RE: PSC Case No. 2004-00413  
Application to Construct Wireless Communications Facility  
Location: Rough and Tough Rd., Prestonsburg, KY 41653  
Applicant: New Cingular Wireless PCS, LLC  
Site Name: Brainard

Dear John:

I have received your letter of July 29, 2005 requesting information. Please review the details below which answer each one of your questions.

**You requested a detailed inventory of the equipment Cingular Wireless proposes to place on the Rough and Tough tower.** Cingular Wireless proposes the placement of nine (9) eight foot panel antennas (three per face), and the accompanying nine (9) runs of Andrew AVA7-50 coaxial cable (one per antenna), each having a length of 325 feet and a width of 1 5/8".

**You requested a detailed calculation of the \$104,000 yearly rate proposed by Appalachian Wireless.** This calculation is based upon the rates set forth in the proposed collocation agreement provided by Holly Wallace of your office as an attachment to her email of May 31, 2005. As you know, that agreement specifically provided as follows:

**6. Rent.**

(a) Lessee shall pay to Lessor monthly fees as follows:

(i) For as long as Lessee does not increase the size of its Premises or alter the wind load or structural impact of its equipment upon

the Tower, rental shall be in the amount of seven thousand five hundred and no/100 dollars (\$7,500.00) per year ("Collocation Fee"), payable in **monthly installments of six hundred twenty-five and no/100 dollars (\$625.00)**, in advance of the Commencement Date and of the first day of each month thereafter, subject to increases set forth in section 6(b) below. The Collocation Fee for any partial months shall be prorated. Lessor shall have the duty to reimburse pre-paid Collocation Fees not otherwise earned, which duty shall survive termination of this Agreement. At any time during the Term of this Agreement, Lessee may choose to pay one year's Collocation Fee in advance, in which case such year's Collocation Fee shall be reduced by five percent (5%).

(ii) Lessee shall pay to Lessor two hundred fifty dollars **(\$250.00) per month for each antenna** installed or maintained on the Tower or Property.

(iii) For each coaxial cable installed or maintained on the Tower or Property, Lessee shall pay the following monthly fees: 1) one dollar and fifty cents (\$1.50) per foot of cable if the cable is less than one inch (1") in diameter; 2) two dollars and no/100 **(\$2.00) per foot of cable if the cable is one inch (1") to two inches (2") in diameter**; and 3) for cables in excess of two inches (2") in diameter, the fee per foot of cable shall be negotiable.

(iv) For each satellite dish installed or maintained on the Tower or Property, Lessee shall pay the following monthly fees: 1) five hundred dollars (\$500.00) for satellite dishes six feet (6') or less in diameter; and 2) for satellite dishes in excess of six feet (6') in diameter, the fee shall be negotiable.

(b) All of the fees in this section are collectively referred to as "Rent." The Rent shall be increased by ten percent (10%) at the commencement of each Renewal Term.

(Emphasis added). Based upon the provision above, the fees for the proposed equipment are calculated as follows:

( i ) Collocation fee = **\$625.00/month**  
( ii ) Antenna Fee = \$250.00 per antenna x 9 antennas = **\$2,250.00/month**  
( iii ) Cable Fee = \$2.00 per foot x 9 cables x 325 feet = **\$5,850.00/month**  
( iv ) Satellite Dish Fee = \$500.00 per dish x 0 dishes = \$0.00  
Total Monthly Rent = \$8,725.00  
**Total Annual Rent = \$104,700.00**

**You requested a description of the function of each item of equipment proposed for placement on the Rough and Tough tower by Cingular Wireless.** Antennas function to receive and/or transmit wireless signals. Coaxial cable connects the antennas to radio equipment and/or a power source.

Please do not hesitate to contact us if you have any comments or questions concerning this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Pike", written over the word "Sincerely,".

David A. Pike
