(current rate) and purchases at new rate.

6. Purchased water adjustment factor 0.41 per 1,000 gallons.

The purchased water adjustment factor is obtained by dividing the increased cost of water by the total gallons sold.

Note: The purchased water adjustment factor is added to each thousand gallons sold. If the minimum usage is 2,000 gallons then the purchased water adjustment factor would be added to the minimum bill twice. Revised tariff sheets must be attached showing the rate to be charged by the utility and the effective date of the increased rates.

7. Proposed effective date January 10, 2005.

Mr. Lloyd Merrell
City Administrative Officer
City of Madisonville, Kentucky
P.O. Box 705
Madisonville, KY 42431

Dear Lloyd:

We have prepared the accompanying Cost Review Formulas for revising calendar year wholesale rate charges as per Treated Water Sale and Purchase Agreements with the North Hopkins Water District.

We prepared the Cost Review Formulas using June 30, 2004 audited financial statements and wholesale user consumption records as provided by the City of Madisonville. We did not audit the wholesale user consumption records during our June 30, 2004 audit due to the fact that such records were outside the scope of the audit.

The wholesale water rate to be charged to the North Hopkins Water District is \$2.19 per each one thousand gallons of treated water. It is my understanding that the new rate will be charged from January 1, 2005 to December 31, 2005.

We appreciate the opportunity to be of service to the City of Madisonville. Please call if you have any questions regarding these computations.

Very truly yours,

Charles A. Kington, CPA
