COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF THE GRANT)	
COUNTY SANITARY SEWER DISTRICT)	CASE NO.
FOR AUTHORITY TO ADJUST RATES)	2005-00314

O R D E R

On July 25, 2005, Grant County Sanitary Sewer District ("Grant County") submitted its application for Commission approval of its proposed sewer rates. On December 27, 2005, Grant County's application was considered filed by the Commission based upon Grant County's filing of supplemental information. Commission Staff, having performed a limited financial review of Grant County's operations, has prepared the attached Staff Report containing Staff's findings and recommendations regarding the proposed rates. All parties should review the report carefully and provide any written comments or requests for a hearing or informal conference no later than 10 days from the date of this Order.

IT IS THEREFORE ORDERED that all parties shall have no more than 10 days from the date of this Order to provide written comments regarding the attached Staff Report or requests for hearing or informal conference. If no request for a hearing or informal conference is received, this case will be submitted to the Commission for a decision.

Done at Frankfort, Kentucky, this 23rd day of March, 2006.

ATTEST:

Executive Director

By the Commission

STAFF REPORT

GRANT COUNTY SANITARY SEWER DISTRICT

CASE NO. 2005-00314

On July 25, 2005, Grant County Sanitary Sewer District ("Grant County") submitted its application for Commission approval of its proposed sewer rates. Grant County's application was deficient in several respects. On December 27, 2005, Grant County's application was considered filed by the Commission based upon Grant County's filing of supplemental information. Commission Staff ("Staff") performed a limited financial review of Lewis Sanitation's test year operations for the calendar year ending May 31, 2005. The scope of Staff's review was limited to obtaining information as to whether the test period operating revenues and expenses were representative of normal operations. Insignificant or immaterial discrepancies were not pursued and are not addressed herein.

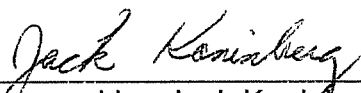

The application submitted on July 25, 2005 included an adjusted pro forma operating income statement, as shown in Attachment B to this report, wherein adjustments were made to test year operating revenues and expenses that were known and measurable and deemed to be reasonable. The supplemental application filed on December 27, 2005 included an adjusted income statement (also shown in Attachment B) with minor variations to the income statement previously submitted on July 25. The rates proposed by Grant County were based on the pro forma income statement shown in the application. The application also included the calculation of Grant County's revenue requirement using a 1.2 Debt Service Coverage, which is frequently used by the Commission to determine revenue requirements for small utilities. Grant County is

proposing to increase its annual revenue by \$178,941, an increase of 45.7% over test period revenue from rates of \$391,879.

Grant County provided adequate documentation to support its pro forma revenues and expenses. Therefore, Commission Staff recommends acceptance of Grant County's proposed pro forma revenues and expenses with one minor adjustment, as shown in Attachment B. Specifically, Grant County calculated its 1.2x debt service of \$150,106 by using an 18-year average, whereas the Commission normally uses a pro forma average of the next three years, which results in debt service coverage of \$150,190. In addition, Staff's review indicated that Grant County could have justified increased revenues of \$194,335. However, Grant County's proposed revenue increase of \$178,941 will produce a positive cash flow, and will allow it to meet its operating expenses and repay its long-term debt. Therefore, Staff recommends acceptance of the proposed increase.

Eddie Beavers is responsible for all revenue adjustments and the calculation of the proposed rates, as discussed in Attachments C and D. Jack Kaninberg is responsible for the determination of the revenue requirement. Based on the information included herein, Staff is of the opinion that the rates as shown in Attachment A of this report are reasonable and should be approved by this Commission.

Normalized Revenues						\$401,866
Increase				\$178,941		\$194,335

Explanatory Notes:

*Grant County's Application at Exhibit 5-S calculated debt service coverage at \$150,106 using an average of 18 years remaining debt service, or \$125,088 times 1.2; Staff used the 2006-2008 average of \$125,158 x 1.2, or \$150,190

**Grant County's Application and Supplemental Application included the proposed rate increase in pro forma revenues, whereas Staff's adjusted pro forma does not.

ATTACHMENT C
STAFF REPORT CASE NO. 2005-00314

Rates: In response to Staff's Second Information Requests Grant County states that the rates were established by a trial and error method.

Based on the Billing Analysis and other information provided in the filings made by Grant County, Staff developed proposed rates in this report following the guidelines set out in the AWWA Manual M1.

Staff's review established the total revenue required for Grant County is \$596,117, \$19,464 is obtained through other operating revenue and \$311 is obtained through interest income. Staff developed rates that will collect the remaining \$576,426 from the company's retail and commercial customers. The utility's expenses were analyzed and allocated according to three different classifications: Commodity, Demand, and Customer.

Commodity costs are those directly associated with the cost of sewage treatment. Demand costs are those associated with providing the facilities to meet the peak demands placed on the system. Customer costs are those incurred to serve customers regardless to the varying usage.

The Allocation of Costs sheet allocates the remaining portion of the Revenue Requirement from Rates to the customer in the functional cost components of Commodity, Demand and Customer. The allocation process results in \$61,349 in commodity costs, \$465,349 in demand costs and \$49,728 in customer costs.

Calculation of Proposed Rates:

Total commodity costs are allocated across the rate steps in accordance with usage percentages. Total demand costs are allocated across the rate steps in

accordance with usage that has been adjusted to reflect the higher peak demands that are caused in the lower rate steps. Total customer costs are all collected in the first rate step, or minimum bill, since those costs do not differ with varying usage.

The total for the first rate step is \$309,269 which is divided by the number of bills issued on an annual bases which calculates to a minimum bill of \$21.16 for the first ,000 gallons. The totals for the remaining rate steps are each divided by the actual water usage for each rate step to calculate the remainder of the rates.
