Dear Public Service Commission:

I am writing in regards to the Proposed East Kentucky Power Cooperative Wilson-Aberdeen-Morgantown Junction Transmission Project. I am a concerned citizen whose land will be crossed by the new high tension power line that East Kentucky Power has proposed to build to serve Warren RECC.

I strongly feel this project is unnecessary for several reasons. For starters, Warren RECC is currently receiving power from TVA. Thus, it already has a power source and is not in need of another one. Furthermore, this project will negatively affect countless families, like my own, for their land and homes will be altered and likely depreciated in value. In addition, the line is expected to pass over three historical sites, which would interfere with the preservation of these lands.

I sincerely hope you will take into consideration the 700 families, homes, and farms that will be affected by your decision. We deserve to be heard and have our voices matter.

Sincerely,

Donald B. and Phyllis Pennycuff
