RE: Docket Number 2004-00168

June 7, 2004

Dear Sir or Madam,

As the proposed wireless communication center will be located across the highway (less than 500 feet) from our home we have several concerns about this facility. The first and foremost being that we chose to build our home and raise our family in a country/rural setting. The addition of this tower across from our home takes away from that purpose. The tower will most definitely affect our quality of life. At night the lights blinking from the tower will be a nuisance and could keep us awake. As the tower will practically be in our front yard, it definitely has a negative affect on the landscape. Maintainence of this facility will also be an imposition on our quality of life.

Another concern is that the addition of this tower across the road from our home will affect the resale value of our property. No one would purchase our home, for the value we feel that it now has, if the proposed communication facility is installed. The main draw for our home would be the country setting with the adjacent pond. A 280-foot tall tower will definitely detract. Our personal safety is a concern. In the past we have had several instances of high winds and macro bursts. Our concern is that the safety of our family will be put in jeopardy with the tower being located this closely to our home.

In conclusion we ask you to please consider moving the location of this tower. We feel that the present location is entirely too close to our home.

Sincerely,

Darryl & Patricia Pickett
