Kentucky Public Service Commission, PUBLIC SERVICE COMMISSION

I am a 30 year resident of western Hardin County. Myself and my neighbors in the Lett River Rd. area are totally opposed to your suggested route of the monstrous power line. We can see by clearly viewing your map what you are up to. Your idea is to avoid the business and heavily populated areas and to choose the countryside route.

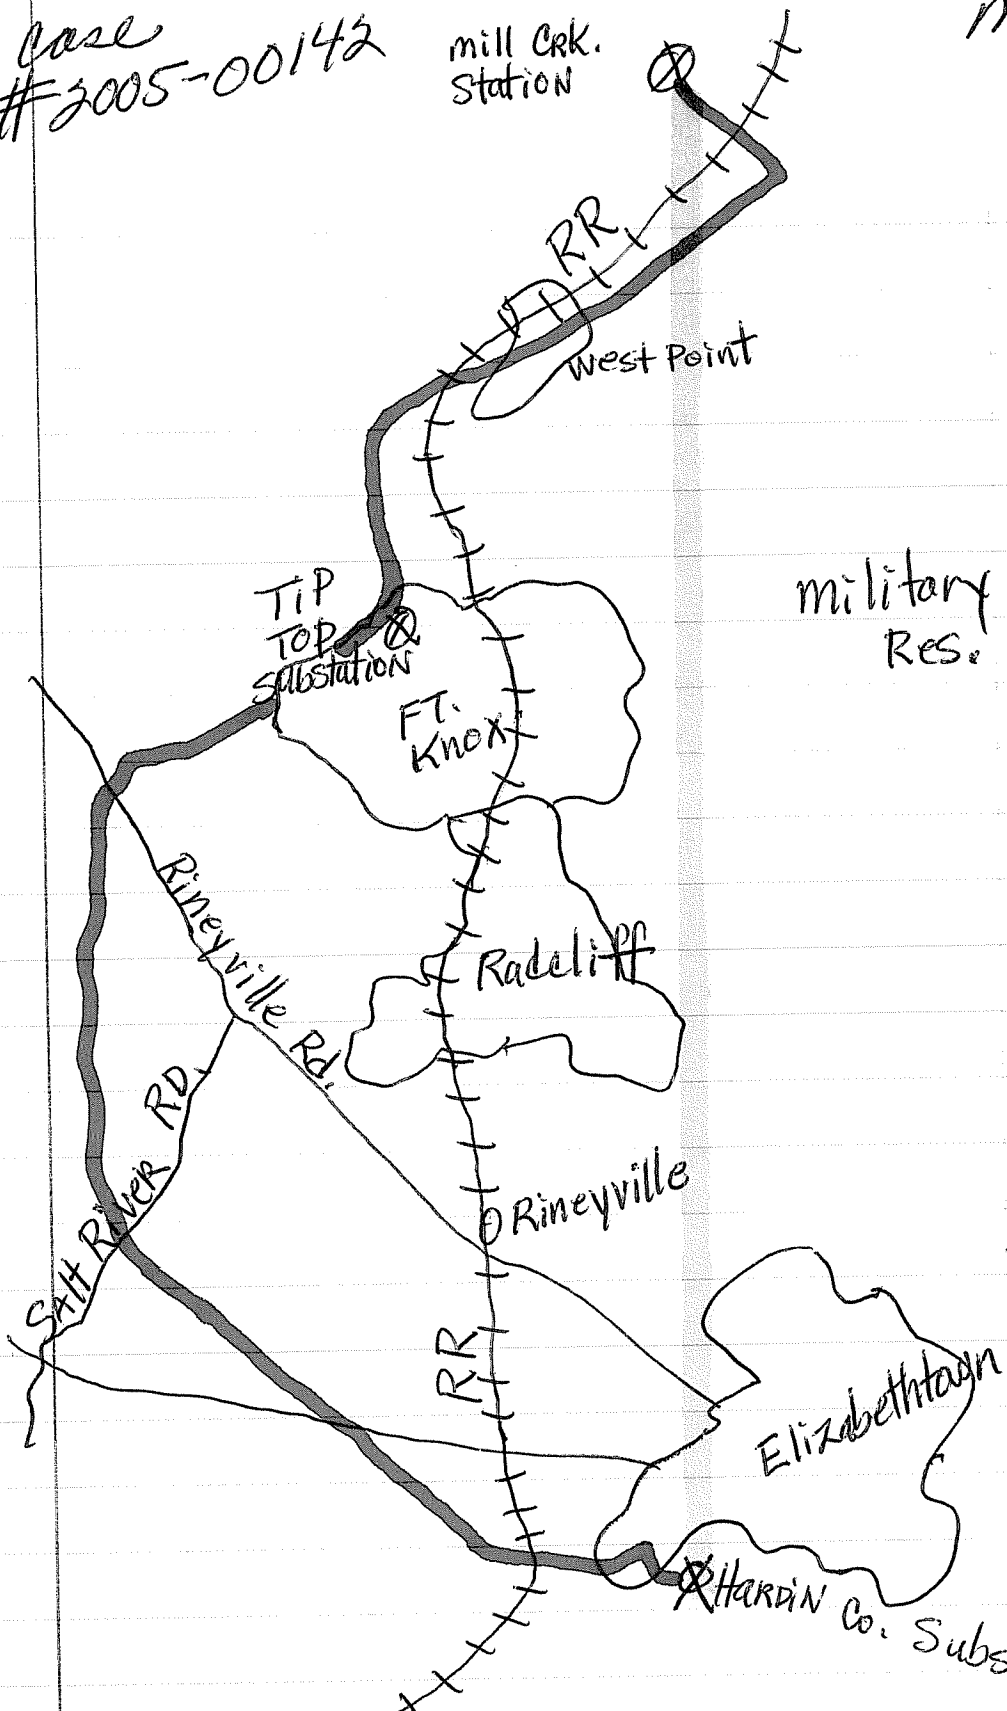

We rural residents love our rural scenic areas and want to keep them just that way, rural and scenic. If you must have this powerline we suggest you run it through those very areas that will benefit from it most, the business and heavily populated areas.

I've enclosed my own map as our suggestion to this unwanted power line. The Trimble Co. Unit 2 has not even been approved. We rural residents are fed-up with large utilities being run
