Case Number 2005 00 341

Dear Sir:

I am residing at the age home of
80 years young.

My son Powers tells your org helps
I just cannot figure out I will have any
money left for food and medicine, I am
just holding on now. This will mean I will
go hungry, no med. to take, I take heart + blood
pressure med.

I just drew a little over the amount to
get food stamps. I now go please take
dollar stores and to save hats where I can get
some food cheap. I buy what clothes I wear
at good sales and Thrifty store. My one
is around, and if our Power tells you any
higher What am I to do!

I do live alone. I only have one child
my son ~~Power~~ to 2 years young and who had
a liver transplant and a few big part of his
rest. He is not able to take care of him self
where does this leave me to pay water bills
I had to have a phone, because my heart
gave out of rhythm at times I have to go to
the emergency room at times garbage bills
Plus what it takes for all other bills
Home repairs please what it takes of all other
bills it takes to live on,

So please take a good look at this
case. And do something good for us
Seniors Citizens it would also help many other
Seniors Citizens.

Thank in advance
'Always'
Mona E Ford
