Matt, this is not exactly a complaint, but I was not sure what to do with it.

Subject: lg&e transmission line proposal

Dear Commission,

I have attached(bottom) info. on the new ACCC transmission cable. ACCC cables are the future of power lines in Ky. This month's (Sept. 05) Ky. Living magazine spotlights acc cable. They double power capacity and eradicate the need for new line construction. General Cable of Highland Heights Ky. is one provider.

I would strongly urge the commission to familiarize them selves with this new technology before permitting LG&E to proceed with three new lines in Central Ky.

LG&E might be able to use a combination of new lines and ACCC cable or replace all existing lines with acc cable without new lines construction. Either option would lessen environmental impact and increase efficiency.

Respectfully,
Aaron Leibson
