Re: Docket No. 99-182

Dear Mr. and Mrs. Ray:

The Commission is in receipt of your letter in opposition to the 85 foot wood laminate pole proposed to be located at 3910 South Fifth Street. The application filed by Wirelessco, L.P., by and through its agent and general partner, Sprint Spectrum, L.P., was rejected by the Commission as prematurely filed. Please see attached letter to counsel for Sprint Spectrum from Helen Helton, Executive Director of the Commission. Please also find enclosed a copy of a letter to counsel for Sprint Spectrum from Wayne Bates, Manager of the Communications Branch, Division of Engineering.

Since this matter is presently before the Louisville and Jefferson County Planning Commission for a decision, you may wish to direct your concerns to it.

Sincerely,  
*Stephanie Bell*

Stephanie Bell  
Secretary of the Commission

Re: Sprint Spectrum, L.P.  
Case No. 99-182

Dear Ms. Keene:

The Commission is in receipt of an application you filed on behalf of Sprint Spectrum, L.P. for a Certificate of Public Convenience and Necessity to construct and operate a Personal Communications Services facility at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky.

Commission staff has thoroughly reviewed the application and finds that it is not ripe for filing. Commission Regulation 807 KAR 5:063, Section 2(3) presupposes that a proposal for the facility has been submitted to the planning commission and that the planning commission has rendered a final decision or that it has not rendered a decision and the statutory sixty days have passed. Sprint's proposal for the facility was submitted to the Louisville and Jefferson County Planning Commission on May 11, 1999 and no decision has been rendered. Therefore, pursuant to 807 KAR 5:001, Section 2, the application filed with this Commission by Sprint Spectrum on May 13, 1999 in Case No. 99-182 is rejected and will be removed from the docket.

Sincerely,

  
Helen C. Helton

RE: WirelessCo., L.P. Notice of Collocation of a Facility on an Existing Structure

Dear Sir/Madam:

The Commission is in receipt of the attached letter informing the Commission Staff of its intent to place a facility on an existing structure. It is the opinion of the Commission staff that placement of the facilities as described is an extension in the ordinary course of business pursuant to KRS 278.020(1) and therefore a Certificate of Public Convenience and Necessity is not required.

Please be advised that this opinion does not relieve the utility from compliance with local requirements for placement of the facility.

If you have any questions regarding this matter, please feel free to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Wayne Bates".

**RE: Ordinary Course of Business Extension  
WirelessCo., L.P., by and through Sprint Spectrum, L.P.  
Cell Site in Jefferson County, Kentucky**

Dear Ms. Helton:

I am writing to advise you that Sprint Spectrum, L.P., ("Sprint Spectrum") on behalf of Wirelessco, L.P., intends to place a wood laminated antenna pole at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. Said pole placement is to accomodate Sprint Spectrum's Personal Communications Services ("PCS") antenna equipment. Placement of the pole does not require the elaborate permanent foundation or construction as a wireless telecommunications "tower." The facilities related ground equipment will be located in a building adjacent to the pole site. Drawings of the pole, which include foundation detail, are attached hereto.

Directions to the site from the county seat of Jefferson County, Kentucky located at 531 West Jefferson Street: Take South Sixth Street two blocks to Chestnut Street. Turn Right onto Chestnut Street (east) and travel three blocks to Third Street. Turn right (south) onto Third Street and travel approximately 3.6 miles, passing the University of Louisville campus, to Kenton Street. Turn right (west) on Kenton and go to Fifth Street. The site is on teh corner of Dresden and Fifth Street. The coordinates of the tower are: Lat: 38-11-52.04; Long: 85-46-8.78.

It is our understanding that placement of the proposed wood laminate pole and installation of Sprint Spectrum's antenna thereon requires only the notice provided herein, rather than a formal application to the Public Service Commission. (See Staff Opinion Letter dated April 6,

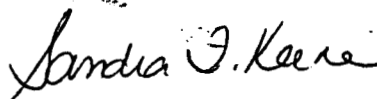

1998, in re: SouthEast Telephone, attached hereto). The proposed pole placement is an extension of the business described in the Application of WirelessCo., L.P. to the Kentucky Public Service Commission filed on February 27, 1996 (Case Number 96-077).

I would appreciate your returning to my attention in the enclosed self-addressed stamped envelope, a date stamped copy of this letter verifying that it has been received by your office.

If you or your staff have any questions or need additional information regarding the above, please advise.

Many thanks.

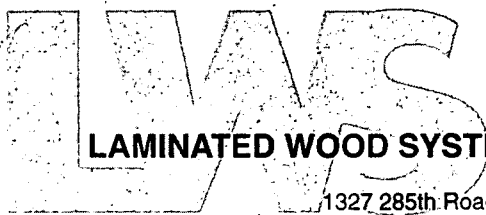

Sincerely,

Mark W. Dobbins  
Sandra F. Keene

### Maximum Allowable Bending Stress

Maximum Allowable Bending Stress =  $F_b \times$  Adjustment Factors

$$F_{bx} = 2400 \text{ p.s.i.}$$

$$F_{by} = 1500 \text{ p.s.i. (Actual lay-up meets or exceed U.B.C. 24F-V6 layup.)}$$

$$F_{bx-x} = F_{bx} \times C_v \times C_d \times C_w = 2,624 \text{ p.s.i.}$$

$$F_{by-y} = F_{by} \times C_{fu} \times C_d \times C_w = 1,939 \text{ p.s.i.}$$

$C_v$  = Volume Reduction Factor, p. 2-824 U.B.C., 1994 and p. 4-103 A.I.T.C. Fourth Edition, 1994

$$C_v = 0.854$$

$C_d$  = Load Duration Factor, p.2-810 U.B.C., 1994

$$C_d = 1.6$$

$C_{fu}$  = Flat Use Factor, pp. 4-102 to 4-103. A.I.T.C. Fourth Edition, 1994

$$C_{fu} = 1.01$$

$C_w$  = Wet Use Factor, p. 2-877 U.B.C., 1994

$$C_w = 0.8$$

Maximum Allowable Stress (Trans.) = 2,624 p.s.i.

Maximum Allowable Stress (Long.) = 1,939 p.s.i.

### Calculated Bending Stresses at Groundline

<b>Transverse</b>		<b>Longitudinal</b>	
$S \text{ (in.}^3\text{)} = 1,472.2$		$S \text{ (in.}^3\text{)} = 1,221.2$	
G.L.M. = 213,138 ft-lbs		G.L.M. = 194,442 ft-lbs	
Max. Calc. Bend. Stress (p.s.i.) = 1,737		Max. Calc. Bend. Stress (p.s.i.) = 1,911	
OK 1,737 < 2,624		OK 1,911 < 1,939	

**Embedment Recommendation (per U.B.C. Eqn. 6-1)**

Allow. Found. Pres. at 1/3 Depth = 1,000 p.s.f.

(Per February 1, 1999 Soils Report & 1994 U.B.C.)

Resultant Load (P) = 5,154 lbs.

Resultant Loc. (h) = 41.36 ft.

Foundation Diameter = 5.0 ft.

Foundation Depth = 15.0 ft.

d = Min. Depth per U.B.C. Eqn. 6-1

A = 2.41

d = 11.7 ft.

Therefore, the actual embedment depth of 15.0 feet exceeds the minimum embedment depth of 11.7 feet as calculated per U.B.C. Eqn. 6-1.

COMMONWEALTH OF KENTUCKY  
PUBLIC SERVICE COMMISSION  
730 SCHENKEL LANE  
POST OFFICE BOX 615  
FRANKFORT, KENTUCKY 40602  
(502) 564-3940

April 6, 1998

Lucian A. Dade  
Vice President  
SouthEast Telephone  
P.O. Box 444  
Hopkinsville, Kentucky 42240

Dear Mr. Dade:

This is in response to your March 6, 1998 letter regarding whether issuance of a Certificate of Public Convenience and Necessity ("CPCN") is necessary prior to construction of wooden utility poles used to support antenna configurations for wireless telecommunications service.

KRS 278.020 and 807 KAR 5:001, Section 9, set forth the general legal standards in regard to obtaining a CPCN for constructing new plant. KRS 278.650 and 807 KAR 5:063, expand the requirements for antenna towers for the purpose of providing wireless telecommunications service. None of these provisions of law requires that the type of structure you describe require a CPCN.

KRS 278.020(1), provides that no one shall begin constructing a facility for furnishing utility service without a CPCN "except ... ordinary extensions of existing systems in the usual course of business." 807 KAR 5:001, Section 9(3), in turn, defines "usual course of business" construction as [1] that which does not "create wasteful duplication of plant," does not conflict with "service of other utilities," and does not involve sufficient money to "materially affect" the utility's financial condition; or [2] that which does not result in "increased charges" to the utility's customers. It is perfectly reasonable to conclude that what is essentially a "telephone pole" does not materially affect a utility's financial condition; nor is it likely to increase charges to customers.<sup>1</sup> Wasteful duplication of plant is not an issue; nor, in a competitive market, is "conflict" with other utilities an issue. Thus, pursuant to KRS 278.020 and 807 KAR 5:001, Section 9(3), construction of poles to provide wireless telecommunications service is construction in the usual course of business for which no CPCN is necessary.

<sup>1</sup> Of course, this Commission does not regulate the rates of wireless telecommunications carriers and would not require a certificate on these grounds.

Because these facilities are built to provide wireless telecommunications service, however, the inquiry cannot end there. It is also necessary to examine KRS 278.650 — a statute that applies only to PCS and cellular construction — to determine whether PSC proceedings are necessary prior to construction of these poles. Our opinion is that they are not.

The requirements of KRS 278.650 are triggered when a utility proposes "construction of an antenna tower for cellular telecommunications services or personal communications services..." The statute consistently refers to the construction it addresses as a "tower." It is illogical to characterize a 90-foot telephone pole as a "tower." Further, it would appear discriminatory to define a telephone pole as a "tower" in order to impose restrictions and expenses on wireless companies, when telephone poles placed by wireline providers are not subject to those restrictions and expenses. Finally, the engineering concerns related to construction requiring elaborate foundation design simply are not implicated by the erection of telephone poles.

Therefore, the Commission will not require a CPCN filing for construction of wooden utility poles. However, any company wishing to install wooden poles on which to mount antennas to provide wireless service should, prior to installation, submit to the Commission a letter fully describing the proposed installation. Commission staff will review the information provided and will provide the utility with its determination regarding whether the "usual course of business" exception applies. Utilities should be aware that they must still comply with local permit requirements regardless of Commission staff's determination in regard to the need for a CPCN.

If you have any further questions, please contact Jeff Johnson of our Engineering staff at 502/564-3940.

Sincerely,

  
Helen C. Helton

PUBLIC SERVICE  
COMMISSION

Re: Public Notice – Kentucky Public Service Commission  
Docket No. 99-182

Dear Executive Director, Public Service Commission:

We do not agree to the proposed construction of the 85 foot wood laminate monopole with attached antennas and equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. Our property is the adjoining property at 3912 South Fifth Street, Louisville, Kentucky, Jefferson County, 40208. This is a residential property and to install this antenna would depreciate the value of our property and cause an eyesore to the neighborhood.

We have owned our property at 3912 South Fifth Street Louisville, Kentucky 40208 several years prior to the owners of the property at 3910 South Fifth Street. The owner of the property at 3910 South Fifth Street, Louisville, Ky., 40208, does not live on these premises and this antenna is not being installed next to his residence. If it were being installed next to your residential property you would be opposed to it as well.

We hope you will consider our views and the fact that this antenna is making some people wealthy at the same time it is not only depreciate the value of our property, it is also depreciating this neighborhood.

We would like to bring to your attention our correct mailing address, it should read 2616 Sunningdale Place West, LaGrange, Ky. 40031. Because of the incorrect spelling and the wrong house numbers in our address, this is the first notification we received. Please make the correction to our mailing address so that we can receive any further information regarding this proposal.

Sincerely,

James & Mary Ray

Re: Sprint Spectrum, L.P.  
Case No. 99-182

Dear Ms. Keene:

The Commission is in receipt of an application you filed on behalf of Sprint Spectrum, L.P. for a Certificate of Public Convenience and Necessity to construct and operate a Personal Communications Services facility at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky.

Commission staff has thoroughly reviewed the application and finds that it is not ripe for filing. Commission Regulation 807 KAR 5:063, Section 2(3) presupposes that a proposal for the facility has been submitted to the planning commission and that the planning commission has rendered a final decision or that it has not rendered a decision and the statutory sixty days have passed. Sprint's proposal for the facility was submitted to the Louisville and Jefferson County Planning Commission on May 11, 1999 and no decision has been rendered. Therefore, pursuant to 807 KAR 5:001, Section 2, the application filed with this Commission by Sprint Spectrum on May 13, 1999 in Case No. 99-182 is rejected and will be removed from the docket.

Sincerely,

  
Helen C. Helton

CERTIFICATE OF PUBLIC CONVENIENCE AND )  
NECESSITY TO CONSTRUCT A PERSONAL ) CASE NO. 99-182  
COMMUNICATIONS SERVICES FACILITY )  
IN THE LOUISVILLE MAJOR TRADING AREA )  
[CHURCHILL DOWNS FACILITY ] )

**APPLICATION**

WirelessCo., L.P., by and through its agent and general partner, Sprint Spectrum, L.P. (hereinafter "Sprint Spectrum") hereby applies for a Certificate of Public Convenience and Necessity to construct and operate a Personal Communications Services ("PCS") facility to complement the network which will serve the customers of the Louisville Major Trading Area ("MTA"). In support of this Application, Sprint Spectrum respectfully states the following.

1. The complete name and address of the Applicant is: Sprint Spectrum, L.P., agent and general partner for WirelessCo., L.P., 11390 Old Roswell Road, Suite 100, Alpharetta, Georgia 30004.
2. WirelessCo., L.P., is a Delaware Limited Partnership. The Kentucky Public Service Commission (the "Commission") has found that it has the technical, managerial and financial ability to operate a Commercial Mobile Radio Service ("CMRS") in the order dated April 23, 1996, Case Number 96-077. A copy of WirelessCo's Articles of Incorporation were attached as an exhibit to the Application in those proceedings.

3. Sprint Spectrum proposes to construct a monopole facility at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky, an area located entirely within the Louisville M.T.A.

Applicant refers to the site of such tower, for shorthand purposes, as the "Chuchill Downs" site.

4. The proposed PCS facility will consist of a 75 foot monopole , with attached antennas extending upward for a maximum total height of 85 feet, and a concrete pad to accommodate two (2) base transceiver station (BTS) units. The BTS units will consist of one (1) current unit and one (1) future unit. The Applicant's ground equipment (BTS units) will be located inside an adjacent garage building owned by CRI Heating and Cooling. Tower design information, including the vertical tower profile, is attached hereto as Exhibit "A."

5. The site development plan, signed and sealed by a professional engineer registered in Kentucky is included as Exhibit "B". A survey, signed and sealed by a professional land surveyor licensed in Kentucky, that shows the proposed location of the tower and all easements and existing structures within 500 feet of the proposed site and all easements and structures within 200 feet of the access drive, including the intersection with the public street system, is included as Exhibit "B." The site development plan and survey of the property were prepared by H.E. Rudy Consulting Engineers. Certification, by a professional surveyor licensed in Kentucky, that the proposed facility is not located within a 100 year flood plain is included as Exhibit "B-1." Thus, a detailed description of the manner in which the proposed facility will be constructed may be found in Exhibits "A" and "B," and "B-1."

6. According to the Public Service Commission website, the names of all public utilities, corporations, or persons operating within Jefferson County and with whom the proposed new construction is likely to compete are: Kentucky CGSA, d/b/a/ BellSouth Mobility, Alltel Kentucky, Inc., and BellSouth Telecommunications, Inc.

7. Public convenience and necessity require the construction of this proposed PCS facility.

The proposed PCS facility is essential to implement service to Sprint Spectrum's current and future customers. The Facility also is necessary in accordance with FCC mandates for Sprint Spectrum's license in the Louisville M.T.A.

The process that was used in selecting the site for the proposed PCS facility by the Applicants was consistent with the process used for selecting all other existing and proposed PCS facilities within the Louisville M.T.A. In its initial design phase, Sprint Spectrum utilized an FCC database which identifies all existing towers and attempted to position its search rings in such a way so as to maximize co-location opportunities. For search rings in which no existing telecommunications towers existed (or where said towers were not reasonably available for collocation), such as the site proposed herein, Applicant investigated said search rings to locate tall buildings, water tanks, and other suitable, collocatable structures. No suitable collocatable structures were identified within the vicinity of Sprint Spectrum's search ring. A map, drawn to scale, which clearly depicts Sprint Spectrum's search area is attached hereto as "Exhibit C."

The Applicant's engineers selected the optimum site in terms of elevation and location to provide the best quality service to its wireless communications customers in the service area. The search by the engineers for a proposed PCS facility included the measurement of signal levels from other proposed PCS facilities inside the Louisville M.T.A. The criteria used to identify uninterrupted service required the engineers to look for signal strengths above -100dBm. This particular level is determined to be the minimum signal for PCS phones to function adequately.

8. The proposed PCS facility will serve Kentucky customers in an area totally within Applicants' proposed service area in the Louisville M.T.A.

9. The proposed PCS facility design has been developed with consideration to severe wind load of 70 m.p.h., which conforms to standard EIA/TIA-222-F. The Electronic Industries

Association Standards are accepted by the American National Standards Institute and the proposed facility is a nationally accepted tower design.

10. The soil boring and subsequent geotechnical engineering study were performed by Terracon, which has performed hundreds of such studies for the cellular industry and others of similar interest. Terracon's offices are located 718 Airpark Center Drive, Nashville, Tennessee. The principal engineer for the site is Timothy G. LaGrow, a registered Professional Engineer for the Commonwealth of Kentucky. A copy of the Report of Geotechnical Exploration dated February 1, 1999 is attached hereto as Exhibit "D" A copy of the Applicant's NEPA checklist is attached as Exhibit "E."

The full legal description of the lease area is included in Exhibit "B."

11. The foundation design for this proposed tower and PCS facility has been developed with the information provided in Terracon's geotechnical report. The final design for the foundation is included with Exhibit "B".

12. Personnel directly responsible for the design and construction of the proposed facility are qualified and experienced. The initial design of the tower and foundations was performed by E-Lam Laminated Wood Systems, Inc. The engineer of the design is Matthew J. Young, P.E. The construction of the proposed PCS facility will be performed by Heinz-Fischer, Inc. The construction superintendent is Jeff C. Fischer. Heinz-Fischer has been in the construction business for over 50 years; and specializes in construction of telecommunications facilities. Currently, Heinz-Fischer handles 60% of the St. Louis, Missouri wireless market. Over the past ten years Heinz-Fischer also has constructed facilities in several markets across the country.

In the event the initial design of the tower and foundation is subsequently revised, the Applicants will amend this Application accordingly and will file with the Commission original and final

drawings pursuant to applicable laws and regulations.

13. An aeronautical study was performed by Airspace Safety Analysis Corporation ("ASAC"). ASAC determined that a structure height of 85' AGL does not exceed any FAR Part 77 or any FCC part 17 notice requirements, thus FAA notice is not required. A copy of the ASAC report is attached as Exhibit "F." Said aeronautical study also indicates that it is not necessary to file any application/notice of construction with the Kentucky Airport Zoning Commission (KAZC).

14. Form 854 will be submitted to the FCC as required pending determination by the FAA. Since the proposed PCS facility will serve only the Louisville M.T.A., no further approvals by the FCC are required. See 47 C.F.R. 24.11 (b), "[b]lanket licenses are granted for each market and frequency block. Applications for individual sites are not required and will not be accepted."

15. The site for the proposed PCS facility is being leased from CRI, Inc. A copy of the lease Agreement, with financial terms redacted, is attached as Exhibit "G."

16. Appropriate notices (in compliance with 807 KAR 5:063 Section 2 (1)), 2' x 4' , with the word "MONOPOLE" in letters at least 4" high, have been posted in a visible location on the proposed site and on the nearest public road and shall remain posted for at least two (2) weeks after the Application is filed. The location of the proposed facility has been published in the Courier Journal, a newspaper of general circulation in Jefferson County, Kentucky.

17. Clear directions to the proposed site from the county seat are set forth in Exhibit "H." Said directions were prepared by C. Bruce Snook, H.E. Rudy, Inc., whose telephone number is (502) 584-4118.

18. Prior to filing this Application, Sprint Spectrum submitted its proposal for the facility

described herein to the Louisville and Jefferson County Planning Commission. Said proposal was submitted on 5-11-99. Copies of information submitted to said planning commission, in addition to the documents and information supplies in this Application, are included as "Exhibit I."

19. Applicant has notified every person who, according to the records of the property valuation administrator, owns property within 500 feet of the proposed tower by certified mail, return receipt requested, of the proposed construction; has been given the docket number under which the proposed Application will be processed; and has been informed of his or her right to request intervention.

20. A list of the property owners so notified is attached as Exhibit "J", together with copies of the certified letters sent to listed property owners. Copies of the return receipts will be filed with the Commission when received.

21. The area, as depicted in Exhibits "B", in which the proposed facility is to be constructed is zoned R-5. CRI, Inc., a Heating and Cooling business, owns and occupies the area of the proposed facility.

22. Applicant has considered the likely effects of the installation on nearby land uses and values and has concluded that there is no more suitable location reasonably available from which adequate service can be provided. Applicant investigated the possibility of co-location, but there are no like facilities or other tall structures within the Applicant's search ring upon which Applicant can reasonably collocate. Applicant submitted a proposal to Churchill Downs to replace an existing Louisville Gas and Electric utility pole with a pole which could support Applicants' wireless telecommunications equipment. Churchill Downs declined Applicant's proposal based upon its Master Plan for expansion. A copy of a letter from the General Manager of Churchill Downs is attached hereto as "Exhibit K."

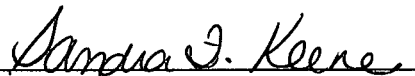

A temporary Cell on Wheels owned by BellSouth Mobility is currently on the property of the proposed facility. It is Applicant's understanding that BellSouth uses said temporary facility during

Kentucky Derby week. Applicant requires a permanent facility in this area, and the proposed facility will be structurally capable of handling an additional carrier.

Because of the dense development of the area within Applicant's search ring, the proposed site is the only area identified within the search which has adequate space available for Applicant's equipment. Applicant's ground equipment will be located inside a garage area with a wooden monopole build outside next to said garage, in a large parking area.

23. Any response to this Application may be directed to Mark W. Dobbins or Sandra F. Keene at 1400 One Riverfront Plaza, Louisville, Kentucky 40222 or by calling (502)584-6137.

Respectfully submitted,

Mark W. Dobbins

### Maximum Allowable Bending Stress

Maximum Allowable Bending Stress =  $F_b \times$  Adjustment Factors

$$F_{bx} = 2400 \text{ p.s.i.}$$

$$F_{by} = 1500 \text{ p.s.i. (Actual lay-up meets or exceed U.B.C. 24F-V6 layup.)}$$

$$F_{bx-x} = F_{bx} \times C_v \times C_d \times C_w = 2,624 \text{ p.s.i.}$$

$$F_{by-y} = F_{by} \times C_{fu} \times C_d \times C_w = 1,939 \text{ p.s.i.}$$

$C_v$  = Volume Reduction Factor, p. 2-824 U.B.C., 1994 and p. 4-103 A.I.T.C. Fourth Edition, 1994

$$C_v = 0.854$$

$C_d$  = Load Duration Factor, p.2-810 U.B.C., 1994

$$C_d = 1.6$$

$C_{fu}$  = Flat Use Factor, pp. 4-102 to 4-103. A.I.T.C. Fourth Edition, 1994

$$C_{fu} = 1.01$$

$C_w$  = Wet Use Factor, p. 2-877 U.B.C., 1994

$$C_w = 0.8$$

Maximum Allowable Stress (Trans.) = 2,624 p.s.i.

Maximum Allowable Stress (Long.) = 1,939 p.s.i.

### Calculated Bending Stresses at Groundline

Transverse		Longitudinal	
S (in. <sup>3</sup> ) =	1,472.2	S (in. <sup>3</sup> ) =	1,221.2
G.L.M. =	213,138 ft-lbs	G.L.M. =	194,442 ft-lbs
Max. Calc. Bend. Stress (p.s.i.) =	1,737	Max. Calc. Bend. Stress (p.s.i.) =	1,911
OK	1,737 < 2,624	OK	1,911 < 1,939

**Embedment Recommendation (per U.B.C. Eqn. 6-1)**

Allow. Found. Pres. at 1/3 Depth = 1,000 p.s.f.

(Per February 1, 1999 Soils Report & 1994 U.B.C.)

Resultant Load (P) = 5,154 lbs.

Resultant Loc. (h) = 41.36 ft.

Foundation Diameter = 5.0 ft.

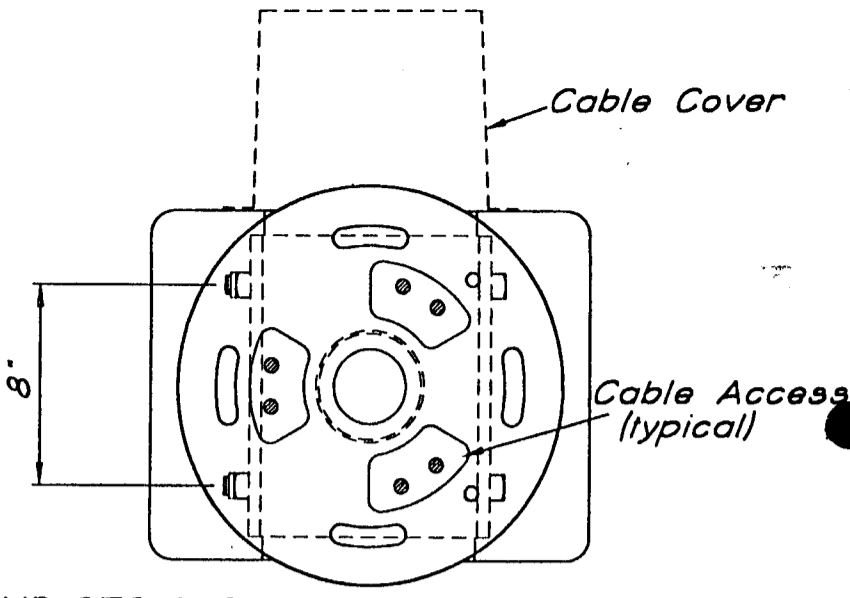

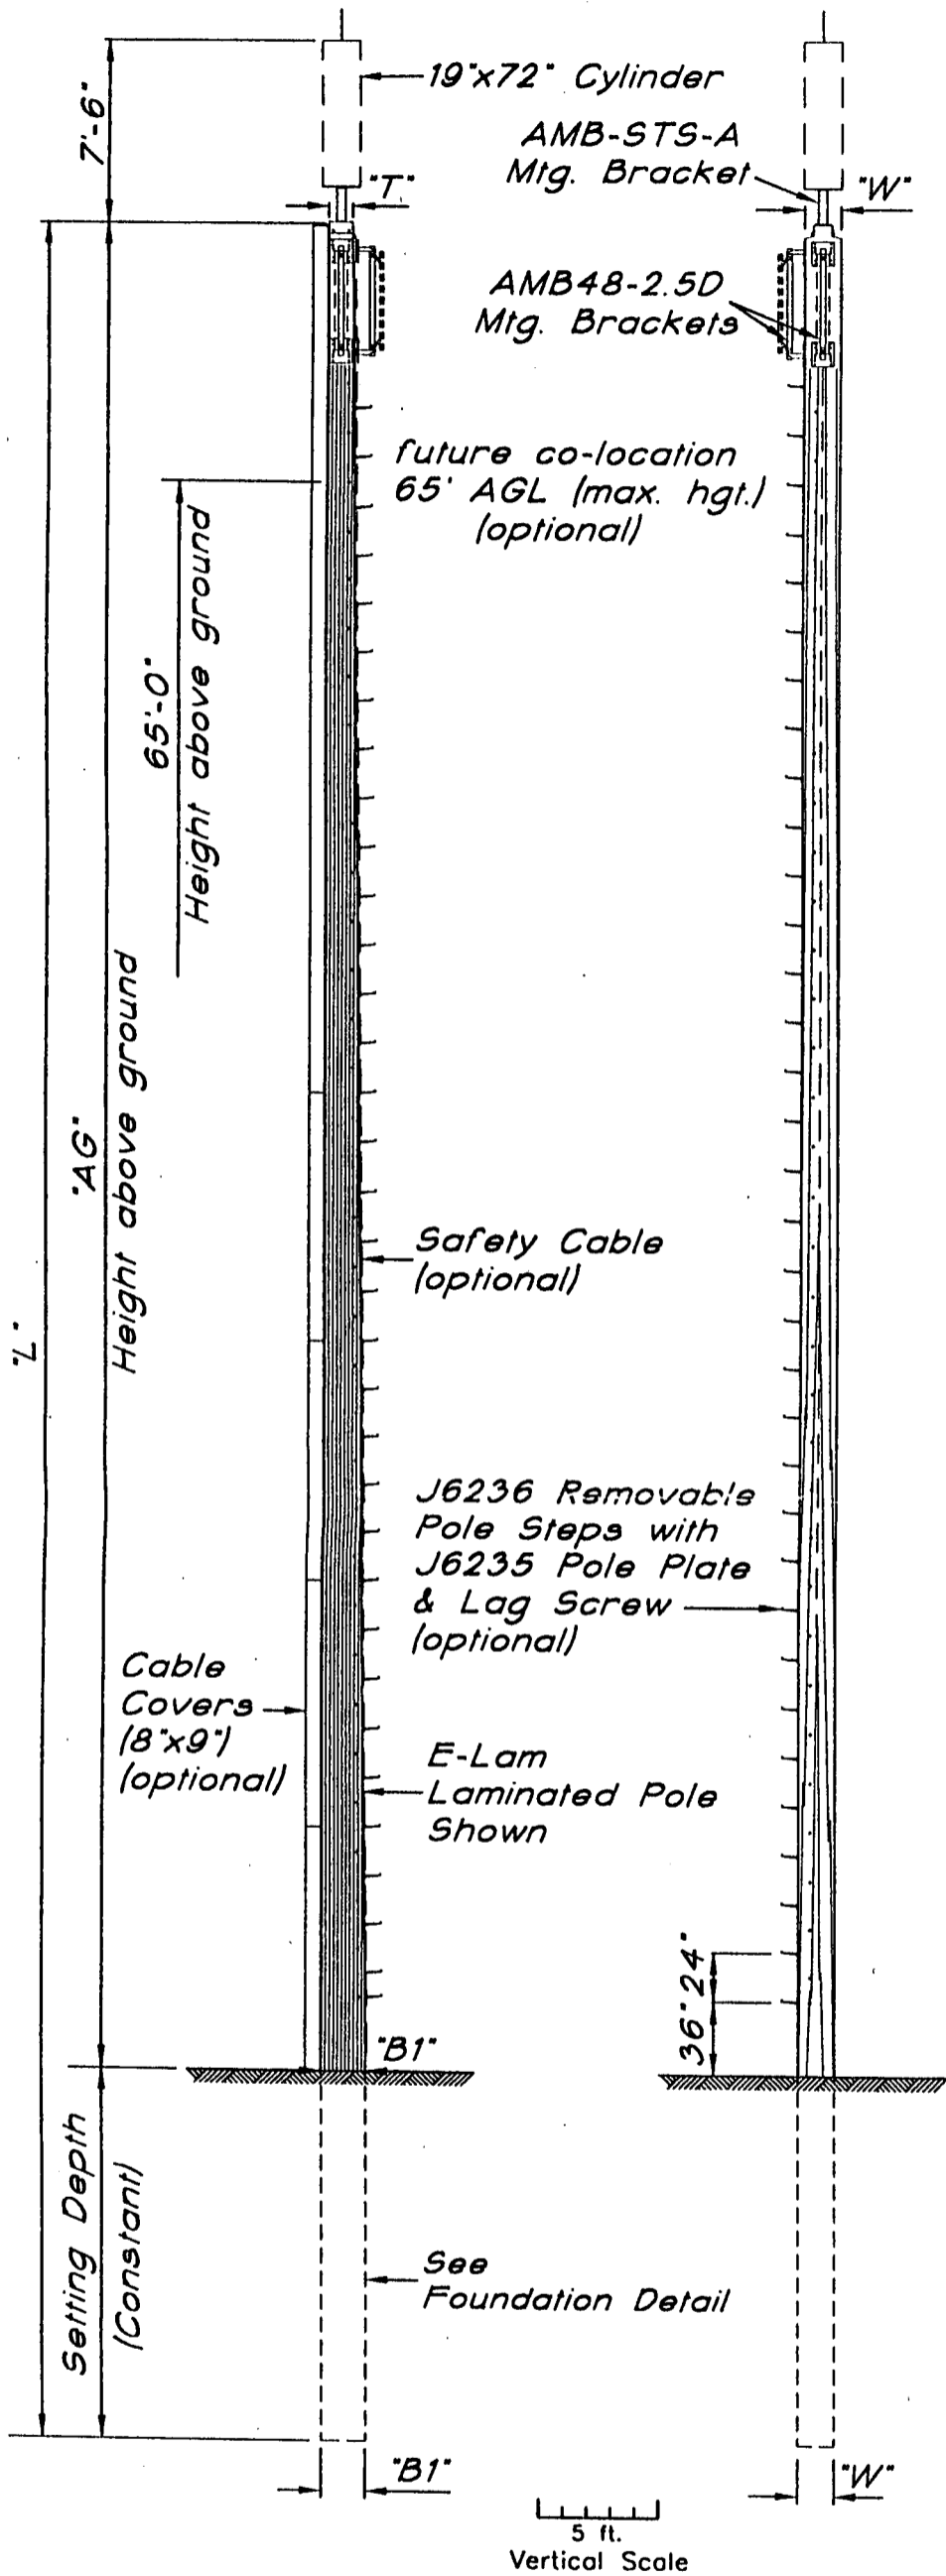

Foundation Depth = 15.0 ft.

d = Min. Depth per U.B.C. Eqn. 6-1

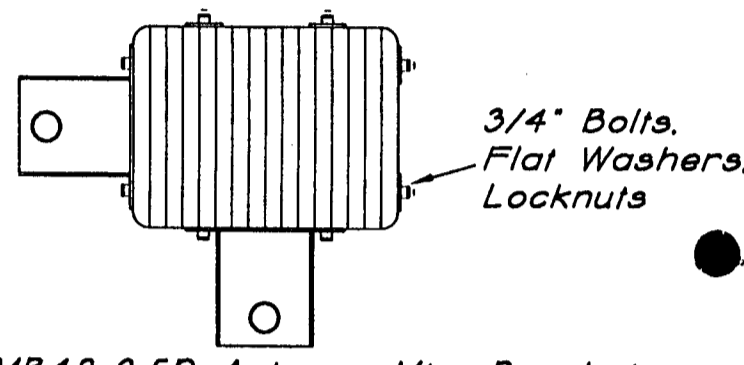

A = 2.41

d = 11.7 ft.

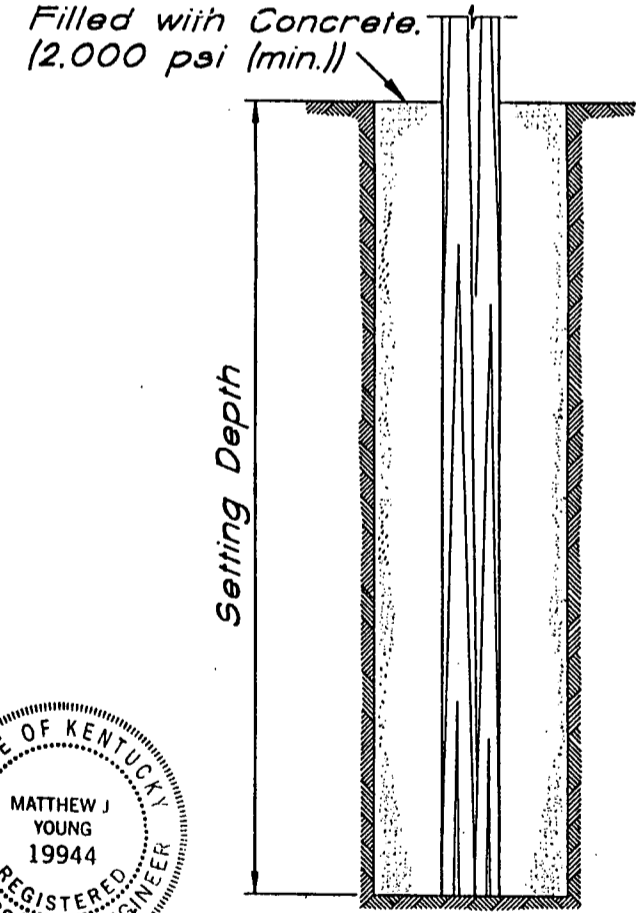

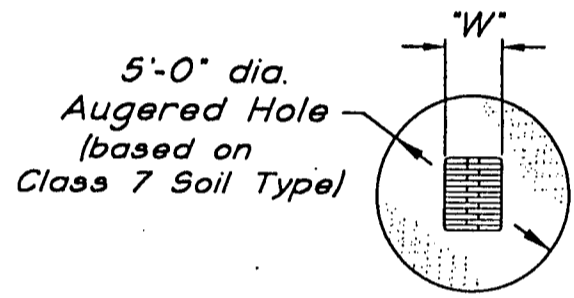

Therefore, the actual embedment depth of 15.0 feet exceeds the minimum embedment depth of 11.7 feet as calculated per U.B.C. Eqn. 6-1.

$$F_{bx-x} = F_{bx} \times C_v \times C_d \times C_w = 2,624 \text{ p.s.i.}$$

$$F_{by-y} = F_{by} \times C_{fu} \times C_d \times C_w = 1,939 \text{ p.s.i.}$$

$C_v$  = Volume Reduction Factor, p. 2-824 U.B.C., 1994 and p. 4-103 A.I.T.C. Fourth Edition, 1994

$$C_v = 0.854$$

$C_d$  = Load Duration Factor, p.2-810 U.B.C., 1994

$$C_d = 1.6$$

$C_{fu}$  = Flat Use Factor, pp. 4-102 to 4-103. A.I.T.C. Fourth Edition, 1994

$$C_{fu} = 1.01$$

$C_w$  = Wet Use Factor, p. 2-877 U.B.C., 1994

$$C_w = 0.8$$

Maximum Allowable Stress (Trans.) = 2,624 p.s.i.

Maximum Allowable Stress (Long.) = 1,939 p.s.i.

### Calculated Bending Stresses at Groundline

<b>Transverse</b>		<b>Longitudinal</b>	
$S \text{ (in.}^3\text{)} = 1,472.2$		$S \text{ (in.}^3\text{)} = 1,221.2$	
G.L.M. = 213,138 ft-lbs		G.L.M. = 194,442 ft-lbs	
Max. Calc. Bend. Stress (p.s.i.) = 1,737		Max. Calc. Bend. Stress (p.s.i.) = 1,911	
OK 1,737 < 2,624		OK 1,911 < 1,939	

**Embedment Recommendation (per U.B.C. Eqn. 6-1)**

Allow. Found. Pres. at 1/3 Depth = 1,000 p.s.f.

(Per February 1, 1999 Soils Report & 1994 U.B.C.)

Resultant Load (P) = 5,154 lbs.

Resultant Loc. (h) = 41.36 ft.

Foundation Diameter = 5.0 ft.

Foundation Depth = 15.0 ft.

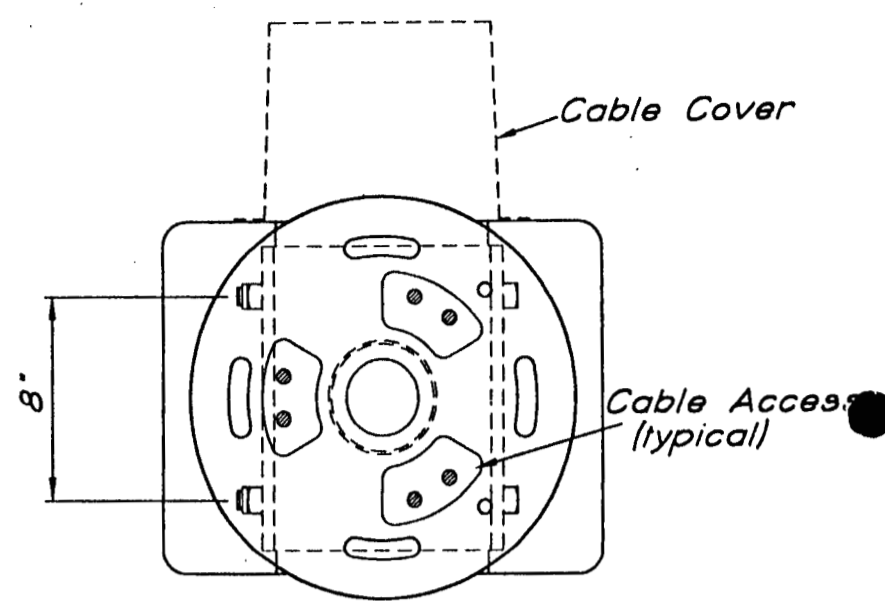

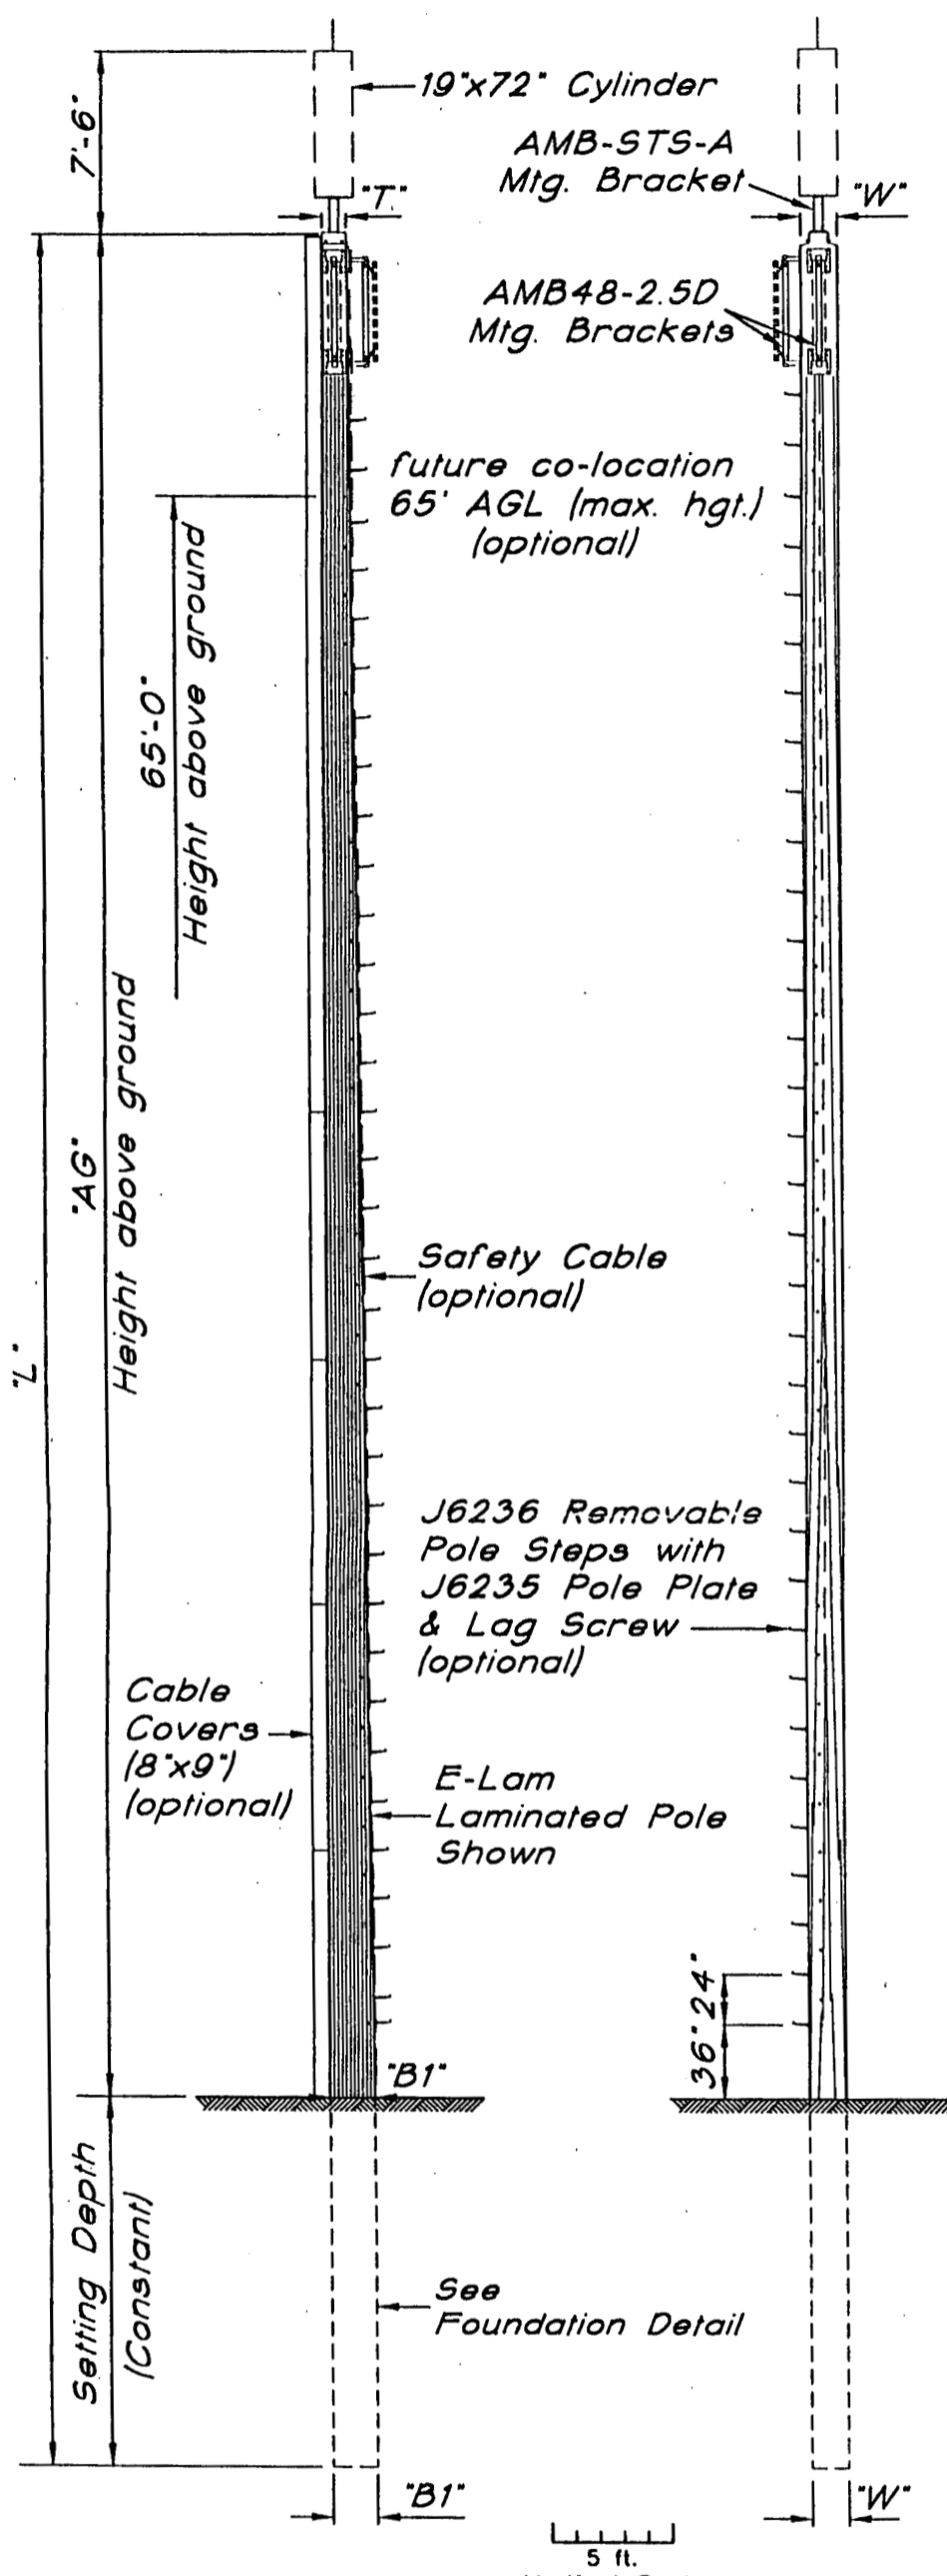

d = Min. Depth per U.B.C. Eqn. 6-1

A = 2.41

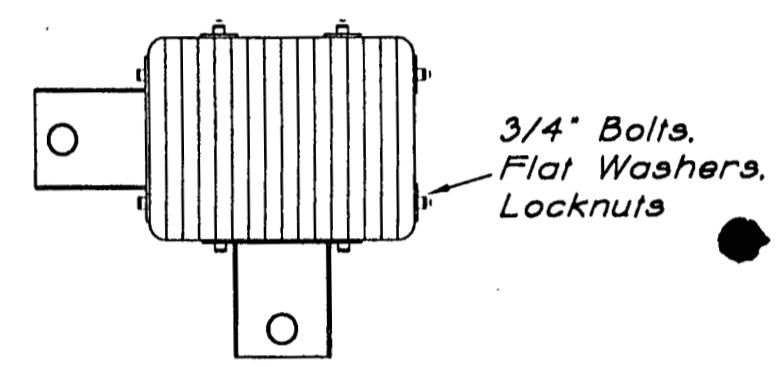

d = 11.7 ft.

Therefore, the actual embedment depth of 15.0 feet exceeds the minimum embedment depth of 11.7 feet as calculated per U.B.C. Eqn. 6-1.

### Maximum Allowable Bending Stress

Maximum Allowable Bending Stress =  $F_b \times$  Adjustment Factors

$$F_{bx} = 2400 \text{ p.s.i.}$$

$$F_{by} = 1500 \text{ p.s.i. (Actual lay-up meets or exceed U.B.C. 24F-V6 layup.)}$$

$$F_{bx-x} = F_{bx} \times C_v \times C_d \times C_w = 2,624 \text{ p.s.i.}$$

$$F_{by-y} = F_{by} \times C_{fu} \times C_d \times C_w = 1,939 \text{ p.s.i.}$$

$C_v$  = Volume Reduction Factor, p. 2-824 U.B.C., 1994 and p. 4-103 A.I.T.C. Fourth Edition, 1994

$$C_v = 0.854$$

$C_d$  = Load Duration Factor, p.2-810 U.B.C., 1994

$$C_d = 1.6$$

$C_{fu}$  = Flat Use Factor, pp. 4-102 to 4-103. A.I.T.C. Fourth Edition, 1994

$$C_{fu} = 1.01$$

$C_w$  = Wet Use Factor, p. 2-877 U.B.C., 1994

$$C_w = 0.8$$

$$\text{Maximum Allowable Stress (Trans.)} = 2,624 \text{ p.s.i.}$$

$$\text{Maximum Allowable Stress (Long.)} = 1,939 \text{ p.s.i.}$$

### Calculated Bending Stresses at Groundline

<b>Transverse</b>		<b>Longitudinal</b>	
$S \text{ (in.}^3\text{)} = 1,472.2$		$S \text{ (in.}^3\text{)} = 1,221.2$	
G.L.M. = 213,138 ft-lbs		G.L.M. = 194,442 ft-lbs	
Max. Calc. Bend. Stress (p.s.i.) =	1,737	Max. Calc. Bend. Stress (p.s.i.) =	1,911
OK	1,737 < 2,624	OK	1,911 < 1,939

### Embedment Recommendation (per U.B.C. Eqn. 6-1)

Allow. Found. Pres. at 1/3 Depth = 1,000 p.s.f.

(Per February 1, 1999 Soils Report & 1994 U.B.C.)

Resultant Load (P) = 5,154 lbs.

Resultant Loc. (h) = 41.36 ft.

Foundation Diameter = 5.0 ft.

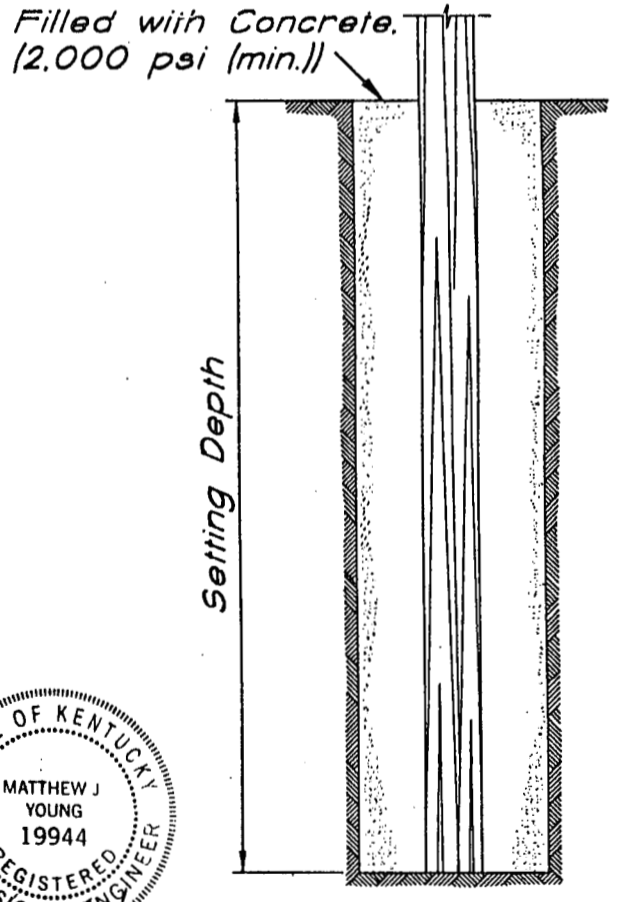

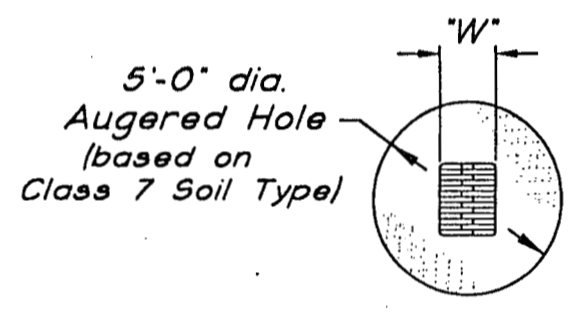

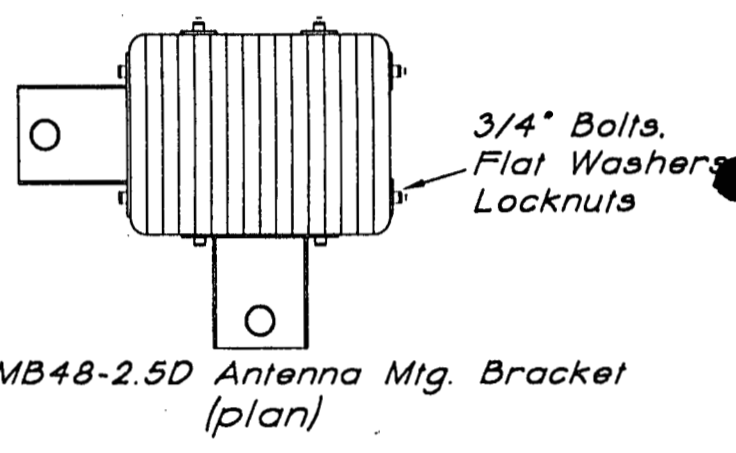

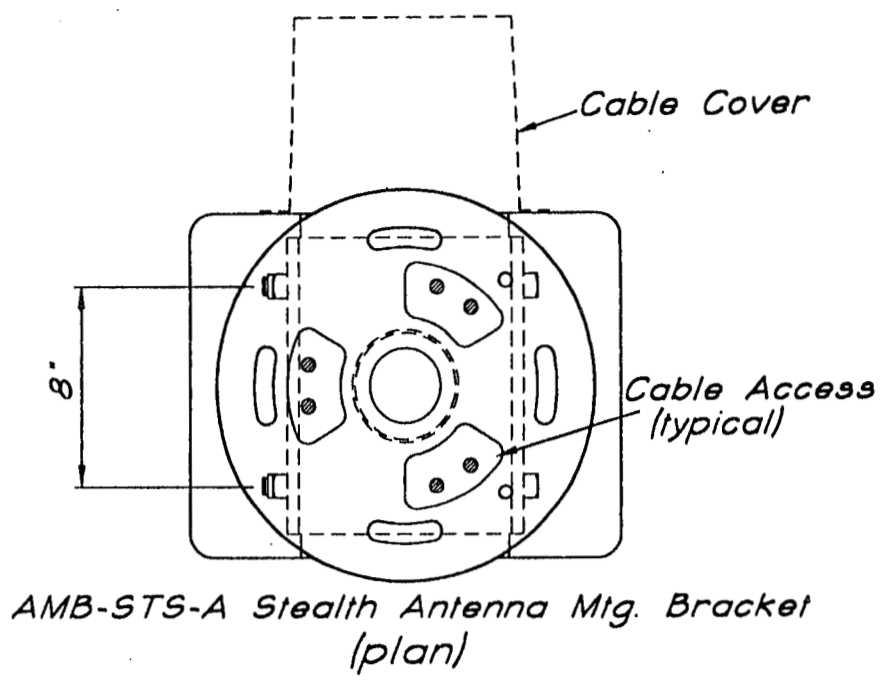

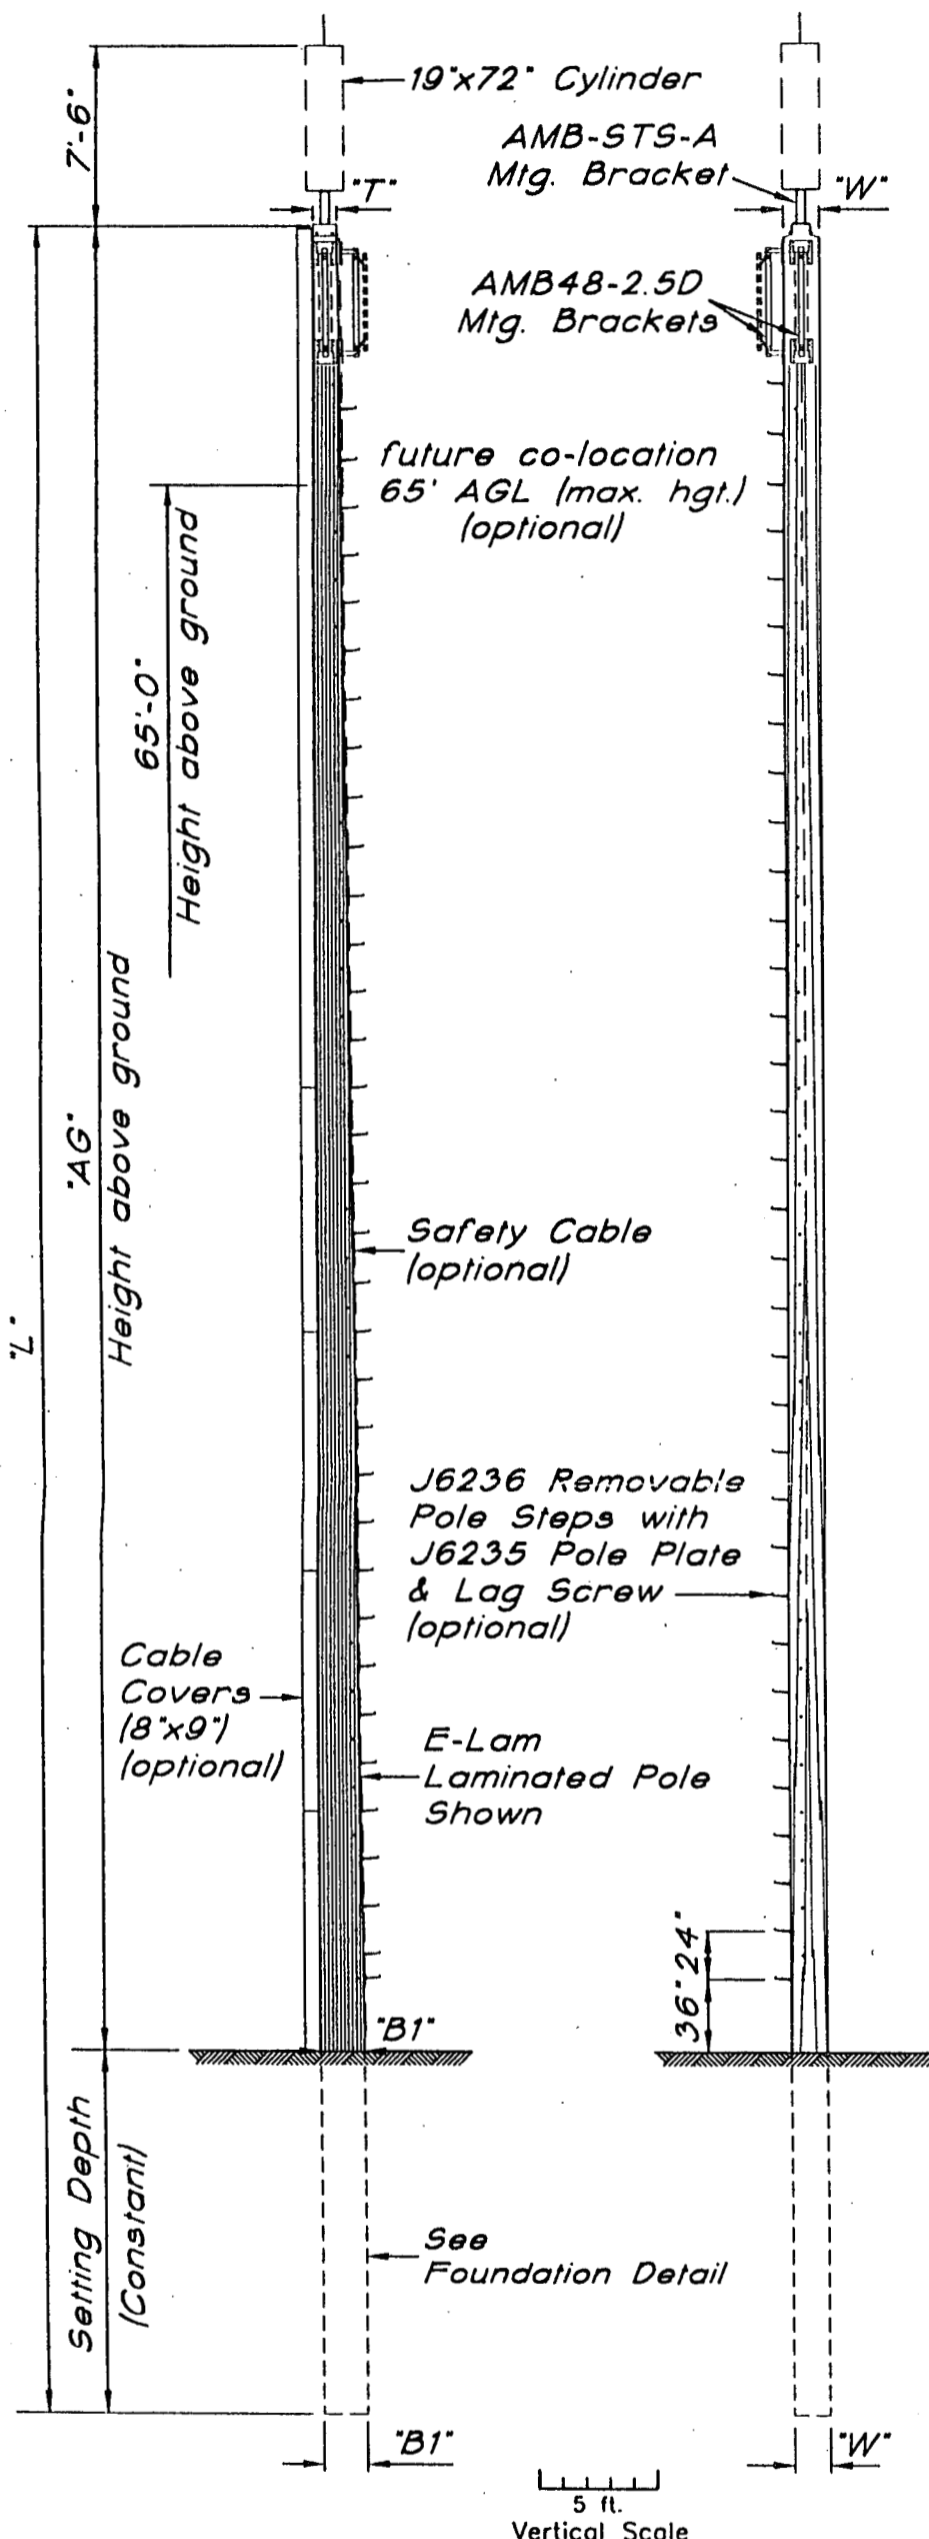

Foundation Depth = 15.0 ft.

d = Min. Depth per U.B.C. Eqn. 6-1

A = 2.41

d = 11.7 ft.

Therefore, the actual embedment depth of 15.0 feet exceeds the minimum embedment depth of 11.7 feet as calculated per U.B.C. Eqn. 6-1.

$C_d$  = Load Duration Factor, p.2-810 U.B.C., 1994

$$C_d = 1.6$$

$C_{fu}$  = Flat Use Factor, pp. 4-102 to 4-103. A.I.T.C. Fourth Edition, 1994

$$C_{fu} = 1.01$$

$C_w$  = Wet Use Factor, p. 2-877 U.B.C., 1994

$$C_w = 0.8$$

$$\text{Maximum Allowable Stress (Trans.)} = 2,624 \text{ p.s.i.}$$

$$\text{Maximum Allowable Stress (Long.)} = 1,939 \text{ p.s.i.}$$

### Calculated Bending Stresses at Groundline

<b>Transverse</b>		<b>Longitudinal</b>	
$S \text{ (in.}^3\text{)} = 1,472.2$		$S \text{ (in.}^3\text{)} = 1,221.2$	
G.L.M. = 213,138 ft-lbs		G.L.M. = 194,442 ft-lbs	
Max. Calc. Bend. Stress (p.s.i.) =	1,737	Max. Calc. Bend. Stress (p.s.i.) =	1,911
OK	1,737 < 2,624	OK	1,911 < 1,939

### Embedment Recommendation (per U.B.C. Eqn. 6-1)

Allow. Found. Pres. at 1/3 Depth = 1,000 p.s.f.

(Per February 1, 1999 Soils Report & 1994 U.B.C.)

Resultant Load (P) = 5,154 lbs.

Resultant Loc. (h) = 41.36 ft.

Foundation Diameter = 5.0 ft.

Foundation Depth = 15.0 ft.

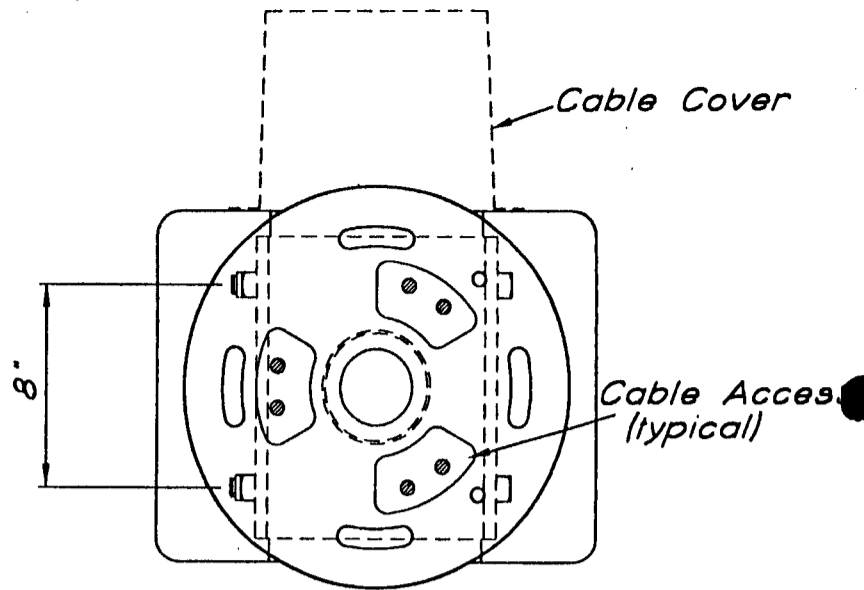

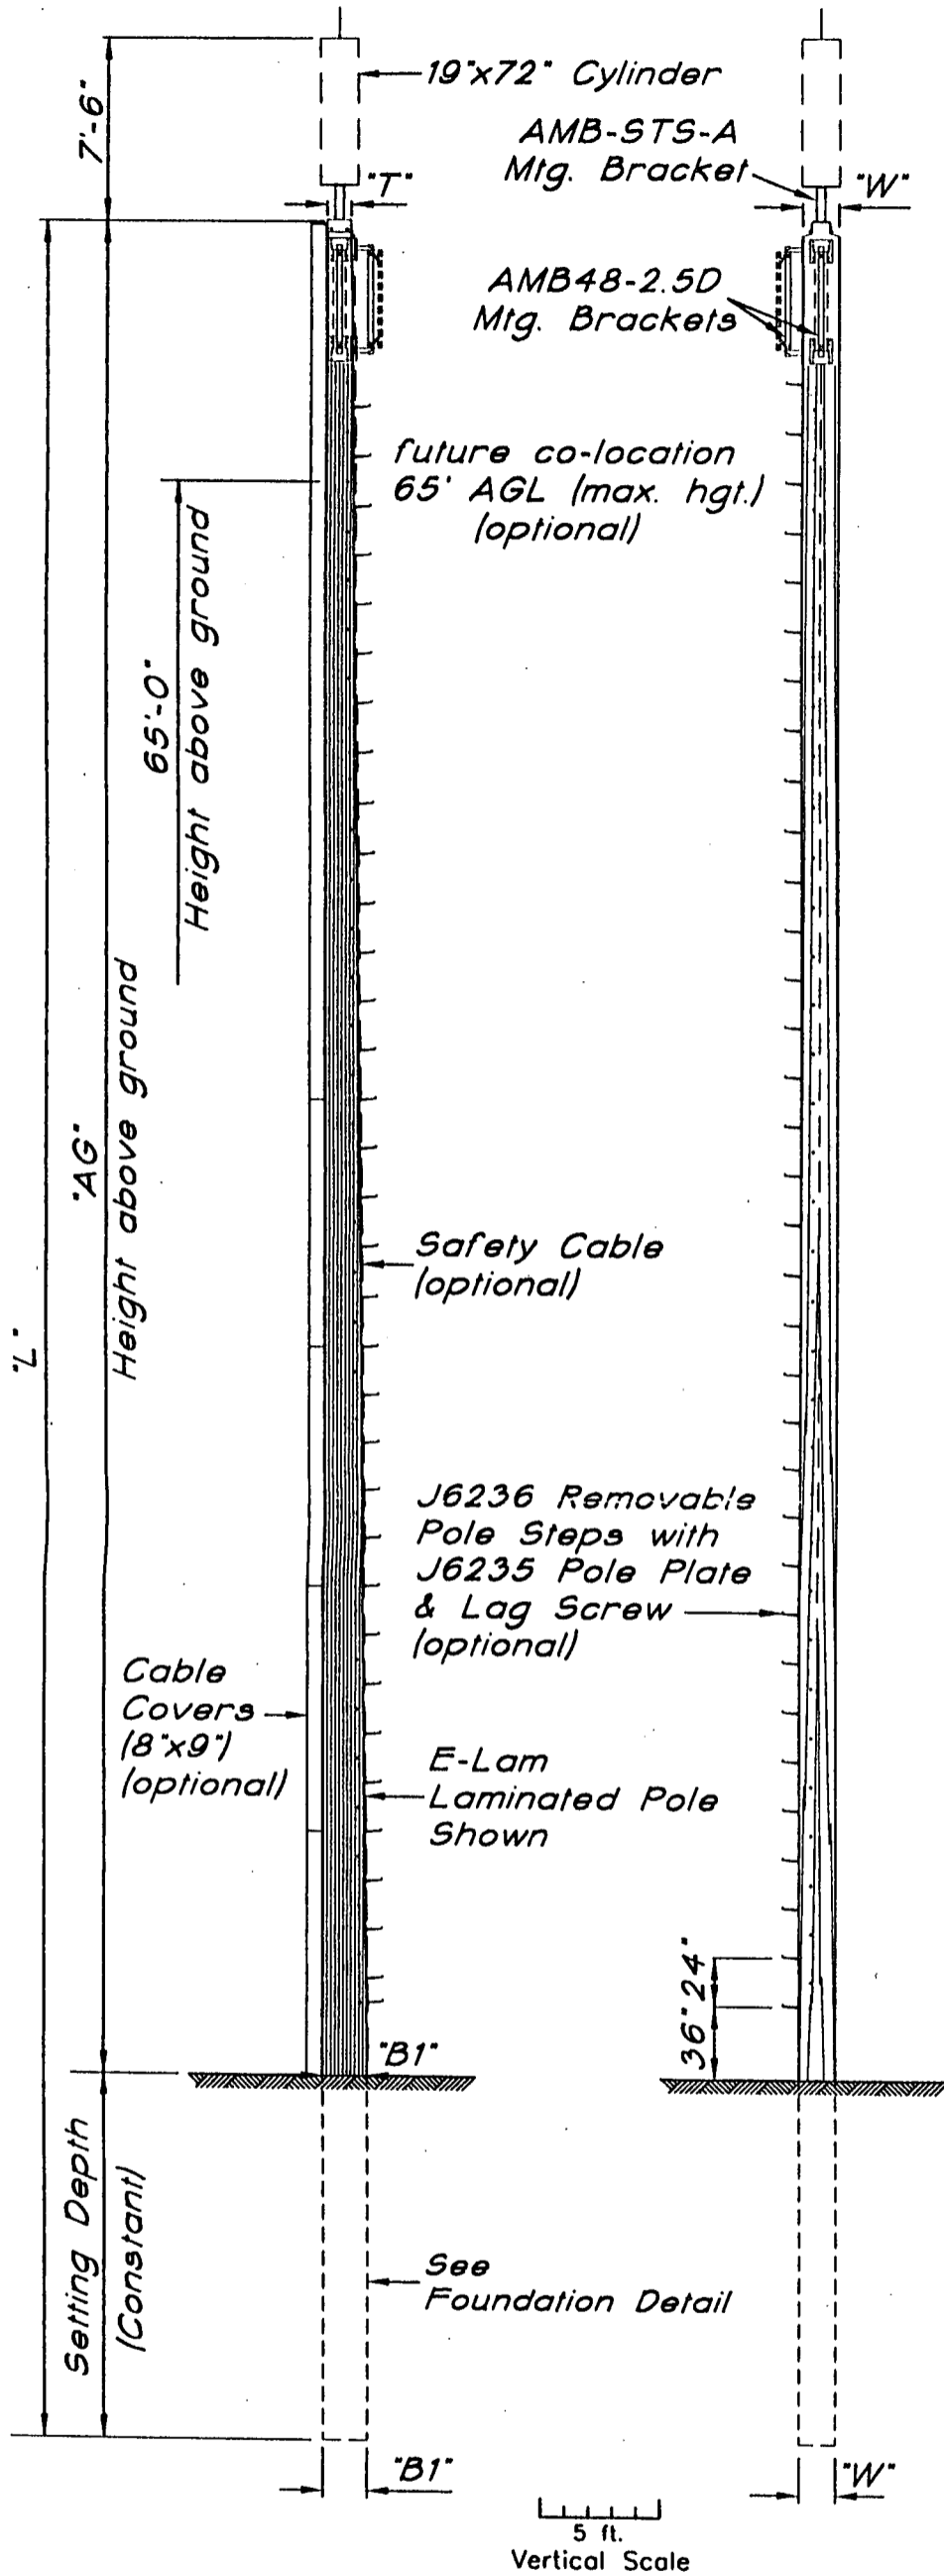

d = Min. Depth per U.B.C. Eqn. 6-1

A = 2.41

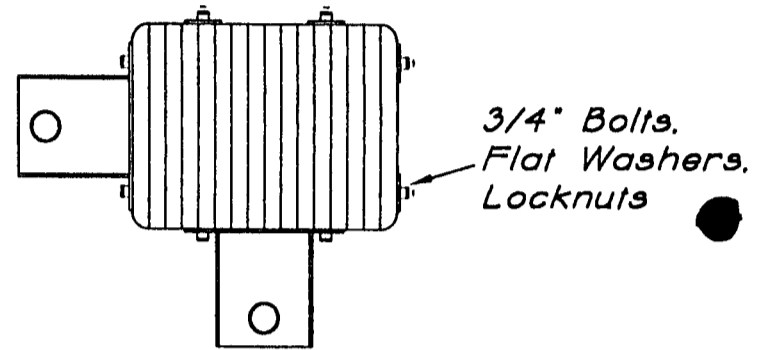

d = 11.7 ft.

Therefore, the actual embedment depth of  
minimum embedment depth of

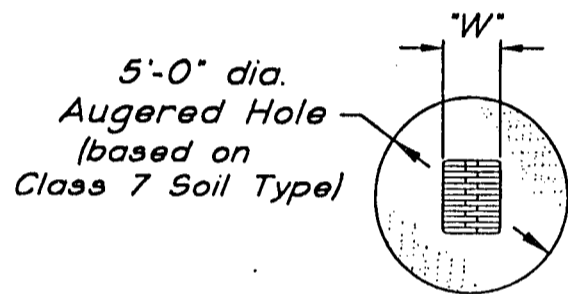

15.0 feet exceeds the  
11.7 feet as calculated per U.B.C. Eqn. 6-1.

Project No. 18995010

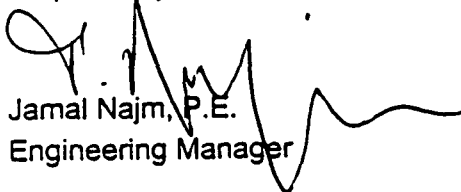

Dear Mr. Tang:

The subsurface exploration for the proposed communication tower planned at the Churchhill Downs site in Louisville, Kentucky has been completed. The accompanying report presents the findings of the subsurface exploration and provides recommendations regarding earthwork and the design and construction of foundations for the proposed tower.

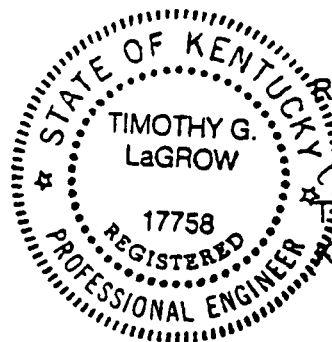

We appreciate the opportunity to be of service to you on this project. Should you have any questions concerning this report, or if we may be of further assistance, please contact us.

Sincerely,  
**TERRACON**

## GEOTECHNICAL ENGINEERING REPORT

### PROPOSED COMMUNICATION TOWER

Site Number: LV13XC400  
Site Name: Churchhill Downs  
Louisville, Kentucky

Project No. 18995010  
February 1, 1999

#### INTRODUCTION

The subsurface exploration for the proposed tower planned in Louisville, Kentucky, has been completed. As a part of our subsurface exploration, one (1) boring extending to a depth of approximately 29 feet below existing grade has been performed at the proposed tower site. The purpose of this report is to describe the subsurface conditions encountered in the boring, analyze and evaluate the test data, and provide recommendations regarding earthwork and the design and construction of the foundations for the proposed communication tower and equipment building.

#### PROJECT DESCRIPTION

We understand the proposed project will consist of the construction of a 90-foot monopole tower. Exact tower loads are not available but based on our previous experience are anticipated to be as follows:

Vertical Load:	25 kips
Horizontal Shear:	15 kips
Overturing Moment:	1,000 ft-kip

A small, lightly loaded equipment building will also be constructed. At the time of our site visit, the site was a landscape area adjacent to an existing one-story concrete block building. Based on conversations with the project engineers, the monopole will replace a wooden pole present at this location.

#### SUBSURFACE EXPLORATION AND TESTING PROCEDURES

The boring was drilled near the existing wooden pole using a truck mounted drill rig. Representative samples were obtained by the split-barrel sampling procedure in accordance with ASTM Specification D-1586. In the split-barrel sampling procedure, the number of blows required to advance a standard 2-inch O.D. split-barrel sampler the last 12 inches of the typical total 18-inch penetration by means of a 140-pound hammer with a free fall of 30

Proposed 90' Monopole  
Louisville, Kentucky  
Project No. 18995010  
February 1, 1999

inches, is the standard penetration resistance value (N). This value is used to estimate the in-situ relative density of cohesionless soils and the consistency of cohesive soils. The sampling depths and penetration distance, plus the standard penetration resistance values, are shown on the boring log. The samples were sealed and returned to the laboratory for testing and classification.

A CME automatic SPT hammer was used to advance the split-barrel sampler in the borings performed for this site. A significantly greater efficiency is achieved with the automatic hammer compared to the conventional safety hammer operated with a cathead and rope. This higher efficiency has an appreciable effect on the standard penetration resistance blow count (N) values. The effect of the automatic hammer's efficiency has been considered in the interpretation and analysis of the subsurface information for this report.

Auger refusal was encountered at the site at about 20.5 feet below existing grade. Below this depth the boring was advanced using core drilling procedures in general accordance with ASTM Standard D-2113-83. The underlying refusal materials were cored with a diamond bit attached to the outer barrel of a core barrel, which consists of an inner and outer barrel. The inner barrel collected the cored material as the outer barrel was rotated at high speeds to cut the rock. The barrel was retrieved to the surface upon completion of each drill run. Once the core samples were retrieved, they were placed in a box and logged. The rock was later classified by an engineer and the "percent recovery" and rock quality designation (RQD) were determined.

The "percent recovery" is the ratio of the sample length retrieved to the drilled length, expressed as a percent. An indication of the actual in-situ rock quality is provided by calculating the sample's RQD. The RQD is the percentage of the length of broken cores retrieved which have core segments at least 4 inches in length compared to each drilled length. The percent recovery and RQD are related to rock soundness and quality as illustrated below:

Relation of RQD and In-Situ Rock Quality	
RQD (%)	Rock Quality
90 - 100	Excellent
75 - 90	Good
50 - 75	Fair
25 - 50	Poor
0 - 25	Very Poor

Proposed 90' Monopole  
Louisville, Kentucky  
Project No. 18995010  
February 1, 1999

A field log of the boring was prepared by the drill crew. This log contained visual classifications of the materials encountered during drilling as well as the driller's interpretation of the subsurface conditions between samples. The final boring log included with this report represents an interpretation of the field log and includes modifications based on visual observations of the geotechnical engineer.

Descriptive classifications of the soils indicated on the boring log are in accordance with the enclosed General Notes and the Unified Soil Classification System. A brief description of this classification system is included in the appendix of this report. All classification was by visual-manual procedures and was performed by experienced personnel.

Laboratory tests on the soil samples consisted of moisture content and an Atterberg Limits test. An unconfined compression test was also performed on a rock core sample. The results of the laboratory tests are shown on the boring log at the appropriate horizons.

#### **SITE GEOLOGY**

Published geologic information indicates that this site is underlain by Wisconsin Age outwash from the Ohio River. This outwash consists of sand, gravel, silt, and clay. The gravel includes pebbles and cobbles of limestone, siltstone, dolomite, quartz, chert, quartzite, granite, gneiss, schist, and other finely crystalline igneous and metamorphic rocks. Clay and silt are yellowish brown above the water table and gray to olive gray below the water table. The unit was deposited by the Ohio River following the release of glacial meltwater. The outwash can occur in thickness up to 130 feet with the loess and eolian sand and terrace deposits below the outwash occurring in thickness up to an additional 50 feet.

In the vicinity of the site, the outwash deposits are underlain by the New Albany Shale of Devonian age. This formation consists of olive to grayish black silty carbonaceous shale.

#### **SITE AND SUBSURFACE CONDITIONS**

The site is a 20 by 40 foot parcel located at 3822 Southern Parkway in Louisville, Jefferson County, Kentucky. More specifically, the site occupies a landscape area adjacent to an existing one-story concrete block building at the above address. A site plan was not available at the time of this writing however, based on our visual observations the proposed tower site will be located as shown on the enclosed Boring Location Diagram (Figure 1).

Proposed 90' Monopole  
Louisville, Kentucky  
Project No. 18995010  
February 1, 1999

Specific conditions at the boring location are indicated on the attached boring log. The stratification boundaries shown on the boring log represent the approximate location of changes in soil and rock types; in situ, the transition between materials may be gradual. Conditions encountered at the boring location are summarized below.

Our boring encountered approximately 20 inches of topsoil and gravel underlain by silty clays to a depth of about 12 feet. These silty clays were in a medium stiff consistency with standard penetration test results (N-Values) on the order of 6 to 7 blows per foot (bpf). Below the silty clays, the boring encountered medium to coarse sand with gravel to an auger refusal depth of about 20.5 feet. The sands appeared to be in a medium dense to dense condition as evidenced by N-values that ranged from about 24 to 39 bpf.

Rock coring techniques were employed to sample the refusal materials. The refusal materials were generally found to consist of silty carbonaceous shale, similar to that described in the geology section of the report. Sample recoveries were 100 percent with RQD values of about 0 to 17 percent. The low RQD values reflect the thin bedded shaley nature of the rock. Considering the anticipated foundation bearing depth, coring operations were terminated at a depth of approximately 28.9 feet below existing grade.

Classification and descriptions of rock core samples are in accordance with the enclosed General Notes, and are based on visual and tactile observations. Petrographic analysis of thin sections may indicate other rock types.

#### **WATER LEVEL OBSERVATIONS**

Groundwater was encountered during the auger drilling portion of the borehole at a depth of about 14 feet below grade. This water level observation provides an approximate indication of the groundwater conditions existing on the site at the time the boring was drilled. However, due to the nature of the soils encountered in the boring and the influence of the nearby Ohio River, longer term monitoring in cased holes or piezometers would be required for a more accurate evaluation of the groundwater conditions.

Fluctuations of the groundwater level can occur due to seasonal variations in the amount of rainfall, runoff, and other factors not evident at the time the boring was performed. Perched water could develop at higher levels within more permeable layers following periods of heavy or prolonged precipitation. The possibility of groundwater level fluctuations should be considered when developing the design and construction plans for the project.

## ANALYSIS AND RECOMMENDATIONS

### General:

Based on the encountered subsurface conditions, the proposed tower can be founded on a large diameter drilled pier. Considering the flexible nature of the equipment building and the light loads, it may be possible to support the equipment building on shallow spread footings, provided adequate foundation observation services are performed. Design recommendations for the tower drilled pier as well as shallow footings for the equipment building are presented in the following paragraphs.

**Tower Foundations :** The proposed tower can be supported on a large diameter drilled pier. Based on the results of our boring, we have developed the following tower foundation design parameters:

**Tower Foundation Design Parameters**

Depth * (feet)	Description **	Allowable Skin Friction (psf)	Allowable End Bearing Pressure (psf)	Allowable Passive Pressure (psf)	Internal Angle of Friction (Degree)	Cohesion (psf)	Lateral Subgrade Modulus (pci)	Strain, &50 (in/in)
0 - 3	Topsoil, Gravel & Silt	Ignore	Ignore	Ignore	-	-	Ignore	Ignore
3 - 12	Silty Clays	200	Ignore	750	0	750	60	.01
12 - 21	Medium Sand	200 - 285 ***	5,000	750 - 3000 ***	30	0	125	.004
21 - 30	Shale****	2,500	10,000	5,000	0	50,000	3,000	.0001

\* Pier inspection is recommended to adjust pier length if variable soil/rock conditions are encountered.

\*\* A total unit weight of 120 and 58 pcf can be estimated for the silty clays and submerged sands, respectively. Unit weight of shale can be estimated at 140 pcf.

\*\*\* Varies linearly with depth

\*\*\*\* The pier should be embedded a minimum of 3 feet into bedrock to mobilize these higher rock strength parameters. Furthermore, it is assumed the rock socket will be extended using coring techniques rather than blasting/shooting.

The above indicated cohesion, friction angle, lateral subgrade modulus and strain values have no factors of safety, and the allowable skin friction and the passive resistances have factors of safety of 2 to 3. The cohesion, internal friction angle, lateral subgrade modulus and strain values given in the above table are based on published values and our past experience with similar soil/rock types. These values should, therefore, be considered approximate. To mobilize the higher rock strength parameters, the pier should be socketed at least 3 feet into

Proposed 90' Monopole  
Louisville, Kentucky  
Project No. 18995010  
February 1, 1999

bedrock. Furthermore, it is assumed that the rock socket is developed using coring rather than blasting techniques. The allowable end bearing pressure provided in the table has an approximate factor of safety of at least 3. If the drilled piers are designed using the above parameters and are founded within the underlying bedrock, settlements are not anticipated to exceed 1/4 inch.

The upper 3 feet of topsoil, gravel and silts should be ignored due to the potential affects of frost action. To avoid a reduction in uplift and lateral resistance caused by variable bedrock depths and bedrock quality, it is recommended that a minimum pier length and minimum rock socket length (if warranted by the design loads) be stated on the design drawings. Considering the site geology, variable rock depths should be anticipated at the site if the tower location is moved from the location of our boring. To facilitate pier length adjustments that may be necessary because of variable rock conditions, it is recommended that a Terracon representative observe the drilled pier excavation.

A drilled pier foundation should be designed with a minimum shaft diameter of 30 inches to facilitate clean out and possible dewatering of the pier excavation. Temporary casing may be required during the pier excavation in order to control possible groundwater seepage and support the sides of the excavation in weak soil or upper fractured rock zones. Slurry drilling techniques may also be required to advance the drilled pier through the more sandy reaches of the soil. Care should be taken so that the sides and bottom of the excavation are not disturbed during construction. The bottom of the shaft should be free of loose soil or debris prior to reinforcing steel and concrete placement.

A concrete slump of at least 6 inches is recommended to facilitate temporary casing removal. It should be possible to remove the casing from a pier excavation during concrete placement provided that the concrete inside the casing is maintained at a sufficient level to resist any earth and hydrostatic pressures outside the casing during the entire casing removal procedure.

**Equipment Building Foundations:** The proposed equipment shed may be supported on shallow footings bearing on the existing stiff natural soils or newly compacted fill. We recommend the equipment building foundations be dimensioned using a net allowable soil bearing pressure of 2,000 pounds per square foot (psf). In using net allowable soil pressures for footing dimensioning, the weight of the footings and backfill over the footings need not be considered. Furthermore, the footings should be at least 12 inches wide and a minimum of 2.0 feet square. The foundation excavations should be observed by a qualified geotechnical engineer or his representative to verify that the bearing materials are suitable for support of the proposed loads.

Proposed 90' Monopole  
Louisville, Kentucky  
Project No. 18995010  
February 1, 1999

The recommended soil bearing value should be considered an upper limit, and any value less than that listed above would be acceptable for the foundation system. Settlements are not expected to exceed about 1 inch. Footings should be placed at a depth of 2 feet, or greater, below finished exterior grade for protection against frost damage and extend the footing through the upper topsoil zone.

**Parking and Drive Areas** - It is our understanding that the drive that accesses the site will be surfaced with crushed stone. Parking and drive areas that are surfaced with crushed stone should have a minimum thickness of 6 inches and be properly placed and compacted as outlined herein. The crushed stone should meet Kentucky Department of Transportation (KDOT) specifications and applicable local codes.

It should be noted that a paving section consisting only of crushed graded aggregate base course should be considered a high maintenance section. Regular care and maintenance is considered essential to the longevity and use of the section. Site grades should be maintained in such a manner as to allow for adequate surface runoff. Any potholes, depressions or excessive rutting which may develop should be repaired as soon as possible to minimize the damage to the soil subgrade.

**Resistivity Analysis:** Resistivity of the subsurface soils was measured at the site using a Nilsson 400 resistivity meter. The Wenner Vertical Profiling Method was used. With this array, potential electrodes are centered on a traverse line between the current electrodes and an equal "A" spacing between electrodes is maintained. Resistivity measurements were taken along one (1) traverse. Location of the soil resistivity traverse is shown on Figure 1 in the Appendix. Individual resistivity values at various A spacings and along the traverse are summarized in the following table:

**Electric Resistivity Test Results**

Traverse No.	"A" Spacing (ft)	Resistivity (ohm-cm3)	Weather Conditions
A-A'	5	4,310	Cloudy, 30 F
A-A''	10	4,210	Cloudy, 30 F
A-A'	20	4,210	Cloudy, 30 F
B-B'	5	**	
B-B'	10	**	
B-B'	20	**	

\*\* Because of space limitations the second traverse could not be performed.

Proposed 90' Monopole  
Louisville, Kentucky  
Project No. 18995010  
February 1, 1999

**Site Preparation:** Site preparation should begin with the removal of topsoil, loose, soft or otherwise unsuitable materials from the construction area. The actual stripping depth, along with any soft soils that require undercutting, should be evaluated by the geotechnical engineer at the time of construction.

Any fill and backfill placed on the site should consist of approved materials which are free of organic matter and debris. Suitable fill material should consist of either granular material or low-plasticity cohesive soil. Low-plasticity cohesive soil should have a liquid limit of less than 45 percent and a plasticity index of less than 25 percent. The upper silty clays are acceptable for use as fill. However, because of their high silt content, stringent moisture control will be required before they can be adequately compacted. Additional testing should be performed in the field to determine their suitability. Fill should not contain frozen material and it should not be placed on a frozen subgrade.

The fill should be placed and compacted in lifts of 9 inches or less in loose thickness. All fill placed below structures or used to provide lateral resistance should be compacted to at least 98 percent of the material's maximum standard Proctor dry density (ASTM D-698). All cohesive fill should be placed, compacted, and maintained at moisture contents within minus 1 to plus 3 percent of the optimum value determined by the standard Proctor test.

We recommend the geotechnical engineer be retained to monitor fill placement on the project and to perform field density tests as each lift of fill is placed in order to evaluate compliance with the design requirements. Standard Proctor and Atterberg limits tests should be performed on the representative samples of fill materials before their use on the site.

#### **GENERAL COMMENTS**

Terracon should be retained to review the final design plans and specifications so comments can be made regarding interpretation and implementation of our geotechnical recommendations in the design and specifications. Terracon also should be retained to provide testing and observation during excavation, grading, foundation and construction phases of the project.

The analysis and recommendations presented in this report are based upon the data obtained from the borings performed at the indicated locations and from other information discussed in this report. This report does not reflect variations that may occur between borings or across the site. The nature and extent of such variations may not become

Proposed 90' Monopole  
Louisville, Kentucky  
Project No. 18995010  
February 1, 1999

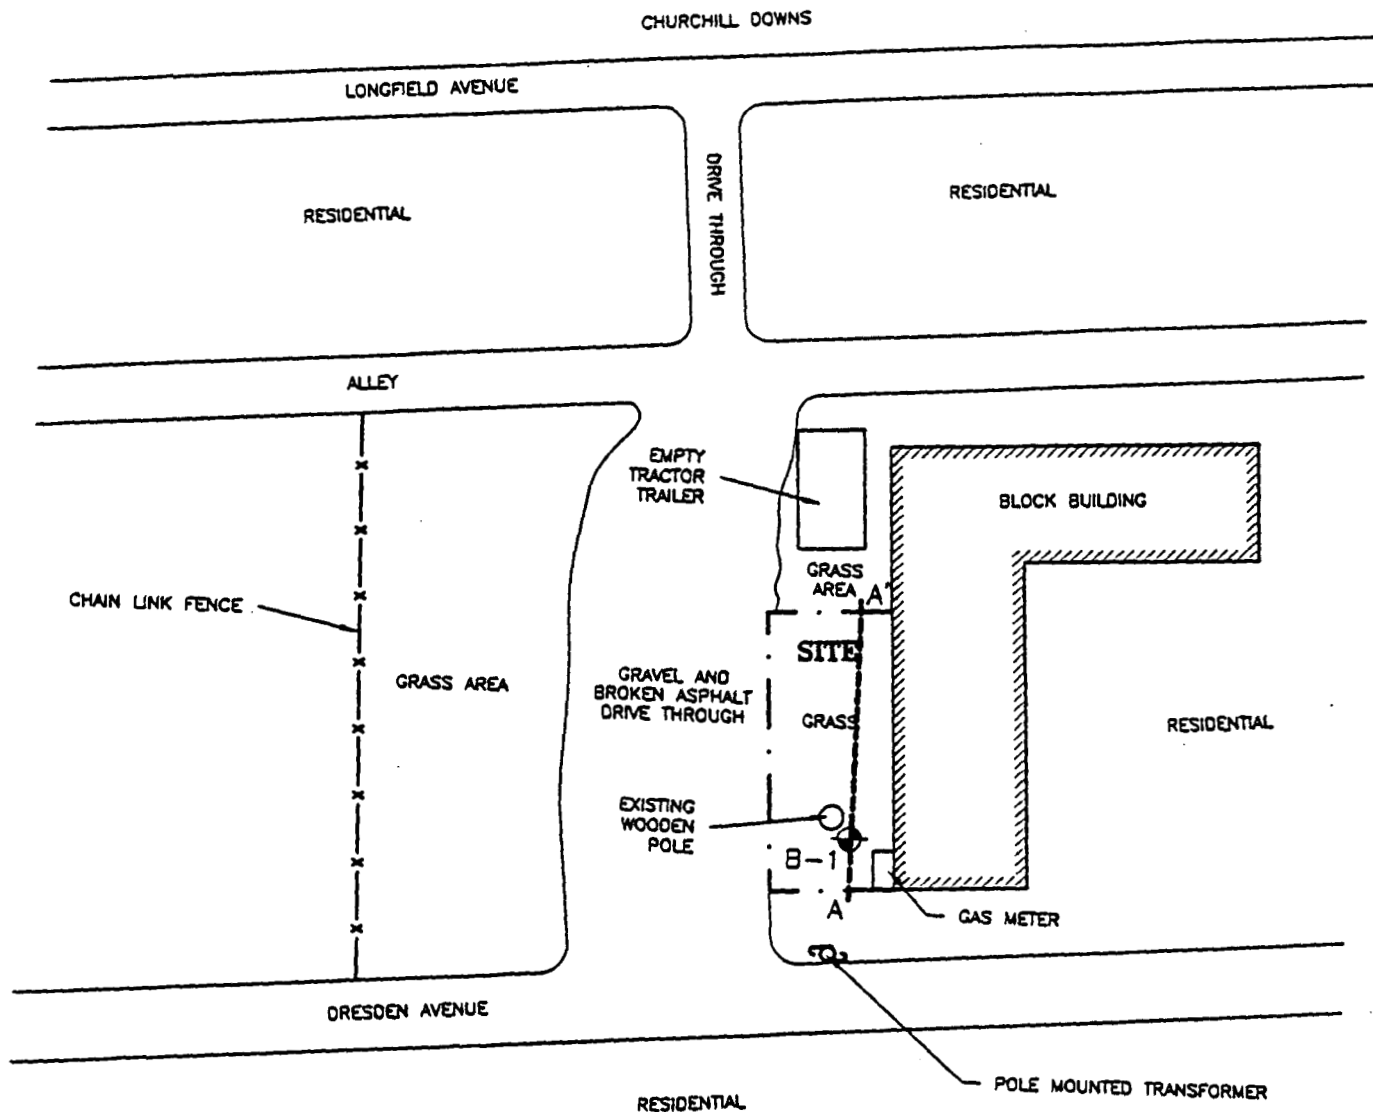

evident until construction. If variations appear, it will be necessary to reevaluate the recommendations of this report.

The scope of services for this project does not include either specifically or by implication any environmental assessment of the site or identification of contaminated or hazardous materials or conditions. If the owner is concerned about the potential for such contamination, other studies should be undertaken.

This report has been prepared for the exclusive use of our client for specific application to the project discussed and has been prepared in accordance with generally accepted geotechnical engineering practices. No warranties, either express or implied, are intended or made. In the event that changes in the nature, design, or location of the project as outlined in this report, are planned, the conclusions and recommendations contained in this report shall not be considered valid unless Terracon reviews the changes, and either verifies or modifies the conclusions of this report in writing.

## GENERAL NOTES

### DRILLING & SAMPLING SYMBOLS:

SS : Split Spoon - 1½" I.D., 2" O.D., unless otherwise noted	PS : Piston Sample
ST : Thin-Walled Tube - 2" O.D., Unless otherwise noted	WS : Wash Sample
PA : Power Auger	FT : Fish Tail Bit
HA : Hand Auger	RB : Rock Bit
DB : Diamond Bit - 4", N, B	BS : Bulk Sample
AS : Auger Sample	PM : Pressuremeter
HS : Hollow Stem Auger	DC : Dutch Cone
	WB : Wash Bore

Standard "N" Penetration: Blows per foot of a 140 pound hammer falling 30 inches on a 2 inch OD split spoon, except where noted.

### WATER LEVEL MEASUREMENT SYMBOLS:

WL : Water Level	WS : While Sampling
WCI : Wet Cave In	WD : While Drilling
DCI : Dry Cave In	BCR : Before Casing Removal
AB : After Boring	ACR : After Casing Removal

Water levels indicated on the boring logs are the levels measured in the borings at the times indicated. In pervious soils, the indicated levels may reflect the location of groundwater. In low permeability soils, the accurate determination of ground water levels is not possible with only short term observations.

### DESCRIPTIVE SOIL CLASSIFICATION:

Soil Classification is based on the Unified Soil Classification System and ASTM Designations D-2487 and D-2488. Coarse Grained Soils have more than 50% of their dry weight retained on a #200 sieve; they are described as: boulders, cobbles, gravel or sand. Fine Grained Soils have less than 50% of their dry weight retained on a #200 sieve; they are described as: clays, if they are plastic, and silts if they are slightly plastic or non-plastic. Major constituents may be added as modifiers and minor constituents may be added according to the relative proportions based on grain size. In addition to gradation, coarse grained soils are defined on the basis of their relative in-place density and fine grained soils on the basis of their consistency. Example: Lean clay with sand, trace gravel, stiff (CL); silty sand, trace gravel, medium dense (SM).

### CONSISTENCY OF FINE-GRAINED SOILS:

Unconfined Compressive Strength, Qu, psf	Consistency
< 500	Very Soft
500 - 1,000	Soft
1,001 - 2,000	Medium
2,001 - 4,000	Stiff
4,001 - 8,000	Very Stiff
8,001 - 16,000	Hard
> 16,000	Very Hard

### RELATIVE DENSITY OF COARSE-GRAINED SOILS:

N-Blows/ft.	Relative Density
0-3	Very Loose
4-9	Loose
10-29	Medium Dense
30-49	Dense
50-80	Very Dense
80+	Extremely Dense

### RELATIVE PROPORTIONS OF SAND AND GRAVEL

Descriptive Term(s) (of Components Also Present in Sample)	Percent of Dry Weight
Trace	< 15
With	15 - 29
Modifier	> 30

### RELATIVE PROPORTIONS OF FINES

Descriptive Term(s) (of Components Also Present in Sample)	Percent of Dry Weight
Trace	< 5
With	5 - 12
Modifier	> 12

### GRAIN SIZE TERMINOLOGY

Major Component Of Sample	Size Range
Boulders	Over 12 in. (300mm)
Cobbles	12 in. to 3 in. (300mm to 75mm)
Gravel	3 in. to #4 sieve (75mm to 4.75mm)
Sand	#4 to #200 sieve (4.75mm to 0.075mm)
Silt or Clay	Passing #200 sieve (0.075mm)

# UNIFIED SOIL CLASSIFICATION SYSTEM

Criteria for Assigning Group Symbols and Group Names Using Laboratory Tests<sup>A</sup>

Soil Classification

			Soil Classification		
			Group Symbol	Group Name <sup>B</sup>	
Coarse-Grained Soils More than 50% retained on No. 200 sieve	Gravels More than 50% of coarse fraction retained on No. 4 sieve	Clean Gravels Less than 5% fines <sup>C</sup>	$Cu \geq 4$ and $1 \leq Cc \leq 3^E$	GW	Well-graded gravel <sup>F</sup>
			$Cu < 4$ and/or $1 > Cc > 3^E$	GP	Poorly graded gravel <sup>F</sup>
		Gravels with Fines More than 12% fines <sup>C</sup>	Fines classify as ML or MH	GM	Silty gravel <sup>F, G, H</sup>
			Fines classify as CL or CH	GC	Clayey gravel <sup>F, G, H</sup>
	Sands 50% or more of coarse fraction passes No. 4 sieve	Clean Sands Less than 5% fines <sup>E</sup>	$Cu \geq 6$ and $1 \leq Cc \leq 3^E$	SW	Well-graded sand <sup>I</sup>
			$Cu < 6$ and/or $1 > Cc > 3^E$	SP	Poorly graded sand <sup>I</sup>
		Sands with Fines More than 12% fines <sup>D</sup>	Fines classify as ML or MH	SM	Silty sand <sup>G, H, I</sup>
			Fines classify as CL or CH	SC	Clayey sand <sup>G, H, I</sup>
Fine-Grained Soils 50% or more passes the No. 200 sieve	Silt and Clays Liquid limit less than 50	inorganic	$PI > 7$ and plots on or above "A" line <sup>J</sup>	CL	Lean clay <sup>K, L, M</sup>
			$PI < 4$ or plots below "A" line <sup>J</sup>	ML	Silt <sup>K, L, M</sup>
		organic	$\frac{\text{Liquid limit} - \text{oven dried}}{\text{Liquid limit} - \text{not dried}} < 0.75$	OL	Organic silt <sup>K, L, M, O</sup>
				OH	Organic clay <sup>K, L, M, N</sup>
	Silt and Clays Liquid limit 50 or more	inorganic	$PI$ plots on or above "A" line	CH	Fat clay <sup>K, L, M</sup>
			$PI$ plots below "A" line	MH	Elastic silt <sup>K, L, M</sup>
		organic	$\frac{\text{Liquid limit} - \text{oven dried}}{\text{Liquid limit} - \text{not dried}} < 0.75$	OH	Organic clay <sup>K, L, M, P</sup>
				OT	Organic silt <sup>K, L, M, Q</sup>
Highly organic soils	Primarily organic matter, dark in color, and organic odor		PT	Peat	

<sup>A</sup>Based on the material passing the 3-in. (75-mm) sieve.

<sup>B</sup>If field sample contained cobbles or boulders, or both, add "with cobbles or boulders, or both" to group name.

<sup>C</sup>Gravels with 5 to 12% fines require dual symbols:

GW-GM well-graded gravel with silt  
GW-GC well-graded gravel with clay  
GP-GM poorly graded gravel with silt  
GP-GC poorly graded gravel with clay

<sup>D</sup>Sands with 5 to 12% fines require dual symbols:

SW-SM well-graded sand with silt  
SW-SC well-graded sand with clay  
SP-SM poorly graded sand with silt  
SP-SC poorly graded sand with clay

$$C_u = D_{60}/D_{10} \quad C_c = \frac{(D_{30})^2}{D_{10} \times D_{60}}$$

<sup>E</sup>If soil contains  $\geq 15\%$  sand, add "with sand" to group name.

<sup>F</sup>If fines classify as CL-ML, use dual symbol GC-GM, or SC-SM.

<sup>G</sup>If fines are organic, add "with organic fines" to group name.

<sup>H</sup>If soil contains  $\geq 15\%$  gravel, add "with gravel" to group name.

<sup>I</sup>If Atterberg limits plot in shaded area, soil is a CL-ML, silty clay.

<sup>K</sup>If soil contains 15 to 29% plus No. 200, add "with sand" or "with gravel", whichever is predominant.

<sup>L</sup>If soil contains  $\geq 30\%$  plus No. 200 predominantly sand, add "sandy" to group name.

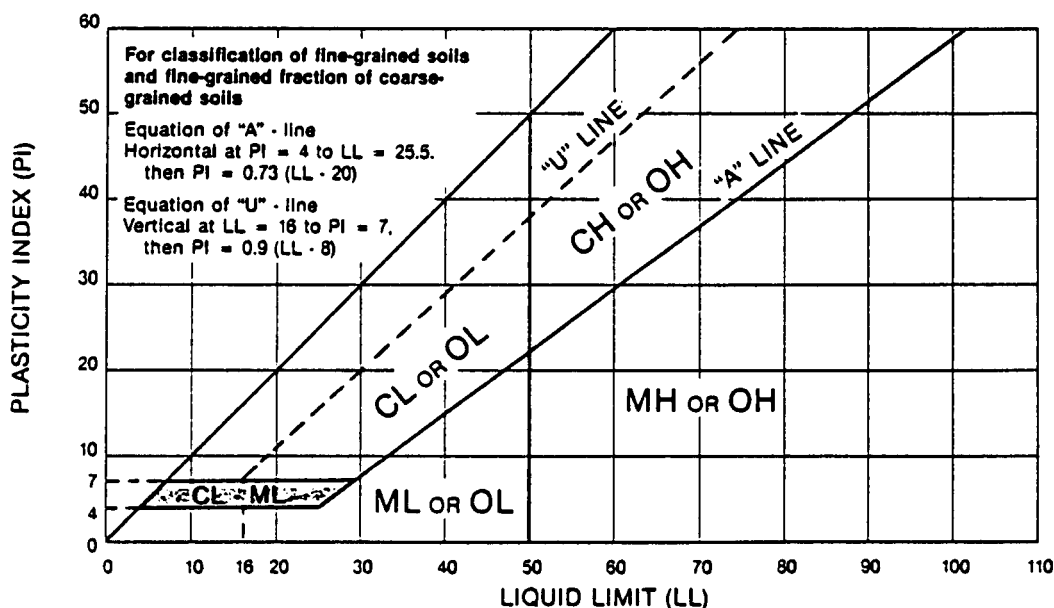

<sup>M</sup>If soil contains  $\geq 30\%$  plus No. 200, predominantly gravel, add "gravelly" to group name.

<sup>N</sup> $PI \geq 4$  and plots on or above "A" line.

<sup>O</sup> $PI < 4$  or plots below "A" line.

<sup>P</sup> $PI$  plots on or above "A" line.

<sup>Q</sup> $PI$  plots below "A" line.

# GENERAL NOTES

## Sedimentary Rock Classification

### DESCRIPTIVE ROCK CLASSIFICATION:

Sedimentary rocks are composed of cemented clay, silt and sand sized particles. The most common minerals are clay, quartz and calcite. Rock composed primarily of calcite is called limestone; rock of sand size grains is called sandstone, and rock of clay and silt size grains is called mudstone or claystone, siltstone, or shale. Modifiers such as shaly, sandy, dolomitic, calcareous, carbonaceous, etc. are used to describe various constituents. Examples: sandy shale; calcareous sandstone.

- LIMESTONE**      Light to dark colored, crystalline to fine-grained texture, composed of CaCO<sub>3</sub>, reacts readily with HCl.
- DOLOMITE**      Light to dark colored, crystalline to fine-grained texture, composed of CaMg(CO<sub>3</sub>)<sub>2</sub>, harder than limestone, reacts with HCl when powdered.
- CHERT**          Light to dark colored, very fine-grained texture, composed of micro-crystalline quartz (SiO<sub>2</sub>), brittle, breaks into angular fragments, will scratch glass.
- SHALE**          Very fine-grained texture, composed of consolidated silt or clay, bedded in thin layers. The unlaminated equivalent is frequently referred to as siltstone, claystone or mudstone.
- SANDSTONE**      Usually light colored, coarse to fine texture, composed of cemented sand size grains of quartz, feldspar, etc. Cement usually is silica but may be such minerals as calcite, iron-oxide, or some other carbonate.
- CONGLOMERATE**   Rounded rock fragments of variable mineralogy varying in size from near sand to boulder size but usually pebble to cobble size (½ inch to 6 inches). Cemented together with various cementing agents. Breccia is similar but composed of angular, fractured rock particles cemented together.

### PHYSICAL PROPERTIES:

#### DEGREE OF WEATHERING

- Slight**          Slight decomposition of parent material on joints. May be color change.
- Moderate**      Some decomposition and color change throughout.
- High**            Rock highly decomposed, may be extremely broken.

#### HARDNESS AND DEGREE OF CEMENTATION

##### Limestone and Dolomite:

- Hard**            Difficult to scratch with knife.
- Moderately Hard**    Can be scratched easily with knife, cannot be scratched with fingernail.
- Soft**            Can be scratched with fingernail.

##### Shale, Siltstone and Claystone

- Hard**            Can be scratched easily with knife, cannot be scratched with fingernail.
- Moderately Hard**    Can be scratched with fingernail.
- Soft**            Can be easily dented but not molded with fingers.

##### Sandstone and Conglomerate

- Well Cemented**      Capable of scratching a knife blade.
- Cemented**          Can be scratched with knife.
- Poorly Cemented**    Can be broken apart easily with fingers.

### BEDDING AND JOINT CHARACTERISTICS

Bed Thickness	Joint Spacing	Dimensions
Very Thick	Very Wide	> 10'
Thick	Wide	3' - 10'
Medium	Moderately Close	1' - 3'
Thin	Close	2" - 1'
Very Thin	Very Close	.4" - 2"
Laminated	—	.1" - .4"

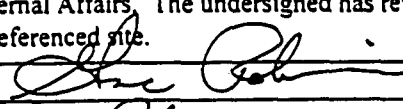

- Bedding Plane**      A plane dividing sedimentary rocks of the same or different lithology.
- Joint**              Fracture in rock, generally more or less vertical or transverse to bedding, along which no appreciable movement has occurred.
- Seam**              Generally applies to bedding plane with an unspecified degree of weathering.

### SOLUTION AND VOID CONDITIONS

- Solid**              Contains no voids.
- Vuggy (Pitted)**    Rock having small solution pits or cavities up to ½ inch diameter, frequently with a mineral lining.
- Porous**            Containing numerous voids, pores, or other openings, which may or may not interconnect.
- Cavernous**        Containing cavities or caverns, sometimes quite large.

Attention: Mr. Mickey Hogsed

Re: NEPA Review  
Proposed Communication Tower  
**Churchill Downs Site**  
**LV13XC400**  
**Louisville, Jefferson County, Kentucky**  
Terracon Project Number: 1895010

Dear Mr. Hogsed:

Terracon has completed the requested National Environmental Policy Act (NEPA) review for the above referenced project. The NEPA review was conducted for compliance with Federal Communications Commission (FCC) requirements as identified in 47CFR Ch. 1.1307(a)1-8. Our findings from this review are outlined in the following paragraphs.

Terracon has reviewed information available at several regulatory agencies and other sources to aid in addressing these requirements. The findings from this " cursory " review are presented in this letter report. For the purposes of this study, Terracon has assumed the environmental impact zone of the proposed tower to be limited to a 025 mile radius around the site. An exception to this was made for Item 4 (National Register of Historic Places) where an impact zone with a 1 mile radius was evaluated based on the requirements of the Kentucky Heritage Council (KHC). The following information provides Terracon's rationale for determining whether further evaluation is required regarding the following 8 items.

Item 1: Officially Designated Wilderness Areas - A review of the USGS 7.5-minute topographic map of the subject site was conducted. The proposed site is not located in an officially designated wilderness area. Therefore, no further evaluation is required for this item.

Item 2: Officially Designated Wildlife Preserve - A review of the USGS 7.5-minute topographic map of the subject site was conducted. The proposed site is not located in an officially designated wildlife preserve. No further evaluation is required for this item.

- Item 3: Endangered Species or Critical Habitats - Review of USGS 7.5-minute topographic maps denoting designated endangered species and critical habitats was conducted through the Kentucky Fish and Wildlife Commission (KFWC) internet web site. No endangered species or critical habitats were noted within a 0.25-mile radius of the site.
- Item 4: National Register of Historic Places - A review of the files at the Kentucky Heritage Council (KHC) did not indicate any historic structures within a 1 mile radius of the site. The review included the topographic map as well as a review of the street listings for Dresden Avenue and Longfield Avenue. Based on the curbside view of the area, no apparent historic structures were observed. Therefore, it is our opinion that the proposed tower should not impact any historic properties.
- Item 5: Indian Religious Sites - A review of the KHC files did not reveal any archaeological sites within a 0.25-mile radius of the site. The area is currently developed as primarily a residential area. Therefore, no further evaluation is required for this item.
- Item 6: Flood Plain - Based on a review of the FIRM map for the area, the subject site does not appear to be within a 100 year floodplain. Therefore, no further evaluation should be required for this item.
- Item 7: Significant Change in Surface Features (i.e.-wetland fill, deforestation or water diversion) - Based on a cursory review of the proposed site plans, as provided by Sprint Spectrum, and based on our knowledge of the proposed construction and existing site conditions, it does not appear that significant grade changes will be required during construction of this site. Therefore, no further evaluation should be required for this item.
- Item 8: High Intensity White Lights - Since this tower is a proposed 90' monopole, high intensity white lights are not anticipated. Therefore, this item should not be a concern.

With the exception of radio frequency radiation exposure, Terracon has completed the review in general compliance with 47CFR Ch. 1.1307(a)1-8. This review relied primarily upon public sources of readily available information, on conversations with persons knowledgeable of the federal regulations and proposed construction and on visual observations of the subject site. Terracon does not warrant the work of regulatory agencies or other third parties supplying information that may have been used during the preparation of this review. Furthermore, this NEPA review was prepared using Terracon's interpretation and opinion of the data available at the time of our review. If SprintPCS desires a higher degree of assurance, the relevant state and federal agencies should be contacted to render their opinion on the individual items.

Sprint PCS  
NEPA Review for PCS Site  
Churchill Downs Site  
Page 3

Sprint's Radio Frequency (RF) engineers should evaluate the radio frequency exposure aspect of the NEPA requirements. If site conditions or planned construction conditions change (i.e.- new location, increased tower height, etc.) this NEPA review should be reevaluated for compliance with these federal regulations.

We hope this provides you with sufficient information at the present time. If you have any questions concerning this letter, please feel free to contact our office.

Sincerely,  
**TERRACON**

Site ID#/Name: LV13XC400/BSM/Churchill Downs

To Whom It May Concern:

Airspace Safety Analysis Corporation (ASAC) has conducted an aeronautical study on April 22, 1999 for Sprint PCS. The study was to determine a proposed structure's effect, if any, on navigable airspace. ASAC's study is conducted in accordance with Part 77 of the Federal Aviation Regulations, FAR (14 C.F.R. Subchapter E, Part 77) and Part 17 of the Federal Communications Commission, FCC Rules and Regulations (47 C.F.R. Part 17). The proposed construction site is located in the Louisville, Kentucky MTA. The NAD 83 site coordinates are Latitude 38° 11' 52.04" North, Longitude 085° 46' 08.78" West. The site has a surface elevation of 452 feet above mean sea level (MSL), the structure has a proposed height of 85 feet above ground level (AGL), which includes the additional height of any antennas, etc. This gives an overall structure height above mean sea level of 537 feet AMSL.

For regulatory compliance purposes, the nearest landing surface, the approach end of Runway 17R at Louisville International-Standiford Field Airport is located 7,697 feet or 1.27 nautical miles on a True Bearing of 308.13 degrees to the proposed site. The runway elevation at this point is 486 feet AMSL. The airport reference point (ARP) at this public use, instrumented airport is located 12,607 feet or 2.07 nautical miles on a True Bearing of 311.89 degrees to the proposed site.

FAR Part 77 prescribes various airspace surfaces and slopes established at and around airports. Part 77.13 prescribes slopes and surfaces which, if exceeded, require the sponsor of the structure to provide the Federal Aviation Administration with Notice of Proposed Construction. FCC Rules Part 17 also specifies this requirement. Additionally, Part 77 Subpart C prescribes various airspace surfaces and slopes which, if any exceeded, require the FAA to provide public notice inviting comments prior to issuing a determination. Subpart C also prescribes surfaces and

STV 21989 99 A  
Page 1

Two Crown Center  
1745 Phoenix Boulevard  
Suite 120  
Atlanta, Georgia 30349  
770/994-1557 • FAX 770/994-1637  
asacinc@asacinc.com

slopes which, if exceeded, would identify the proposed structure as a Hazard to navigable airspace.

ASAC has determined that a structure height of 85 feet AGL (537 feet AMSL) at this site would not exceed any FAR Part 77 or FCC Part 17 notice requirement surface. Therefore, FAA Notice of Proposed Construction or Alteration is not required for this structure.

Should Notice of Proposed Construction or Alteration be filed with the FAA, ASAC is confident the proposed 85 feet AGL (537 feet AMSL) structure will be approved at this site upon completion of the FAA's aeronautical study.

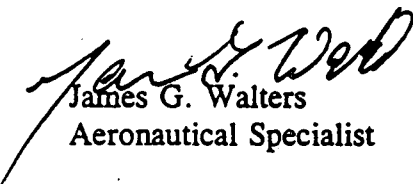

Pursuant to Federal Aviation Regulations and FAA Policy, proposed construction or alteration that does not require notice to the FAA, normally does not require obstruction marking and/or lighting.

The maximum structure height at this site that would not require Notice to the FAA is 86 feet AGL (538 feet AMSL). Exceeding this height requires that a Notice of Proposed Construction or Alteration form be filed and that FAA approval be obtained prior to beginning construction.

Should you have any questions regarding this letter or the study conducted by ASAC, please feel free to contact my office anytime at (770) 994-1557.

Sincerely,

Airspace Safety Analysis Corporation

  
James G. Walters  
Aeronautical Specialist

ADDENDUM

ASAC Study No.: STV 21989 99 A

Site ID #/Name: LV13XC400/BSM/Churchill Downs

The nearest public airport to the proposed site is Louisville International-Standiford Field. The nearest runway is Runway 17R which bears 128.11° True Bearing, 1.27 NM (or 7,696') from the proposed site.

The Kentucky Tall Structure Program stipulates that application be filed for any structure that would exceed a 100 to 1 imaginary slope from the nearest point of the nearest runway. A 100 to 1 imaginary slope from the proposed site yields a height of 562' AMSL. The proposed structure at the study site is 537' AMSL or 25' below the notice height. Therefore, application to the Kentucky Airport Zoning Commission is not required.

PCS SITE AGREEMENT

Site Name CHURCHILL DENNIS

Site I. D. LV1342300

1. Premises and Use. Owner leases to Sprint Spectrum L.P., a Delaware limited partnership ("SSLP"), the site ("Site") described below:

(Check appropriate box(es))

- Land consisting of approximately 2,000 square feet upon which SSLP will construct its  equipment base station and  antenna structure;
- Building interior space consisting of approximately \_\_\_\_\_ square feet;
- Building exterior space for attachment of antennas;
- Building exterior space for placement of base station equipment;
- Tower antenna space between the \_\_\_\_\_ foot and \_\_\_\_\_ foot level on the Tower;
- Space required for cable runs to connect PCS equipment and antennas.

in the location(s) ("Site") shown on Exhibit A, together with a non-exclusive easement for reasonable access thereto and to the appropriate, in the discretion of SSLP, source of electric and telephone facilities. The Site will be used by SSLP for the purpose of installing, removing, replacing, modifying, maintaining and operating, at its expense, a personal communications service system facility ("PCS"), including, without limitation, antenna equipment, cable wiring, back-up power sources (including generators and fuel storage tanks), related fixtures and, if applicable to the Site, an antenna structure. SSLP will use the Site in a manner which will not unreasonably disturb the occupancy of Owner's other tenants. SSLP will have access to the Site twenty-four (24) hours per day, seven (7) days per week.

2. Term. The term of this Agreement (the "Initial Term") is five years, commencing on the date ("Commencement Date") both SSLP and Owner have executed this Agreement. This Agreement will be automatically renewed for ~~two~~ additional terms (each a "Renewal Term") of five years each, unless SSLP provides Owner notice of intention not to renew not less than 90 days prior to the expiration of the Initial Term or any Renewal Term.

3. Rent. Until the earlier of (a) that date which is 30 days after the issuance of a building permit, or (b) the first day of the month following the commencement of the physical preparation of the Site, the rent will be a one-time aggregate payment of \$100.00, the receipt of which Owner acknowledges. Except as provided in Exhibit C, thereafter, rent will be paid in equal monthly installments of \$\_\_\_\_\_ (until increased as set forth herein), partial months to be prorated, in advance. Rent for each Renewal Term will be the annual rent in effect for the final year of the Initial Term or prior Renewal Term, as the case may be, increased by \_\_\_\_\_ percent (\_\_\_\_\_%).

4. Title and Quiet Possession. Owner represents and agrees (a) that it is the Owner of the Site; (b) that it has the right to enter into this Agreement; (c) that the person signing this Agreement has the authority to sign; (d) that SSLP is entitled to access to the Site at all times and to the quiet possession of the Site throughout the Initial Term and each Renewal Term so long as SSLP is not in default beyond the expiration of any cure period; and (e) that Owner will not have unsupervised access to the Site or to the PCS equipment.

5. Assignment/Subletting. SSLP may assign or transfer this Agreement or sublet all or any portion of the Site without the prior written consent of Owner.

6. Notices. All notices must be in writing and are effective only when deposited in the U.S. mail, certified and postage prepaid, or when sent via overnight delivery, to the address set forth below, or as otherwise required by law.

7. Improvements. SSLP may, at its expense, make such improvements on the Site as it deems necessary from time to time for the operation of the PCS system. Owner agrees to cooperate with SSLP with respect to obtaining any required zoning approvals for the Site and such improvements. Upon termination or expiration of this Agreement, SSLP may remove its equipment and improvements and will restore the Site to substantially the condition existing on the Commencement Date, except for ordinary wear and tear and casualty loss.

8. Compliance with Laws. Owner represents that Owner's property (including the Site), and all improvements located thereon, are in substantial compliance with building, life/safety, disability and other laws, codes and regulations of applicable governmental authorities. SSLP will substantially comply with all applicable laws relating to its possession and use of the Site.

9. Interference. SSLP will resolve technical interference problems with other equipment located at the Site on the Commencement Date or any equipment that becomes attached to the Site at any future date when SSLP desires to add additional equipment to the Site. Likewise, Owner will not permit or suffer the installation of any future equipment which (a) results in technical interference problems with SSLP's then existing equipment or (b) encroaches onto the Site.

10. Utilities. Owner represents that utilities adequate for SSLP's use of the Site are available. SSLP will pay for all utilities used by it at the Site. Owner will cooperate with SSLP in SSLP's efforts to obtain utilities from any location provided by Owner or the servicing utility, including signing any easement or other instrument reasonably required by the utility company.

11. Termination. SSLP may terminate this Agreement at any time by notice to Owner without further liability if SSLP does not obtain all permits or other approvals (collectively, "approval") required from any governmental authority or any easements required from any third party to operate the PCS system, or if any such approval is canceled, expires or is withdrawn or terminated, or if Owner fails to have proper ownership of the Site or authority to enter into this Agreement, or if SSLP, for any other reason, in its sole discretion, determines that it will be unable to use the Site. Upon termination, all prepaid rent will be retained by Owner unless such termination is due to Owner's failure of proper ownership or authority, or such termination is a result of Owner's default.

12. Default. If either party is in default under this Agreement for a period of (a) 10 days following receipt of notice from the non-defaulting party with respect to a default which may be cured solely by the payment of money, or (b) 30 days following receipt of notice from the non-defaulting party with respect to a default which may not be cured solely by the payment of money, then, in either event, the non-defaulting party may pursue any remedies available to it against the defaulting party under applicable law, including, but not limited to, the right to terminate this Agreement. If the non-monetary default may not reasonably be cured within a 30 day period, this Agreement may not be terminated if the defaulting party commences action to cure the default within such 30 day period and proceeds with due diligence to fully cure the default.

13. Indemnity. Owner and SSLP each indemnifies the other against and holds the other harmless from any and all costs (including reasonable attorneys' fees) and claims of liability or loss which arise out of the ownership, use and/or occupancy of the Site by the indemnifying party. This indemnity does not apply to any claims arising from the sole negligence or intentional misconduct of the indemnified party. The indemnity obligations under this Paragraph will survive termination of this Agreement.

14. Hazardous Substances. Owner represents that it has no knowledge of any substance, chemical or waste (collectively, "substance") on the Site that is identified as hazardous, toxic or dangerous in any applicable federal, state or local law or regulation. SSLP will not introduce or use any such substance on the Site in violation of any applicable law.

15. Subordination and Non-Disturbance. This Agreement is subordinate to any mortgage or deed of trust now of record against the Site. However, promptly after the Agreement is fully executed, Owner will use diligent efforts to obtain a non-disturbance agreement reasonably acceptable to SSLP from the holder of any such mortgage or deed of trust.

16. Taxes. SSLP will be responsible for payment of all personal property taxes assessed directly upon and arising solely from its use of the communications facility on the Site. SSLP will pay to Owner any increase in real property taxes attributable solely to any improvements to the Site made by SSLP within sixty (60) days after receipt of satisfactory documentation indicating calculation of SSLP's share of such real estate taxes and payment of the real estate taxes by Owner. Owner will pay when due all other real estate taxes and assessments attributable to the property of Owner of which the Site is a part.

17. Insurance. SSLP will procure and maintain commercial general liability insurance, with limits of not less than \$1,000,000 combined single limit per occurrence for bodily injury and property damage liability, with a certificate of insurance to be furnished to Owner within 30 days of written request. Such policy will provide that

cancellation will not occur without at least 15 days prior written notice to Owner. Each party hereby waives its right of recovery against the other for any loss or damage covered by any insurance policies maintained by the waiving party. Each party will cause each insurance policy obtained by it to provide that the insurance company waives all rights of recovery against the other party in connection with any damage covered by such policy.

**18. Maintenance.** SSLP will be responsible for repairing and maintaining the PCS system and any other improvements installed by SSLP at the Site in a proper operating and reasonably safe condition; provided, however if any such repair or maintenance is required due to the acts of Owner, its agents or employees, Owner shall reimburse SSLP for the reasonable costs incurred by SSLP to restore the damaged areas to the condition which existed immediately prior thereto. Owner will maintain and repair all other portions of the property of which the Site is a part in a proper operating and reasonably safe condition.

**19. Miscellaneous.** (a) This Agreement applies to and binds the heirs, successors, executors, administrators and assigns of the parties to this Agreement; (b) This Agreement is governed by the laws of the State in which the Site is located; (c) If requested by SSLP, Owner agrees promptly to execute and deliver to SSLP a recordable Memorandum of this Agreement in the form of Exhibit B; (d) This Agreement (including the Exhibits) constitutes the entire agreement between the parties and supersedes all prior written and verbal agreements, representations, promises or understandings between the parties. Any amendments to this Agreement must be in writing and executed by both parties; (e) If any provision of this Agreement is invalid or unenforceable with respect to any party, the remainder of this Agreement or the application of such provision to persons other than those as to whom it is held invalid or unenforceable, will not be affected and each provision of this Agreement will be valid and enforceable to the fullest extent permitted by law; and (f) The prevailing party in any action or proceeding in court or mutually agreed upon arbitrator proceeding to enforce the terms of this Agreement is entitled to receive its reasonable attorneys' fees and other reasonable enforcement costs and expenses from the non-prevailing party.

### **DIRECTIONS TO SITE**

From the county seat of Jefferson County, Kentucky, located at 531 West Jefferson Street, Louisville, Jefferson County, Kentucky: Take South Sixth Street two blocks to Chestnut Street. Turn right onto Chestnut Street (east) and travel three blocks to Third Street. Turn right (south) onto Third Street and travel approximately 3.6 miles, passing through the University of Louisville campus, to Kenton Street. Turn right (west) on Kenton and go to Fifth Street. The site is on the corner of Dresden and Fifth Street.

These directions were prepared by Mr. C. Bruce Snook, H.E. Rudy Consulting Engineers, whose telephone number is (502) 584-4118.

## **EXHIBIT I**

The materials included as "Exhibit I" in the Application to the Public Service Commission are those items submitted by the Applicant to the Louisville-Jefferson County Planning Commission, in addition to the materials submitted to the Public Service Commission, pursuant to said planning commission regulations.

# Application for COMMUNITY FACILITY REVIEW

WIRELESSCO, L.P. d/b/a SPRINT PCS

Project name: CHURCHILL DOWNS WIRELESS TELECOMMUNICATIONS FACILITY  
 Project address: 3910 SOUTH FIFTH STREET zip code 40214  
 Owner name(s): MARK CRECELIUS phone # 502-366-4406  
 Contact person: JENNIFER STURGEON phone # 502-419-0907  
 address: \_\_\_\_\_

Project tax block: 52C and lot no.(s) 157,158 and 160

The property is located in (complete or check as appropriate): the incorporated City of  
LOUISVILLE or \_\_\_\_\_ unincorporated Jefferson County.

**Submit four (4) sets of plans, two of these must have the appropriate agency stamps.**

**Describe this proposal in detail addressing the requirements of Section 8.2 Community Facility Review (parking requirements, building setback requirements and signage), and Article 12 Landscaping and Land Use Buffers. Be sure to include: the proposed use; site size: the size in square feet, height, and number of stories of all buildings; the number of existing, proposed and required parking spaces; the height and area of all proposed signage; for schools: the number of classrooms and the seating capacity of the auditorium. This information may be provided below or on the site plan. An additional sheet of paper may be attached as needed. PLEASE SEE ATTACHED ; SEE RELATED CASE B-133-90**

**ADDENDUM TO APPLICATION FOR COMMUNITY FACILITIES REVIEW**

**L. DESCRIPTION OF PROPOSAL OF WIRELESSCO, L.P.  
PLACEMENT OF A WIRELESS TELECOMMUNICATIONS FACILITY**

WirelessCo, L.P., by and through its agent and general partner, Sprint Spectrum, L.P., proposes to construct a 75 foot monopole facility, with antennas reaching upward for a total maximum height of 85' at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. For a complete Description of the proposed use, please see the following items included with this Application:

1. Four (4) sets of the Applicant's Site Development Plans, two of which contain the appropriate stamps and signatures from the Metropolitan Sewer District and the City department of Inspections, Permits and Licenses ("IP&L). See "Exhibit 1."
2. A copy of WirelessCo's Application for a Certificate of Public Convenience and Necessity to be submitted to the Kentucky Public Service Commission. (Note: Exhibit B to said Application is the same as the Site Development Plans included herewith). See "Exhibit 2."
3. A copy of the form notice letter to be mailed by the Applicant, pursuant to Section 8.2(B)(1)(a), (2), which will be mailed to: each owner of property within 500 feet of the proposed monopole, each owner of property adjoining the property of the proposed monopole, each property owner directly across the street from the property of the proposed monopole, the Mayor of the City of Louisville, the Clerk for the City of Louisville, and the Eighth Ward Alderman. See "Exhibit 3."
4. The names and addresses of the individuals to whom said notice letter will be mailed. See "Exhibit 4."

5. A copy of the Applicant's FCC license. See "Exhibit 5."
6. A map demonstrating the Applicant's existing and proposed telecommunications facilities within Jefferson County. See "Exhibit 6."
7. Photo simulations of the proposed facility from a point 400 feet from the proposed site in each of the four compass directions showing the relationship of the tower and/or facilities against the massing of surrounding structures, trees and other intervening visual masses. See "Exhibit 7."

## **II. DESIGN STANDARDS: COMPLIANCE/REQUEST FOR WAIVER**

1. The proposed monopole will be located at least fifty (50) feet from the property line of any residentially zoned property. Applicant requests a waiver of the yard requirements applicable for an area zoned R-5. In support of its request, Applicant states that the only exterior structure of the proposed facility is an 85' tall wood-laminate monopole. All associated ground equipment will be located inside an existing building on the property. The proposed wood-laminate pole is similar in appearance to the utility poles seen in the area.
2. Applicant's proposed landscaping for the area around the monopole facility is demonstrated in the Site Plan.
3. The Applicant requests a waiver from the requirement that the monopole be maintained in either a galvanized steel finish or be painted light gray or light blue in color. In support of this request, Applicant states that the proposed monopole is a wood laminate structure. Materials further describing the proposed structure are included with this application. Because of the residential character of the area surrounding the proposed site, Applicant determined that the use of a wood laminate monopole would further decrease any visual impact of said structure. See

the Photo simulations submitted herewith for a representation of the placement of such a structure on the proposed site.

4. The proposed monopole is less than 200 feet in height. The proposed monopole is designed with consideration of severe wind load of 70 m.p.h., which conforms to standard EIA/TEA-222-F of the Electronic Industries Association Standards. Said standards are accepted by the American National Standards Institute.

5. The proposed facility will not require artificial lighting. Please see "Exhibit K" to the Application to the Public Service Commission submitted herewith.

6. The proposed facility will be unstaffed. Once constructed, Applicant's personnel will periodically visit the site for maintenance, equipment modification and/or repairs. Applicant will access the site through the property owner's existing access drive, and the site has sufficient existing parking facilities to accommodate Applicant's service vehicle.

7. The property upon which the monopole is proposed will be enclosed by an seven (7) foot high security fence.

8. There is no separate designated "ground lease" area regarding the proposed facility. The Applicant proposes to place the proposed monopole next to an existing concrete building and locate its ground equipment inside of said building. The parcel of property upon which Applicant proposes to construct the monopole meets the minimum lot size requirements for the R-5 district.

9. The Applicant certifies that the proposed facility is well within the FCC's regulations concerning radiofrequency emissions.

10. Applicant will comply with applicable standards/regulations regarding dismantling of the proposed facility in the event said facility is no longer operational.

11. The only signs, if any, to be placed on the site shall be emergency information

signs, owner contact information, warning or safety instructions, and signs required by a federal, state or local agency. Except as otherwise required by law, said signs shall not exceed five (5) square feet in area.

### **COMPREHENSIVE PLAN JUSTIFICATION STATEMENT**

Applicant has reviewed the appropriateness of the proposed facility in light of the Jefferson County Comprehensive Plan. Said review considered the appropriate Environmental, Utility, Traffic, Residential, Industrial, Community Facilities and Government guidelines set forth in said plan.

The proposed monopole will have no adverse environmental effects. As previously stated, the facility proposed is well within the FCC guidelines reading radiofrequency emissions. In addition, the Applicant has obtained a NEPA study which indicates no environmental concerns are associated with the proposed construction. A copy of the NEPA study may be found at "Exhibit F" to the Application to the Kentucky Public Service Commission submitted herewith.

The applicant is a "public utility" subject to the jurisdiction of the Kentucky Public Service Commission, which already has determined that the Applicant has the financial, managerial and technical capability to provide wireless Personal Communications Service within the Louisville Major Trading Area, and that public convenience and necessity require the construction and operation of the Applicant's PCS network. The Commission granted Applicant's Certificate of Public Convenience and Necessity to operate its network by order dated April 23, 1996, Commission Docket No. 96-077. The proposed facility is an integral part of the Applicant's existing wireless telecommunications network. The facility will be unmanned and requires no water or sewer service. The Applicant designed the structure in such a way so as to minimize any visual impact on the surrounding area. The proposed facility is a wood laminate monopole. The

proposed height is below that which would require artificial lighting by the FAA, and the proposed site is currently utilized by a commercial enterprise.

The proposed construction will result in no significant change in traffic pattern for the area. The facility will be unmanned and will require access on occasion for routine maintenance and repair. The applicant will access the site via the property owner's existing access drive. The site is privately owned, thus there will be no interference with public walkways.

The area surrounding the proposed site is zoned R-5. As described above, Applicant has taken great care to minimize the impact, if any, of the monopole on the surrounding area. Applicant would also point out that the proposed facility is designed to accommodate co-locations, which would further minimize the need for additional permanent facilities in the area.

Prior to submission of this proposal, Applicant investigated the possibility of co-location. However, there are no co-locatable structures within Applicant's search ring. Currently, there is a temporary "Cell on Wheels" owned by BellSouth Mobility on the property on which Applicant proposes to construct its facility. It is Applicant's understanding that BellSouth uses the temporary pole during Derby Week. Applicant requires a permanent, thus more structurally stable facility in this area. Applicant's pole will be capable of accommodating an additional carrier.

Applicant submitted a proposal to Churchill Downs to replace an existing Louisville Gas & Electric utility pole with a structure capable of holding Applicant's equipment. However, the request was denied on the basis of Churchill Downs' Master Plan for expansion. A copy of the letter rejecting said proposal is included herewith.

Because of the dense development of the area within Applicant's search ring, the proposed site is the only appropriate site. In fact, it is the only site identified within the search ring which had adequate space available to accommodate Applicant's equipment. Applicant's equipment will

be located inside a garage area with the wood laminate monopole built outside the garage in a large parking area.

Respectfully submitted,

*Sandra F. Keene*

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Alderman Handy:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins

**Re: Public Notice - Jefferson County Planning and Development  
Docket No. 99-**

FIELD(salutation)

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Jefferson County Planning Commission for approval to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot monopole, with attached antennas extending upward for a total height of 85 feet to be located at 3910 South Fifth Street, Louisville, Kentucky 40214.

The Jefferson County Planning Commission invites your comments regarding the proposed construction. You also have the right to submit testimony to the Commission, either in writing or by appearance at any Committee or Commission meeting scheduled for the review of the proposed construction.

Your comments should be addressed to: Jefferson County Planning Commission, 531 Court Place, Suite 900, Louisville, Kentucky 40202-3396; telephone 502-574-6230. Please refer to **Docket No. 99-** in your correspondence.

Sprint Spectrum, L.P.,

# RADIO STATION AUTHORIZATION

Commercial Mobile Radio Services  
Personal Communications Service - Broadband

WIRELESSCO, L.P.  
9221 Ward Parkway  
Kansas City, MO 64114

Call Sign: **KNLF252**  
Market: **M026**  
**LOUISVILLE-LEXINGTON-EVANSVILLE**  
Channel Block: **B**  
File Number: **00049-CW-L-95**

The licensee hereof is authorized, for the period indicated, to construct and operate radio transmitting facilities in accordance with the terms and conditions hereinafter described. This authorization is subject to the provisions of the Communications Act of 1934, as amended, subsequent Acts of Congress, international treaties and agreements to which the United States is a signatory, and all pertinent rules and regulations of the Federal Communications Commission, contained in the Title 47 of the U.S. Code of Federal Regulations.

Initial Grant Date . . . . . **June 23, 1995**  
Five-year Build Out Date . . . . . **June 23, 2000**  
Expiration Date . . . . . **June 23, 2005**

CONDITIONS :

Pursuant to Section 309(h) of the Communications Act of 1934, as amended, (47 U.S.C. § 309(h)), this license is subject to the following conditions: This license does not vest in the licensee any right to operate a station nor any right in the use of frequencies beyond the term thereof nor in any other manner than authorized herein. Neither this license nor the right granted thereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934, as amended (47 U.S.C. § 151, et seq.). This license is subject in terms to the right of use or control conferred by Section 706 of the Communications Act of 1934, as amended (47 U.S.C. § 606).

Conditions continued on Page 2.

WAIVERS :

No waivers associated with this authorization.

**CONDITIONS:**

This authorization is subject to the condition that, in the event that systems using the same frequencies as granted herein are authorized in an adjacent foreign territory (Canada/United States), future coordination of any base station transmitters within 72 km (45 miles) of the United States/Canada border shall be required to eliminate any harmful interference to operations in the adjacent foreign territory and to ensure continuance of equal access to the frequencies by both countries.

This authorization is subject to the condition that the remaining balance of the winning bid amount will be paid in accordance with Part 1 of the Commission's rules, 47 C.F.R. Part 1.

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. Blankenship and Mr. Blakenship:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

*Sandra F. Keene*

Dear Ms. Husby:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

*Sandra F. Keene*

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. and Mrs. Long:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,  
  
Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Ms. McClure:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

*Sandra F. Keene*

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. Schmidt:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. and Mrs. Heavrin:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins

Re: **Public Notice - Kentucky Public Service Commission**  
**Docket No. 99-182**

Dear Mr. and Mrs. Bass:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins

Re: **Public Notice - Kentucky Public Service Commission**  
**Docket No. 99-182**

Dear Mr. Ray:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Ms. Hunphrey:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. and Mrs. Mullins:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

  
Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Ms. Gooselaw:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,  
  
Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. and Mrs. Gardner:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

Mark W. Dobbins  
Sandra F. Keene

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. Foreman:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,  
  
Mark W. Dobbins

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. and Mrs. Thomas:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Mr. Beach:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Ms. Wimsatt:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Dear Mr. and Mrs. Bennett:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,

**Re: Public Notice - Kentucky Public Service Commission  
Docket No. 99-182**

Dear Ms. Edrington:

WirelessCo., L.P., doing business in Kentucky as Sprint Spectrum, L.P., has applied to the Public Service Commission of Kentucky for a Certificate of Public Convenience and Necessity to construct and operate a new facility to provide Personal Communications telecommunications service ("PCS"). The facility will include a 75 foot wood laminate monopole, with attached antennas extending upward for a total maximum height of 85 feet, and an equipment shelter to be located at 3910 South Fifth Street, Louisville, Jefferson County, Kentucky. The equipment shelter will be located inside an existing building adjacent to the proposed monopole site and will not be visible from the outside. This notification letter is provided to you pursuant to Commission's Administrative Regulations which govern construction of wireless telecommunications facilities. The monopole described in this letter is the same facility referred to in a similar notice letter you received dated May 13, 1999 as required by the Jefferson County Planning Commission.

The Commission invites your comments regarding the proposed construction. You also have the right to intervene in this matter. Your initial communication to the Commission should be received by the Commission within twenty (20) days of the date of this letter as shown above.

Your comments and request for intervention should be addressed to: Executive Director, Public Service Commission, P.O. Box 615, Frankfort, Kentucky 40502. Please refer to **Docket No. 99-182** in your correspondence.

Sincerely,  
  
Mark W. Dobbins

Dear Ms. Sturgeon,

Your letter to Mr. Sweazy was forwarded to my office for consideration of your proposal.

We are unable to commit the property located at the corner of Wizard and Oleander Avenues for your proposed project due to the Master Plan we are currently working on.

I appreciate the time and effort you spent on the project and we thank you for the effort.

Sincerely,

CHURCHILL DOWNS INC.

REINFORCING DETAILS SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF ACI 315.

DRINKABLE  
NON-CHLORIDE CONTAINING

REINFORCING STEEL SHALL CONFORM TO ASTM A 615, GRADE 60, DEFORMED. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A 185. STEEL WIRE FABRIC UNLESS NOTED OTHERWISE. SPLICES SHALL BE CLASS B. ALL HOOKS SHALL BE STANDARD, UNO.

FOLLOWING MINIMUM CONCRETE COVER SHALL BE PROVIDED FOR REINFORCING UNLESS SHOWN OTHERWISE ON DRAWINGS:

CONCRETE CAST AGAINST EARTH.....3 IN.

CONCRETE EXPOSED TO EARTH OR WEATHER:  
THICKNESS LARGER .....2 IN.  
THICKNESS SMALLER & WWF .....1 1/2 IN.

CONCRETE NOT EXPOSED TO EARTH OR WEATHER OR NOT CAST AGAINST THE GROUND AND WALL .....3/4 IN.  
AND COLUMNS .....1 1/2 IN.

MINIMUM REINFORCEMENT SHALL BE PROVIDED AT ALL EXPOSED EDGES OF CONCRETE, UNO ACCORDANCE WITH ACI 301 SECTION 4.2.4.

INSTALLATION OF CONCRETE EXPANSION/WEDGE ANCHOR, SHALL BE PER MANUFACTURER'S WRITTEN RECOMMENDED PROCEDURE. THE ANCHOR BOLT, DOWEL OR WEDGE SHALL CONFORM TO MANUFACTURER'S RECOMMENDATION FOR EMBEDMENT DEPTH UNLESS SHOWN ON THE DRAWINGS. NO REBAR SHALL BE CUT WITHOUT PRIOR ENGINEERING APPROVAL WHEN DRILLING HOLES IN CONCRETE.

ADDITIONAL COMPOUNDS SHALL CONFORM TO ASTM C-309.

REINFORCING DETAILS SHALL CONFORM TO THE APPROPRIATE ASTM STANDARD AS REFERENCED ON DRAWINGS.

REINFORCING SHALL BE WELD OR TACKWELD REINFORCING STEEL.

ANCHORS, DOWELS, ANCHOR BOLTS, EMBEDDED STEEL, ELECTRICAL CONDUITS, PIPE SLEEVES, AND ALL OTHER EMBEDDED ITEMS AND FORMED DETAILS SHALL BE IN PLACE AT THE START OF CONCRETE PLACEMENT.

IF ADDITIONAL CONSTRUCTION JOINTS ARE REQUIRED TO FACILITATE CONSTRUCTION, THEY SHALL BE ACCEPTABLE TO ENGINEER. PLACE REINFORCEMENT CONTINUOUSLY THROUGH JOINTS.

REINFORCEMENT SHALL BE COLD BENT WHENEVER BENDING IS REQUIRED.

CONCRETE SHALL BE PLACED IN A UNIFORM MANNER TO PREVENT THE FORMATION OF COLD JOINTS OR OTHER PLANES OF WEAKNESS. VIBRATE THE CONCRETE TO FULLY EMBED REINFORCING. USE VIBRATORS TO TRANSPORT CONCRETE THROUGH CHUTES OR FORMWORK.

DO NOT PLACE CONCRETE IN WATER, ICE, OR ON FROZEN GROUND.

DO NOT ALLOW CONCRETE SUBBASE TO FREEZE DURING CONCRETE CURING AND SETTING OR FOR A MINIMUM OF 14 DAYS AFTER PLACEMENT.

PROTECT FRESH CONCRETE FROM WEATHER. IN COLD-WEATHER AND HOT-WEATHER CONCRETE PLACEMENT, CONFORM TO APPLICABLE CODES AND RECOMMENDATIONS. IN EITHER CASE, MATERIALS CONTAINING CHLORIDE, SULFATE, OR SALTS, ETC. SHALL NOT BE USED. PROTECT FRESH CONCRETE FROM WEATHER FOR 7 DAYS MINIMUM.

NOTES

DESIGN AND CONSTRUCTION OF ALL CONCRETE ELEMENTS SHALL CONFORM TO THE LATEST EDITIONS OF THE FOLLOWING APPLICABLE CODES: ACI 301 "SPECIFICATIONS FOR STRUCTURAL CONCRETE FOR BUILDINGS"; ACI 318, "SPECIFICATION CODE REQUIREMENTS FOR REINFORCED CONCRETE";

DESIGN SHALL BE APPROVED BY OWNER'S REPRESENTATIVE PRIOR TO CASTING CONCRETE.

CONCRETE SHALL BE NORMAL WEIGHT, 6% AIR ENTRAINED ( $\pm 1.5\%$ ) WITH A MINIMUM 4" SLUMP, AND HAVE A MINIMUM 28-DAY COMPRESSIVE STRENGTH OF 3000 PSI UNLESS OTHERWISE NOTED.

MAXIMUM AGGREGATE SIZE SHALL BE 1".

FOLLOWING MATERIALS SHALL BE USED:

CEMENT:	ASTM C 150, TYPE I
AGGREGATE:	ASTM A 185
WATER:	ASTM C 33
ADDMIXTURES:	DRINKABLE NON-CHLORIDE CONTAINING

REINFORCING DETAILS SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF ACI 318.

REINFORCING STEEL SHALL CONFORM TO ASTM A 615, GRADE 60; DEFORMED BARS UNLESS NOTED OTHERWISE. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A 185 UNLESS NOTED OTHERWISE. SPLICES SHALL BE CLASS B. UPLIFT HOOKS SHALL BE STANDARD, UNO.

FOLLOWING MINIMUM CONCRETE COVER SHALL BE PROVIDED FOR REINFORCING UNLESS SHOWN OTHERWISE ON DRAWINGS:

CONCRETE CAST AGAINST EARTH.....3 IN.

CONCRETE EXPOSED TO EARTH OR WEATHER:

FOR LARGER .....2 IN.  
FOR SMALLER & WWF .....1 1/2 IN.

CONCRETE NOT EXPOSED TO EARTH OR WEATHER OR NOT CAST AGAINST THE GROUND:

FOR SLAB AND WALL .....3/4 IN.  
FOR BEAMS AND COLUMNS .....1 1/2 IN.

MINIMUM CHAIR 3/4" SHALL BE PROVIDED AT ALL EXPOSED EDGES OF CONCRETE, UNLESS OTHERWISE IN ACCORDANCE WITH ACI 301 SECTION 4.2.4.

INSTALLATION OF CONCRETE EXPANSION/WEDGE ANCHOR, SHALL BE PERFORMED IN ACCORDANCE WITH THE MANUFACTURER'S WRITTEN RECOMMENDED PROCEDURE. THE ANCHOR BOLT, DOWEL OR WEDGE SHALL CONFORM TO MANUFACTURER'S RECOMMENDATION FOR EMBEDMENT DEPTH UNLESS SHOWN ON THE DRAWINGS. NO REBAR SHALL BE CUT WITHOUT PRIOR ENGINEERING APPROVAL WHEN DRILLING HOLES IN CONCRETE.

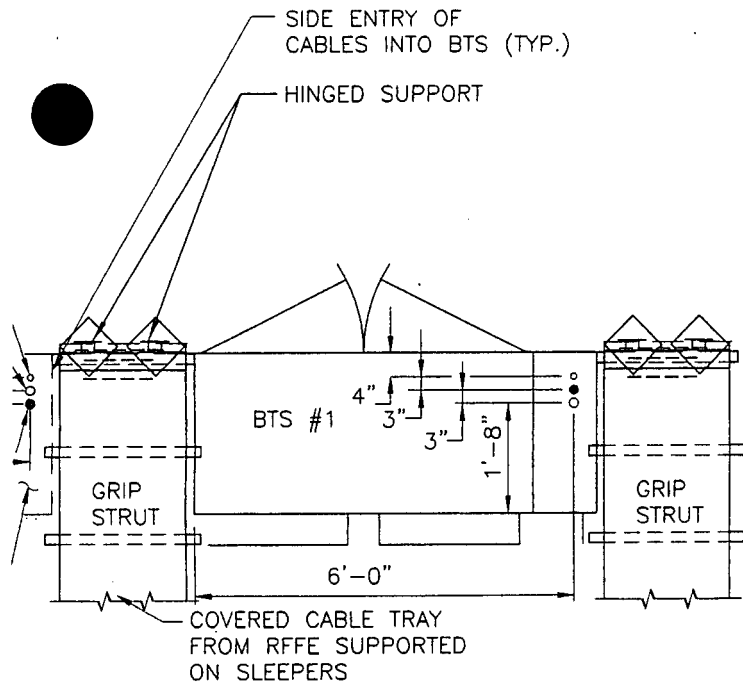

ADDMIXTURES SHALL CONFORM TO ASTM C-309.

ADDMIXTURES SHALL CONFORM TO THE APPROPRIATE ASTM STANDARD AS REFERENCED IN THE SPECIFICATIONS -301.

WELDED OR TACKWELDED REINFORCING STEEL.

ANCHORS, WELDS, ANCHOR BOLTS, EMBEDDED STEEL, ELECTRICAL CONDUITS, PIPE SLEEVES, AND ALL OTHER EMBEDDED ITEMS AND FORMED DETAILS SHALL BE IN PLACE AT THE START OF CONCRETE PLACEMENT.

RE... BE USED AS A GUIDELINE ONLY. FOUNDATION... WITH ACTUAL SITE CONDITIONS AS TO IMPACT... FINISH GRADES AND GEOTEXTILE REQUIREMENTS.

CHURCHILL DOWNS DRESDEN AVE.	SHEET NO.	CODE	<b>H. E. RUDY</b> CONSULTING ENGINEERS STONESTREET & FORD LAND SURVEYORS 1000 N. MAIN STREET, MINNEAPOLIS, MN 55422 PHONE: (609) 834-4310 FAX: (609) 833-2000	
	G1	AREA		
	OF 7			

**NOTES:**

- 1. GROUNDING ELECTRODES SHALL BE CONNECTED IN A RING USING #2 AWG BARE TINNED COPPER WIRE. THE TOP OF THE GROUND RODS AND THE RING CONDUCTOR SHALL BE 2 FEET BELOW FINISHED GRADE. GROUNDING ELECTRODES SHALL BE DRIVEN ON 10'-0" CENTERS.
- 2. BONDING OF THE GROUNDED CONDUCTOR (NEUTRAL) AND THE GROUNDING CONDUCTOR SHALL BE AT THE SERVICE DISCONNECTING MEANS. BONDING JUMPER SHALL BE INSTALLED PER N.E.C. ARTICLE 250-26.
- 3. GROUND RING CONNECTION CONDUCTORS SHALL BE OF EQUAL LENGTH, MATERIAL, AND BONDING TECHNIQUE.
- 4. FENCE GATE BONDING JUMPER SHALL BE #4/0 WELDING CABLE THAT HAS BEEN CRIMPED ON EACH END WITH A CAP FOR THE "CADWELD" PROCESS.
- 5. THE GROUND RING SHALL BE WITHIN 12 TO 36 INCHES OF THE PAD.
- 6. BOND CIGBE TO EXTERNAL GROUND RING WITH 2 RUNS OF #2 BARE TINNED CONDUCTOR IN PVC CONNECT BAR END WITH 2-HOLE LUG, AND "CADWELD" THE OTHER END TO THE EXTERNAL GROUND RING.
- 7. AREAS OF HIGH SOIL RESISTIVITY MAY REQUIRE THE USE OF LYNCOLE XIT RODS. CONTRACTOR SHALL ADVISE CONSTRUCTION MANAGER IF ROCK IS ENCOUNTERED NEAR THE SURFACE OR IF SOIL IS PREDOMINANTLY DRY SAND OR GRAVEL. CONSTRUCTION MANAGER WILL CONSULT WITH LYNCOLE ABOUT ADDITIONAL GROUNDING REQUIREMENTS.
- 8. IF SITE REQUIRES EXTERNAL ALARMING, AND THE DISTANCE FROM THE TELCO BOX TO THE BTS IS LONGER THAN 10', THE CONDUIT FROM THE TELCO BOX SHALL BE CONDUCTIVE AND SHALL BE BONDED TO THE GROUND RING AT EACH END.

**GENERAL NOTES:**

- A. BELOW GROUND CONDUCTORS SHALL BE #2 AWG, TINNED, BARE, SOLID COPPER UNLESS INDICATED OTHERWISE.
- B. ABOVE GROUND CONDUCTORS SHALL BE #2 AWG, BARE, SOLID COPPER UNLESS INDICATED OTHERWISE. LEADS FOR CONNECTING TO GALVANIZED STEEL GUYS AND TOWER SURFACES SHALL BE #2 AWG, TINNED, AND LEADS TO FENCING AND OTHER NEARBY METAL OBJECTS SHALL BE #2 AWG.
- C. THE MINIMUM BEND RADIUS SHALL BE 8 INCHES FOR WIRE #6 AND SMALLER, 12 INCHES FOR WIRE LARGER THAN #6.
- D. A CONCRETE INSPECTION HANDHOLE SHALL BE INSTALLED AT THE CONNECTION POINT OF THE #2 CONDUCTOR FROM THE AC PANEL OR PPC TO THE GROUND RING.
- E. GROUNDING RING TO EARTH RESISTANCE SHALL NOT EXCEED 5 OHMS. TESTING SHALL BE COMPLETED PRIOR TO AC POWER TURN-ON. CONTRACTOR SHALL ADVISE CONSTRUCTION MANAGER IF RESISTANCE EXCEEDS 5 OHMS.
- F. EXOTHERMIC WELDS ARE THE PREFERRED CONNECTION AND SHALL BE USED FOR ALL UNDERGROUND CONNECTIONS. ABOVE GRADE CONNECTIONS MAY USE MECHANICAL CONNECTORS IF APPROVED BY THE CONSTRUCTION MANAGER.
- G. CONTRACTOR SHALL GROUND FENCE BY BONDING EACH HORIZONTAL POLE/BRACE TO EACH OTHER AND TO EACH VERTICAL POLE THAT IS BONDED TO THE EXTERIOR GROUND RING.

**COAX BONDING**

TOP OF TOWER: BOND GROUND JUMPER TO COAX GROUND BAR CIGBE AT TOP OF TOWER. BOND CIGBE TO TOWER STEEL USING #2 BARE TINNED COPPER CONDUCTOR. CONNECT BAR END BY 2-HOLE LUG. CONNECT STEEL END USING A 2-HOLE LUG AND DRAGON TOOTH WASHER, OR BY

TIN-PLATED COPPER CONDUCTOR  
(TYP 2 PLCS)
