To Whom It May Concern:

I am writing this in regards to the proposed Kentucky Utilities transmission line coming through Anderson County. My husband and I own the property at 1878 Graefenburg Rd which would be effected by the line. Based on the maps KU provided at the preliminary meeting in Lawrenceburg the line would be going right through our backyard.

We bought the property about a year ago and built a home to raise our family. Had we known about KU's plans we would not have bought this land. Right now we can look out our back door and see beautiful trees line the back of our property. If there is a transmission line going through there, our trees will have to be cut down. We want to keep our trees and the wildlife that lives there.

We have worked very hard to buy our land and build a nice house for our family. Why should we have to give up a part of our land for a utility company that is not even our electric provider? We have a brand new mortgage. A transmission line will decrease our property value, causing us to owe more than what our property is worth. Is that fair to us? Why should KU be able to put this strain on us? We chose this land to build our home because we are 1700 feet off the road where we do not have to worry about close neighbors or anyone else bothering us and also for our child to play safely. We paid to be secluded, we do not want a line, poles or heavy equipment on our property.

Please let us keep our property as our own. Please do not let Kentucky Utilities go forward with their plan to take part of our property.

Sincerely,

Leigh Ann Disponett
