:

KAW has maintained relationships with other water utilities in Central Kentucky for decades, and frequently discusses the opportunities for additional water sales to other utilities during the course of conversation. No specific prospective sales of additional water to communities or facilities outside Fayette County currently exist. Efforts are not being increased because there is not additional water available. The size of the facilities that was designed and constructed was solely for KAW's customers and projected population growth through 2030 for the area that KAW serves. There is no excess capacity that is available for marketing to other utilities. The decision to acquire the Millersburg system and ultimately provide water through a wheeling arrangement with Paris was mutually cost effective for both KAWC customers and City of Millersburg residents, and would have an overall negligible impact on the capacity available to KAWC customers.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

- 16.** Is the Public Fire Service Revenue component of the cost of service study comprised of anything other than the total number of public fire hydrants and the tariff (KAWC Exhibit 36, Schedule A; KAWC Exhibit 37, Schedule M-3)?
- (a) What is the total number of public fire hydrants in the base period?
 - (b) What is the total number of public fire hydrants in the forecasted test year?
 - (c) It appears that the number of public fire hydrants in the test year is less than the number of public fire hydrants in the base period (Exhibit 37, Schedule M-3). What is the basis for this? If this is an error, please provide a revised cost of service study and/or schedules.

Response:

No, it is not.

- (a) The total number of public fire hydrants in the base period is 7,475.
- (b) The total number of public fire hydrants reflected in the Company's original filing is 7,493. In addition, please refer to part c of this request.
- (c) We disagree with the premise that there appear to be more public fire hydrants in the base period than the test year. The number of public fire hydrants in the base year is an average including six months of actual and six months of forecast. The number of hydrants across the forecasted test year is held flat.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

17. Please provide a breakdown of the total number of the following fire hydrants in Fayette County: (a) public fire hydrants, (b) fire hydrants that are owned and maintained by KAWC, but located on private property, and (c) hydrants for which KAWC is not the owner. If possible, please provide the location of each hydrant. If this information is not available, please explain what action, if any, KAWC is taking to track this information going forward in time.

Response:

- (a) KAW has record of 7,058 public hydrants in Fayette County on its maps. Please see the section labeled Public Hydrants Fayette County, KY within the attachment.
- (b) KAW has listed 739 private hydrants, some of which are billed to LFUCG. These are generally located on private property, but are connected to a KAW owned and maintained water line. Please see the section labeled Private Hydrants in Fayette County, KY within the attachment.
- (c) KAW has 556 hydrants listed as privately-owned in Fayette County. Please see the attached files for locations of each named as follows Privately Owned Fire Hydrants in Fayette County, KY within the attachment.

For each hydrant KAW owns, it is included electronically on KAW's CAD maps and the company's Graphical Information System (GIS) within a few months of being placed in service and a notice is sent to the company billing department by the inspector to begin billing the appropriate party as soon as it is placed in service. For privately-owned hydrants, KAW initiates billing once the connection is installed.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

- 18.** Please describe the process that is undertaken before a privately owned fire hydrant is added to KAWC's system. Please provide a copy of any contracts or other documents that are required to be followed or executed by the owner of the hydrant.

Response:

The determination as to whether a privately owned hydrant is to be installed is based on a KAW-required review of the developer's plan by the fire department that will serve the planned development. A copy of the developer's plan with a sign-off or letter from the fire department is required before KAW will initiate action.

The hydrant plans must be reviewed by KAW in advance to determine that the proposed hydrant will meet and be installed per KAW specifications. KAW assigns an inspector to review and then prepares a work order estimate and requires a deposit for the estimated amount. The assigned inspector will coordinate any construction to be completed by KAW contractors and inspect the installation. The developer also is required to sign a "Special Connections Agreement" for the hydrant, and submit a Tap Application and Service Contract to establish a pre-billing account. Samples of these three documents are attached. Upon completion of the inspection of the installation, the tap set meter form is returned to billing for account activation and then billing begins.

APPLICATION FOR SPECIAL CONNECTION

Account No.	
Contract No.	
WBS Element No.	

This Application, made in duplicate this _____ day of _____, 20____, by _____, hereinafter called the "APPLICANT", to KENTUCKY AMERICAN WATER, a Kentucky corporation located at 2300 Richmond Road, Lexington, Kentucky, 40502, hereinafter called the "WATER COMPANY."

The APPLICANT, upon the terms and conditions hereinafter set forth, hereby applies to the WATER COMPANY for a private service, consisting of the right to connect a service pipe to a public water main on _____ in _____, Kentucky and attach to said service pipe the following fixtures and openings:

(#) Private fire hydrants _____ (hydrant numbers)

all of which fixtures and openings to be located within or upon the premises of the APPLICANT abutting the street on which the said main of the WATER COMPANY is located.

In consideration for which privilege the APPLICANT agrees to be bound by all the terms and conditions of this Application and pay the WATER COMPANY for private fire protection service at the schedule of rates in effect from time to time during the rendition of such service.

The further terms and conditions upon which this Application may be accepted by the WATER COMPANY are as follows:

FIRST: That this Application and the acceptance thereof by the WATER COMPANY may be subject to the prior approval of the fire department having jurisdiction of the premises to be served.

SECOND: That the entire service system on APPLICANT's premises shall be subject to the inspection, test and approval of the WATER COMPANY, and the WATER COMPANY by its representatives, shall have the right to enter the premises of the APPLICANT at any reasonable time for the purpose of making such reasonable inspections as it may deem necessary, and to insure compliance with the terms and conditions of this Application.

THIRD: That all pipes and appurtenances shall be constructed and maintained in good condition by and at the expense of the APPLICANT.

FOURTH: That a fire line meter or detector device, approved by both the WATER COMPANY and the fire underwriters, will be required on the service at a location approved by the WATER COMPANY. Such meter or device shall be installed and maintained by and at the cost and expense of the APPLICANT, but subject to the inspection and approval of the WATER COMPANY. The bypass meter only, used with the detector device, shall be furnished, installed and maintained by the WATER COMPANY at its cost and expense.

FIFTH: That a gate valve with the post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the WATER COMPANY, and shall be furnished, installed and maintained by and at the expense of the APPLICANT, and unless otherwise approved by the WATER COMPANY, said valve shall be installed in a valve pit or vault which shall also be furnished, installed and maintained by and at the expense of the APPLICANT.

SIXTH: That all hydrants and other fixtures connected to any private fire protection service system shall be kept closed and sealed, and not opened or used except during times of fire or testing. Upon extinguishment of each fire or following each test, the APPLICANT shall immediately close such fixtures and notify the WATER COMPANY so that they may be sealed. Whenever a private fire protection service system is to be tested, the APPLICANT shall notify the WATER COMPANY at least two business days in advance of such proposed test, requesting approval of the method, day and hour on which it is to be made.

SEVENTH: That no antifreeze or any other substance not specifically approved by the Environmental Protection Agency as non-detrimental to the public water supply, shall be introduced into sprinkling systems or into any pipe, fixture, appurtenance or other portion of the APPLICANT's private fire protection service system.

EIGHTH: That the APPLICANT understands and agrees that the extent of the rights of the APPLICANT under this Application is to receive, at times of fire on said premises, such supply of water as shall then be available and no other or greater quantity. The APPLICANT further acknowledges and agrees the WATER COMPANY shall not be considered in any way or manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise, and the WATER COMPANY shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

NINTH: That this Application does not contemplate uses of fixtures other than those shown on Exhibit A. Any waste of water or use of water through this connection for purposes other than testing or the extinguishment of fire, shall be deemed a violation of the terms and conditions of this Application and of the rules, regulations and conditions of service of the WATER COMPANY.

TENTH: That if private fire hydrants are included as part of this Application, they shall be painted any color other than that adopted by the WATER COMPANY for public fire hydrants.

ELEVENTH: That the APPLICANT shall furnish, attach and make a part hereof marked Exhibit A, three (3) complete sets of drawings showing the pipes, pumps, valves, hydrants, sprinkler systems, hose outlets and connections, standpipes, tanks and other openings and appurtenances contemplated in this Application. Such drawings, which shall be stamped "Approved" by the Insurance Services Office or other comparable agency approved by the WATER COMPANY, must also show all other water supply systems and pipelines and appurtenances which are proposed or which may exist on the premises to be served.

TWELFTH: That no pipe, fixture or appurtenance connected with the private fire protection service served by this Application shall be connected with any pipe, fixture or appurtenance supplied with water from any other source, unless specifically approved in writing by the WATER COMPANY.

THIRTEENTH: That the APPLICANT agrees to obtain in writing in advance the approval of the WATER COMPANY for any change, alteration, addition or deletion contemplated in the pipes, fixtures, openings and appurtenances and uses herein specified. Notwithstanding the approval of the WATER COMPANY, APPLICANT agrees that, except for those facilities which the WATER COMPANY had specifically agreed to provide and maintain, APPLICANT is and will be solely responsible for the design, adequacy, function and maintenance of its private fire protection service system referred to in this Application.

FOURTEENTH: That the WATER COMPANY has the right to discontinue or disconnect the service pipe herein applied for, and to terminate service under this Application, after due written notice to the APPLICANT, for failure to pay any bill when due, for failure to supply information to WATER COMPANY about the service system when so requested in writing, for leakage within APPLICANT's system, for violation of any of the terms and conditions of this Application, or for any violation of its rules, regulations and conditions of service; and the WATER COMPANY also has the right to shut off all or any part of its facilities by the WATER COMPANY(1) if a condition dangerous or hazardous to life, physical safety or property exists, (2) upon order by any court, the Public Service Commission or other duly authorized public authority, (3) if fraudulent or unauthorized use of water by APPLICANT is detected, or if the WATER COMPANY's regulating or measuring equipment has been tampered with by the APPLICANT.

FIFTEENTH: That upon acceptance of this Application by the WATER COMPANY and the completion of the installation of the service applied for, this Application shall be in full force and effect as a contract and shall continue as such until cancelled by written notice given thirty (30) days in advance by the APPLICANT to the WATER COMPANY, except as otherwise provided in numbered paragraph (14) above.

SIXTEENTH: The acceptance of this Application by the WATER COMPANY must be executed by its Project Manager – New Development/Construction before same becomes effective.

SEVENTEENTH: If ownership of the property served by the service applied for herein changes, notice thereof shall be given to the WATER COMPANY within thirty (30) days and the new owner shall be identified by name, address and proper person to contact.

EIGHTEENTH: That the APPLICANT or his agent is responsible for payment of the deposit for the estimated cost of construction to WATER COMPANY. To the extent there is any refund to be made at the end of the project after all costs are accrued, such refund will be paid to the APPLICANT by check made payable to the APPLICANT. To the extent that any amount is owed to WATER COMPANY at the end of the project after all costs are accrued, payment of such amounts is the responsibility of the APPLICANT. To the extent the APPLICANT owes any of the refunded amount to the contractors, APPLICANT agrees it is responsible for these amounts owed and that WATER COMPANY has no responsibility in that regard.

NEW TAP APPLICATION

PLEASE COMPLETE AND RETURN TO:

Attn: New Taps
 Kentucky American Water
 2300 Richmond Road
 Lexington, KY 40502
 24-Hour Tap Line #: (859) 268-6379
 Fax #: (859) 268-6315
 www.kentuckyamwater.com

FOR OFFICE USE ONLY:			
Plumbing Permit #:			
Inspection Date:			
Customer #:		Account	
Premise#:			
Private Setting:	Yes	No:	
If yes, inspected and approved by KAW:			
WBS#		Spec Conn (or Multiple Svc) Agmt	
Type of service:	Private Fire Hydrant(s)		
Amount Paid		Date Paid:	

IMPORTANT: This application must be completed and returned with the tap fee. Proof of inspection and approval of water service by State Plumbing Inspector required. A signed "Contract for New Service" is required unless a "Master Service Agreement" has been executed. Allow 20-25 days for service to be installed after all paperwork is received. (PLEASE NOTE- Services larger than 2" are applied for and coordinated through the New Development/Construction Department. Installation time will vary, but will be a minimum of 90 days after application is made.)

PLEASE ENSURE ADDRESS IS MARKED AND VISIBLE FROM THE STREET

The undersigned makes application for water service at Address _____
 County _____ Subdivision _____ City _____ Zip _____

and hereby requests Kentucky American Water to make a connection to its main. Kentucky American Water will specify the location, size, kind and quality of all material entering into the service connection and will set and turn on the meter. The undersigned has completed the following requirements for the installation of a water meter at the above address:

- Service line has been installed to the point where the meter is to be permanently connected and visibly marked by the customer to identify the connection point. Non-residential service lines are required to have a testable approved backflow prevention device installed.
- The service line which connects the customer supply at the meter setting is _____ inch (minimum 3/4") and will require a _____-inch meter to be set (**1 1/2" and larger meters require a completed Customer Data Sheet**). The service line is at 30 inches below ground level. Service lines up to 2" will have Type "L" or "K" copper line installed at the connection point or affixed with a male adapter at the connection point if the customer's line is other than Type "L" or "K" copper. Service lines larger than 2" will have Ductile Iron pipe or C-900 plastic pipe installed to the connection point. If another type of pipe is used at the connection point, the customer is required to make the connection; and
- This service line is equipped with an easily accessible stop and waste valve inside and near the foundation of the building being supplied.

THE UNDERSIGNED AGREES TO THE FOLLOWING:

- Comply with all rules and regulations of Kentucky American Water, as approved by the Kentucky Public Service Commission.
- Comply with local codes and ordinances in the construction, use and alteration of the plumbing system.
- If non-residential, shall install an approved backflow prevention device to avert a cross connection or backflow condition.
- Shall not create an electric shock hazard by improper electric grounding to the plumbing system. Kentucky American Water assumes no responsibility for continuity of electrical grounding systems by the installation or removal of its meter.
- Must, at all times, take necessary measures to protect the meter box, meter setting and service line and is responsible for damages to Kentucky American Water property caused by them, their contractor and/or subcontractors.

THIS METER SERVES THE FOLLOWING PREMISE TYPE (CHECK ONE):

- Residential (single premise residence, duplex or multiple premise residence where each unit is served by its own meter).
- Commercial (multiple premise residence [apartment building] served by a single meter, private educational institutions, all businesses where water is not used principally in manufacturing or processing of a product. Commercial includes laundries, hotels, motels, restaurants, bars, non-government office buildings, non-government hospitals and other medical facilities, retail shops, etc.)
- Industrial (manufacturing or processing establishments where the water is used principally in the manufacturing or processing of a product. Industrial includes factories, refineries, bottling plants, etc.)
- Other Public Authority (OPA) (municipal, county, state or federal agencies). OPA includes municipal buildings, public schools, public libraries, government hospitals, fire stations, public housing developments, etc.
- Sales for Resale (sales to private or public water utilities where the water is to be resold to the customers of the utility).

SEWER SERVICE PROVIDED BY (CHECK ONE):

FOR KAW OFFICE USE ONLY:

Premise No.: _____ Acct. No.: _____ Customer No.: _____
 Application for Special Connection No.: _____ WBS No.: _____
 Type of Service: Private Fire Hydrant(s)
 Operations Specialist (KAW Inspector): _____

I hereby make application and authorize Kentucky American Water to place a meter and turn on the water at the following address, and I agree to pay all bills by the due date specified on the bill for water furnished to any address where I either have an interest in the ownership of the property, directly or indirectly, or have requested service, and I hereby agree to continue to be responsible for the same until I notify Kentucky American Water in writing to the contrary.

I agree to take the necessary measures to protect the meter box, meter setting and the service during the installation of new services. I will be responsible for damages to Kentucky American Water property caused by me, my contractor and/or sub-contractor during on-site construction.

I agree to abide by the local codes and ordinances in the construction, use, and alteration of my plumbing system. I shall not create an electric shock hazard by improper electric grounding to the plumbing system. I agree to install an approved, testable backflow prevention device on all nonresidential incoming lines and irrigation systems to prevent the creation of a cross connection or backflow condition.

Kentucky American Water assumes no responsibility for continuity of electrical grounding systems by the installation or removal of its meter.

I agree to abide by and comply with all rules, regulations and rates of Kentucky American Water, as approved by the Public Service Commission of the Commonwealth of Kentucky and as changed from time to time.

If, at any time, any bill owed by me to Kentucky American Water, whether collectible under this Agreement or otherwise, is not paid when due and payable, then Kentucky American Water shall have the right to discontinue the supply of water to the location.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: **Kevin N. Rogers**

19. Please provide the following information with respect to public fire hydrant charges:

- (a) The total number of hydrants charged to Lexington during the base period;
- (b) The total number of hydrants charged to Lexington during the forecasted test period;
- (c) The basis for the projection of the number of hydrants charged to Lexington during the forecasted test period;
- (d) Any adjustment to hydrant charges to reflect system uses of hydrants, including but not limited to flushing the KAWC system; and
- (e) Please provide the number (quantity), type, and location (by street address or other easy to identify locator) of each fire hydrant for which Lexington currently pays a monthly tariff.

Response:

- (a) For the base period the number of hydrants being charged to Lexington is 6,912.
- (b) For the forecasted test year period, the number of hydrants being charged to Lexington is 6,912.
- (c) The number of hydrants charged to Lexington was based on hydrants being currently billed each month. There was no increase in the number of hydrants being charged to Lexington in the forecasted test year period.
- (d) No adjustments were made to hydrant charges to reflect system uses of hydrants.
- (e) Please refer to the attachment.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Paul R. Herbert

- 20.** Please detail the administrative cost component attributable to public fire protection, and provide any applicable work papers showing how the cost component is calculated.

Response:

The detail of administrative costs allocated to public fire protection is shown on Schedule D, pages 11 and 12 of 42 of the cost of service study, column 10. The costs are derived by applying the allocation factor referenced in column 2 to the cost of service shown in column 3. The calculation of the allocation factors is provided in Schedule C of the study.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

- 21.** What is the cost to KAWC (per unit) to acquire each type of fire hydrant?
- (a) Would the creation of a tariff under which a public utility owned its fire hydrants result in a reduction in the existing public fire hydrant tariff? Why or why not?

Response:

KAW purchased two types of hydrants from Mueller in 2015. The uninstalled cost was \$811.04 and \$925.86.

- (a) KAW is unable to speculate on the effect of the creation of a tariff as described in the request. Many factors go into determining the cost of service allocation for each tariff that may or may not change depending on the ownership structure of the hydrants or any of the assets providing service.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

- 22.** How many additional new fire hydrants does KAWC anticipate being installed in Fayette County over the next 5 years for which Lexington would be billed? Please net out any hydrants that would be removed from the system as part of this calculation.

Response:

Kentucky American Water projects the number of hydrants to be installed in the system based on historical trends and an estimate of the amount of development activity that may occur. The Company does not project the number of hydrants that are projected to be installed by county or type during the five-year period. All new hydrant installations are currently projected in the Central Division as a whole.

2016 – 50 public hydrants
2017 – 50 public hydrants
2018 – 50 public hydrants
2019 – 50 public hydrants
2020 – 50 public hydrants

- 23.** Will KAWC's proposed capital expenditures under the QIP extend to every customer class? Please identify each class and describe the anticipated replacements and/or upgrades.

Response:

Yes, it is proposed to extend to all customer classes. This includes residential, commercial, industrial, other public authority, sales for resale, private fire services and hydrants, public hydrants, and miscellaneous. Please refer to Brent O'Neill's testimony and attachments for anticipated replacements and/or upgrades.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

- 24.** Does KAWC have any plans to make significant capital investments to public fire protection facilities under the (QIP)? Please describe any and all efforts by KAW to improve public fire protection service.

Response:

KAW does not expect to make significant capital investments to public fire hydrants or public fire protection facilities under the QIP. The main emphasis for the proposed QIP is the accelerated replacement of 240 miles of cast iron and galvanized steel main over the next 25 years. The replacement of these material types will allow the Company to address underperforming mains that impact the available fire flow in the areas currently being served by them. The work to replace the water mains may include the replacement of existing hydrants at the time of the project. The types of mains and infrastructure that are targeted for this program are traditionally items that have reached their useful life expectancy or have developed problems that affect the ability to meet the service expectations of the customers. A majority of this infrastructure was installed during a period where the expectations or requirements for fire service were minimal.

KAW believes that the replacement of main under the QIP will strengthen and enhance available fire flows in area surrounding the replaced main. The replacement of the infrastructure through the QIP program allows the Company to ensure that areas of the system are made more robust and are more resilient and able to provide needed fire flow.

KAW currently reviews the performance of its distribution system and analyzes it to ensure it is able to meet the service expectations of the customers and provide adequate fire protection. If a portion of the main is unable to meet these metrics, then KAW develops initiatives to address it. In most cases, this involves replacing existing small diameter main with larger diameter main. In addition, KAW reviews the need for interconnection of mains to ensure that the system is robust and resilient. A recent example of this type of review and remediation is the replacement of 4-inch and 6-inch cast iron main along Mentelle Park from Richmond Road to Cramer Avenue with 8-inch ductile iron main that increased the fire flow in the area from about 500 gpm to between 1,000 and 1,500 gpm for the area served by the new main.

25. Will the QIP tariff apply to all customer classes?

Response:

Yes.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

- 26.** Please explain in detail KAWC's current policies, procedures, practices, and/or guidelines for testing, maintaining and/or replacing fire hydrants in Fayette County and provide copies of the same.

Response:

Kentucky American Water has an annual program to inspect every hydrant in the system and record flow data except during periods of extreme drought or other weather conditions that would impede the flow testing process. During inspection, the caps are opened and the hydrant is flowed at a low amount. The hydrant is then shut, caps replaced, and the hydrant is opened to full pressure to show any leaks. The hydrant is then shut and visually inspected. During a hydrant flow test, each hydrant is opened and flowed at full flow for at least two minutes. The static pressure, flow rate, and residual pressures are noted. The hydrant is then inspected and all outlets are inspected. If further maintenance is required based on either inspection, the hydrant is removed from service and repaired. Some minor repairs can be done by field service personnel at the time of the inspection with the hydrant in place. Other repairs require physical removal of the hydrant which are scheduled and performed in the field. Generally, a hydrant is replaced if it requires more extensive repairs than those which can be done in the field.

The fire hydrant maintenance procedures are confidential and are subject to a petition for confidential treatment.

CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

27. Please describe in detail all inspections, maintenance, or testing that must be performed by KAWC on each type of fire hydrant to ensure that it operates properly, and provide a list breaking down each of the components of the above and its cost, as well as how frequently each of the above must be performed, or actually is performed. Also describe in detail all maintenance that must be performed by KAWC on the public fire system to ensure that it operates properly. Please explain how KAWC maintains any such records.

Response:

See the response to Item 26 of this same data request. KAWC maintains hydrant information in our SAP data management system. At present, KAWC does not break down the costs to perform each activity required to inspect, maintain and test hydrants. Maintenance work is generally performed by individuals in the field operations department, although large scale re-painting is generally performed by external contract vendors.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

- 28.** Please provide the standard(s) that KAWC is using to determine that a fire hydrant is leaking, failed or obsolete. If a hydrant is identified in such a condition, is it still billed to the customer, or is immediately removed from future billing until corrected?

Response:

Fire hydrants are inspected annually. Should a functional problem occur and be discovered during an inspection, the fire hydrant will be repaired immediately by the inspector, or referred to maintenance for prompt repair. Because of the critical nature of fire protection, KAW gives a priority to hydrant repair. Should there be a functional problem found outside of routine inspections, the fire hydrant would be repaired promptly, normally within 48 hours. All fire hydrants can be partially or fully replaced using replacement parts; there is no set standard for replacement other than visually inspecting and operating to determine deficiencies.

Due to immediate action being taken on repairs or replacement of hydrants, service interruptions rarely last more than a few hours and billing is not interrupted. Even with total replacement, the installation of a new hydrant is normally done the same day the old hydrant is taken out of service. Therefore, there is rarely a period when a fire hydrant is not in service. Hydrants are generally kept in service if at all possible.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers/Brent E. O'Neill

- 29.** Is there a minimum flow rate at which KAWC deems a fire hydrant not to be useful? What if anything, is done with respect to such hydrants, when they are identified? If there is a difference in how different types of hydrants are treated, please explain.

Response:

KAW will not generally install a hydrant unless it is going to be attached to at least a six-inch main and flow at least 250 gallons per minute (gpm). For hydrants that flow less than 500 gpm, KAW will paint the caps red to indicate a low-flow hydrant. For existing hydrants, KAW believes that any flow is useful for flushing purposes. Generally, KAW would expect that local fire officials request removal of any hydrants they do not consider useful, whether for either low flow or other reasons.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

- 30.** Does KAWC require its privately-owned fire hydrant or service customers to provide any evidence or documentation that such systems are being adequately maintained, inspected, or tested on regular basis, or does KAWC ever perform any testing? Please explain.
- (a) What, if anything, does KAWC do if it comes to its attention that a privately owned fire hydrant is no longer operable?

Response:

It is the responsibility of the property owner to maintain, inspect and test privately-owned fire hydrants on a regular basis, subject to the requirements of the respective fire department, state fire marshal, building codes and the property owner's insurance providers. KAWC does not require customers to provide documentation of maintenance or inspections.

- (a) If KAWC learns that a privately-owned fire hydrant is no longer operable and no other service is connected to the line, KAWC may shut off the service and cease billing, subject to attempts to resolve the issue with the customer.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

31. Would KAWC object to the PSC implementing additional minimum requirements with respect to maintenance, performance, or operational standards for all fire hydrants in Fayette County? Please provide a detailed response.

(a) Does your answer differ depending upon the type of hydrant involved (public, private, and privately owned)? If so, please explain why.

Response:

No, not as long as KAW has an opportunity to participate in the process and is given consideration regarding recovery of any increased maintenance cost associated with any proposed requirements.

(a) No.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

- 32.** Are all privately-owned water lines metered at some point? If not, please explain how a determination is made with respect to whether such a line is metered.

Response:

No. KAW allows privately-owned fire service lines that are less than 150 feet in length. These connections do not have a meter for water usage, but will have either a detector check assembly or a double detector check assembly that includes a by-pass meter that indicates flow has occurred in the fire service line. Neither assembly measures the amount of water used. If usage is detected on the fire service line through the detector check for two consecutive months, KAWC notifies the customer for consideration of the installation of a meter on the line.

Beginning in 2006, KAW required that service lines serving multiple buildings or fire service lines cannot be any longer than 150 feet between the point of connection with the distribution system and the location of the meter or detector check assembly. If the installation of the meter or detector check assembly cannot occur within the 150 feet, then the developer of the property is required to install public main within the property that KAW installs, owns and maintains through an easement. This was implemented to help reduce the amount of unaccounted-for-water.

For several years prior to that, KAW allowed water lines for private property to connect to the KAW distribution system through either an unmetered "Multiple Service Connection Agreement" or a "Special Connection Agreement." Through the use of these agreements, the Company provided individual meters connected to the privately owned system that allowed multiple commercial or residential customers to use private main located on private property. The meters are then read by KAW. KAW no longer offers this arrangement but still has a number of these historic agreements in place that have been grandfathered in. This was used at places like the University of Kentucky, large commercial malls or shopping centers, and some large apartment complexes.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: **John J. Spanos**

33. What depreciable life basis (if any) for each type of fire hydrant does KAWC utilize? Is this the industry standard service? If not, please explain.

Response:

The depreciable life for fire hydrants for KAWC is 70 years. All types of fire hydrants have the same average life. The industry range is 55-75 years for fire hydrants.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill/Kevin N. Rogers

- 34.** What is the individual fire flow requirement to which KAWC's water system in Fayette County has been designed and/or built?
- (a) Does this differ in any way from the historical or current actual performance level of the system?
 - (b) How often is this tested?
 - (c) Are these results provided to the LFUCG Division of Fire and Emergency Services?

Response:

Since 1885, when the distribution system within Fayette County first went into service, expectations of the system's ability to provide fire flow have changed. Because the system was built and expanded in different periods of time there is no specific fire flow requirement to which the system has been built. KAW typically follows the guidelines that hydrants must flow at least 500 gallons per minute with a residual pressure of at least 20 pounds per square inch (psi).

If the LFUCG Fire Department requests a hydrant installation to support the community or a new area being developed and the requested hydrant cannot provide 500 gallons per minute at 20 psi, the Fire Department is specifically asked if a hydrant should still be installed despite lower flow conditions.

The 500 gallons per minute with 20 psi residual is a minimum, and much greater flow is available at a majority of locations throughout the system.

- (a) Because there has not been a historical performance level there is no ability to perform a performance level test.
- (b) The system on the whole is not tested, however on an annual basis, individual fire hydrants are tested and information collected.
- (c) Yes, hydrant testing results are provided to the LFUCG Division of Fire and Emergency Services.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Brent E. O'Neill

- 35.** What is the minimum fire flow protection required to meet ISO guidelines? Please provide any supporting documentation.

Response:

The ISO has developed a GUIDE FOR DETERMINATION OF NEEDED FIRE FLOW, which is available at <http://www.isomitigation.com/downloads/ppc3001.pdf>. Needed fire flow will range from 500 gpm to 12,000 gpm for individual properties. ISO will not consider a hydrant in its rating that does not flow at least 500 gpm, and will not evaluate a community unless it can produce 250 gpm for fire flow for 2 hours at a 20 psi residual pressure.

LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Paul R. Herbert

37. What is the basis for the 10,000 gpm of fire flow (KAWC Exhibit 36, Schedule C)?

Response:

The basis for the system fire demand is based on a formula established by the National Board of Fire Underwriters using the population of the area served, as follows:

- a) For populations of 200,000 or less:

$$Q = 1020\sqrt{P}(1 - 0.01\sqrt{P})$$

Where Q is the fire demand in GPM and P is the population in thousands.

- b) For populations in excess of 200,000,

$Q = 12,000 \text{ GPM plus } 2,000 \text{ to } 8,000 \text{ GPM}$ for a potential second fire.

Based on an estimated population of 325,000, a fire demand of 12,000 GPM would apply (see part b of the formula) plus approximately 3,000 GPM for a population well in excess of 200,000, for a total fire demand of approximately 15,000 GPM.

In order to hold down fire service costs, which generally benefit the community at large, for cost allocation purposes, 10,000 GPM was used.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Nick O. Rowe

- 38.** Does KAWC have any plans to acquire any additional water or wastewater facilities during the forecast period? If so, please provide a detailed explanation.

Response:

KAW does not currently have any written commitments to acquire additional water or wastewater facilities.

KAW continues to explore potential acquisitions that would be beneficial to KAW and its existing customers. The Company believes growth in customers provides the opportunity for KAW to grow its customer base which in turn permits KAW to spread its fixed costs over a larger customer base. The Company's existing customers benefit in this scenario.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

- 39.** Please provide a list of all local governments in Kentucky (other than Lexington) who obtain water from KAWC and the terms of each such arrangement. As KAWC adds additional customers of this type, please explain whether such customers will reduce the burden of the new treatment plant and pipeline on existing customers, or whether they will in any way reduce the cost of future water rates.

Response:

KAW provides water to the City of Nicholasville, the City of Versailles, the City of Midway, and the City of North Middletown on a wholesale basis in which Nicholasville and Versailles supplement their supplies and Midway and North Middletown provide service for all of their citizens. Additionally, KAW provides service in Owen County, the City of Owenton, the City of Monterey, the City of Sadieville, the City of Glencoe, the City of Millersburg, Scott County, Harrison County, Woodford County, Bourbon County, Clark County and Jessamine County. Those local governments purchase water for individual government properties and fire services under KAW approved tariffs. KAW generally negotiates wholesale water purchases in accordance with cost of service based agreements, therefore any additional customers would be required to cover the cost of the service requested. KRS II was designed and constructed for a capacity to meet KAW's then current customers (including the governments identified above) during hot, dry periods and droughts, and to meet projected population increases within the area that KAW currently serves through the year 2030. Any additional wholesale customer would need to pay for the cost of a plant expansion and the prorated portion of shared facilities (such as the transmission main). KAW customers would benefit through the economies of scale of utilizing shared facilities with either reduced rates or delayed rate increases depending on the size and scope of any future expansions.

CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

40. Has the actual current use of water met KAWC's projections from the last several years? Please explain.

- (a) To what extent are current consumption and demand rates consistent with the projections KAWC has submitted in PSC proceedings since 2002?

Response:

Yes, it has.

- (a) Since 2002, KAW has submitted demand projections three times in PSC proceedings. The first time was in Case 2001-00117 as an update in 2004 to earlier information. The actual daily demands during the period from 2004 to 2015 were below those projections by 1.83 million gallons per day on average, or only 4.05%. This is due primarily to the decline in usage from 2011 to 2015 including significantly wet, cool summer weather during that period.

The second demand projections submitted since 2002 were in the Certificate Case 2007-00134. The actual daily demands for 2007 through 2015 were below those projections by 1.50 million gallons per day on average, or only 3.52%. This is due primarily to the decline in usage from 2011 to 2015 including significantly wet, cool summer weather during that period.

The third demand projections were submitted in 2012 as a part of the Certificate Case 2012-00096. Those projections included 2011 actual demands. The actual daily demands from 2012 to 2015 were 2.09 million gallons per day below the projections on average, or only 5.17%. Here again, this is due to the decline in usage during the period including significantly wet, cool summer weather during that period.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Linda C. Bridwell

41. Please provide the total amount of water supplied by KAWC to its customers on an annual basis since 2010. To the extent possible, please provide the same information broken down into counties or regions.

(a) Please provide this information for each category of ratepayer.

Response:

Please see the attached.

Kentucky American Water Company

- 43.** Does KAWC have a timeline for implementing a system capable of providing customers with multiple accounts a summary or collective bill?

Response:

Kentucky American Water implemented a new customer information system in 2013 that has the functional capacity to provide collective billing for customers with multiple accounts. This feature was launched approximately 18 months ago and has been available to customers since that time.

FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

44. Does KAW have an estimate of how much water has been lost due to leaking infrastructure? Please provide this information for the previous 5 years by volume and percentage of treated water.

Response:

Please see the attached year ending PSC Water Loss Reports for 2011, 2012, 2013, 2014 and 2015. The volume of water loss from main breaks is shown in the "Line Breaks" category in the PSC reports. KAW has not quantified the volume of water loss specifically due to unidentified leaking infrastructure. Consequently, any volume of water loss in that and other categories is embedded on line 26 "Line Leak" in the PSC Water Loss Reports, which captures all volumes not specifically noted elsewhere on the report form.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

45. Please describe what processes are in place to identify a potentially stuck meter or unknown leak (e.g. automated review of meter data).

Response:

American Water's asset management system includes technology designed to identify potentially stuck meters and also abnormally high water usage that could indicate a leak.

With regard to potentially stuck meters, the system reviews all meter readings uploaded into the system for each monthly reading cycle. For active accounts with meters less than 2 inches in size, when readings indicating 0 water usage are obtained, the following process takes place:

1st month: no action taken.

2nd month: no action taken

3rd month: If meter located inside, a letter is sent to customer indicating possible stuck meter. If meter located outside, a service order is generated for investigation by the local field team. (Meters in Kentucky are located outside.)

4th month: same action as for 3rd month.

5th month: Manual intervention taken by operations and or field staff to take action, including attempted direct customer contact, if issue remains unresolved or unexplained.

For meters 2 inches in size or greater, the same process is used, except action is taken beginning with the 2nd month due to the potential for a larger volume of water usage being affected.

Accounts where property is vacant, seasonal in nature, or fire services can be coded as such to indicate that 0 usage is expected. However, these are reviewed periodically for changes. Also, the above process does not apply to irrigation accounts from October – March (cold weather months) due to expected 0 usage during those times.

With regard to potential leaks, the system reviews monthly readings for much higher deviations in usage from the account's historical water usage, which could indicate a potential leak. When these are noted, correspondence is sent to the customer to notify of higher than normal usage and to check for the possibility of a leak if the high usage is unexpected / unexplained. Correspondence continues to be generated if the high usage

persists. Field staff such as meter readers may also provide information should they suspect a leak, and a service order generated for a follow-up leak investigation.

In addition to these system responses, each customer bill contains a bar graph representing the usage on the account for the past 12 months, which is another excellent visual indicator that usage is either higher or lower than may be expected.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2015-00418
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kevin N. Rogers

46. Does KAWC have a formal policy or informal practice regarding expenses incurred by a customer due to an unknown leak? Does KAWC grant customers leniency in this situation? If so, please describe.

Response:

Kentucky American has a formal policy for hidden leak adjustments, included in the current tariff P.S.C No. 6 - First Revised Sheet No. 65. In summary, the tariff makes a hidden leak adjustment available to residential and commercial customers for hidden underground leaks in the customer service line between the meter and the premises. It provides an adjustment for the two highest months of usage. The customer is required to provide documentation that the leak has been repaired before an adjustment can be made. The usage over and above the customer's normal historical usage on the account is calculated for up to a two month period, and the customer pays for 25% of that additional usage due to the leak. The other 75% of additional usage is adjusted off the customer's account. There are a maximum of two leak adjustments during the lifetime of a customer's water service line, and after that the customer's water service line must be replaced before any additional leak adjustments can be considered.

We have provided additional informal guidance to our customer service and billing teams to allow for a broader interpretation of that language and some leniency, rather than observing a strict application of the tariff language. That guidance states as follows: "A hidden underground leak is defined as a leak in the customer service line between the meter and any facilities served at the premise by the customer's underground service lines, or in any other area where a leak would not be readily obvious to the customer." This allows a broader range of circumstances to be eligible for leak adjustment consideration, such as a farm with service lines to livestock watering stations or barns, or irrigation systems for lawns, medians, or golf courses. It also has been Kentucky American's practice to not exclude OPA, Industrial, or Fire Services customers from leak adjustment consideration. If the Residential and Commercial classifications referenced in the tariff were strictly observed, customers in these other classifications would not be eligible.

47. Please describe existing or planned water conservation programs aimed at end customers and the respective annual funding for such programs. For each such program, please provide an annual estimate of the quantity, in volume and percentage of treated water, of water which will not be consumed as result of the program.

Response:

Kentucky American Water has ongoing efforts to educate customers about using water wisely for the purpose of encouraging environmental stewardship and helping customers better manage their water use and thus, their water bills. The Company strives to achieve this through a variety of activities each year.

A listing of existing and planned activities is included below along with the approximate cost for each, but data is not available to estimate the volume or percentage of treated water that will not be consumed as a result of these efforts either individually or collectively.

Rain Barrel Workshops - \$24,000

Kentucky American Water has partnered with Bluegrass GreenSource, a regional environmental education organization, to produce and provide 14 workshops this year throughout the Company's service area that teach attendees how to use water wisely and how to construct a rain barrel for use at their residences. Materials are provided.

Water Warrior Camps - \$12,000

Kentucky American Water has partnered with Bluegrass GreenSource, a regional environmental education organization, to produce and provide eight half-day summer camps for students throughout the Company's service area that teach children about water stewardship, to include wise water use and watershed protection.

Excellence in Water Education Awards - \$ 5,000

The Company has partnered with Fayette County Public Schools and the Bluegrass Youth Sustainability Council to engage Fayette County students in researching the value of water and learning about water conservation techniques and then producing a school video about the same. In order to attract schools to participate, the Company will award each of the five schools with the best videos a water bottle refilling station for their school. The stations assist in providing students with a healthy, economical option for hydration during the school day, and also help reduce the amount of bottles, cans and cartons that are placed in landfills if they are not recycled.

Bill Insert - \$4,000

Kentucky American Water produces a bill insert that provides water wise tips to customers.

Leak Detection Kits - \$1,200

Kentucky American Water makes available hard copies of booklets that provide customers with tips on how to look for water leaks in their homes and suggestions on how to address these. The kit also comes with leak detection dye tablets used for testing toilets for leaks. A pdf of the booklet is also available on the Company's website. The kits are available to customers via the company's lobbies, community events and upon request.

Radio Ads - \$15,000

The Company purchases and underwrites radio time that is used to convey wise water tips to consumers.

Online and Print Ads - \$15,000

The Company purchases online and print newspaper ad space to convey wise water tips to consumers.

Educational Garden Partnership - \$15,000

The Company has engaged in a partnership with the Living Arts & Science Center in Lexington to use the center's new garden area as an outdoor classroom through which children from throughout the region can learn about water conservation and watershed protection.

Lexington Habitat for Humanity - \$5,000

The Company has engaged with Lexington Habitat for Humanity in a partnership to reach families who have purchased a Habitat home, those who are pursuing a Habitat home, those who are supporters of Habitat and those who shop at the Habitat ReStore with wise water use messaging. Tactics include newsletter articles, social media postings, educational materials at events, presentations at Habitat family education events, and signage in the Habitat ReStore housewares consignment shop.

Social Media Postings – staff time

The Company uses its social media platforms to convey water wise tips to customers. Examples of special campaigns include Fix-A-Leak Week and Drinking Water Week.

Community Events – staff time

Company staff provides water wise education through a variety of community events, such as Arbor Day, Reforest the Bluegrass, Founders' Day at McConnell Springs, RiverBlast and its WaterFest community open house.

School Presentations and Events – staff time

Company employees teach students about wise water use through school science fun days and career fairs, scout meetings, and other events.

Water Wise Literature & Items - \$10,000

The Company purchases child- and adult-level wise water use educational materials for distribution, as well as items such as shower timers, rain gauges and main water shut-off valve tags.
