

COMMONWEALTH OF KENTUCKY  
BEFORE THE PUBLIC SERVICE COMMISSION

RECEIVED

AUG 27 2007

**In the Matter of:**

A CERTIFICATION OF THE CARRIERS )  
RECEIVING UNIVERSAL SERVICE )  
HIGH COST SUPPORT )

PUBLIC SERVICE )  
COMMISSION )  
ADMINISTRATIVE )  
CASE NO. 381 )

On September 25, 2001, the Public Service Commission of Kentucky (the "Commission") issued an order in Administrative Case No. 381 requiring all carriers to file with the Commission their plans for the use of any high-cost federal support by September 1 of each calendar year.

Accordingly, Windstream Kentucky East, Inc., ("Windstream East") submits the following and respectfully requests that the Commission file, with the Federal Communications Commission ("FCC") and the Universal Service Administrative Company ("USAC"), a certification that Windstream East's proposed capital expenditures for 2008 comply with the FCC's criteria and, accordingly, is eligible to receive federal Universal Service Fund support.

**Estimate of USF Support Amount**

Windstream East estimates its Federal Universal Service support for 2008 will be approximately [REDACTED].

**Intended Use of Support**

All Federal USF support received, for Windstream East properties in the Commonwealth of Kentucky, will only be used for the provision, maintenance and upgrading of facilities and services for which the support is intended, consistent with section 254(e) of the Telecommunications Act of 1996 (the Act).

## **Achieving Comparability of Rates and Services**

In Section 254 of the Act, Congress articulated a national goal that consumers in all regions of the nation, including rural, insular and high cost areas, should have access to telecommunications and information services at rates that are reasonably comparable to rates charged for similar services in urban areas<sup>1</sup>.

The actual cost to provide service in rural high cost areas is determined by many factors including the cost of the local loop and the costs associated with operating, maintaining, and upgrading facilities. Local loop costs and the costs of operating, maintaining, and upgrading facilities vary widely due to many factors, including subscriber density, terrain, local exchange size, accessibility, and labor costs<sup>2</sup>. To this end, the Federal Universal Service support received by Windstream East will offset some of the financial burden of owning, operating, maintaining, and upgrading facilities in rural areas and allows these services to be offered at rates that are comparable to rates for similar services in non-rural areas.

### **Listing of Specific Projects**

Attachment "A" contains a listing of Windstream East's specific Capital Budget projects and the estimated cost of each project currently budgeted for completion in 2008. Windstream East anticipates that these projects will be completed and associated dollars expended in 2008, but this is subject to change as conditions warrant. Additionally, Windstream East will use the Federal High Cost support funds and other funds generated from various sources to support not only the projects listed in Attachment "A", but also to maintain embedded plant and for various other purposes allowed by the Federal Communications Commission rules.

---

<sup>1</sup> See FCC's FOURTEENTH REPORT AND ORDER, TWENTY-SECOND ORDER ON RECONSIDERATION, AND FURTHER NOTICE OF PROPOSED RULEMAKING IN CC DOCKET NO. 96-45, AND REPORT AND ORDER IN CC DOCKET NO. 00-256, released May 23, 2001, paragraph 2

<sup>2</sup> See Footnote #525, Page 116 of the FCC's Report and Order CC Docket No. 96-45

As can be seen, the capital projects scheduled for 2008 contained in Attachment "A" far exceed Windstream East's estimated Federal Universal Service support.

### **Contacts**

All questions pertaining to the information contained in this filing should be directed to:

Daniel Logsdon  
Vice President -- State Government Affairs  
130 West New Circle Road  
STE 170  
Lexington, KY 40505
