PUBLIC SERVICE
COMMISSION

December 5, 2005

Estate of Mildred M. Dalton
C/O Billy Dalton
949 Highway 196
Nancy, Kentucky 42544

***Re: Case No. 2005-00416 before the Public Service Commission of the
Commonwealth of Kentucky***

Dear Mr. Dalton:

The purpose of this letter is to respond to your letter dated October 24, 2005, addressed to the Public Service Commission of the Commonwealth of Kentucky (the "Commission") regarding your concerns with respect to the proposed construction of a cell tower to be located at 6644 W. Highway 80, Nancy, Kentucky, 42544.

Pursuant to your letter, I understand your concerns to be whether the proposed construction of the cell tower would decrease the value of your property located a 949 Highway 196, Nancy, Kentucky.

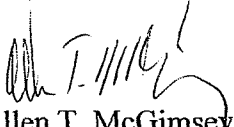

In Kentucky PSC Case No. 2001-083, we addressed the issue of decreased property value due to the construction of a cellular tower. We introduced expert testimony in that case which opined that the proposed tower would not negatively affect the value of the property.

I hope that this letter satisfactorily answers your question.

Thank you.

Very truly yours,

BLUEGRASS CELLULAR

December 5, 2005

Mr. and Mrs. Duane Shourds
113 Gover Lane
Nancy, Kentucky 42544

***Re: Case No. 2005-00416 before the Public Service Commission of the
Commonwealth of Kentucky***

Dear Mr. and Mrs. Shourds:

The purpose of this letter is to respond to your letter dated November 1, 2005, addressed to the Public Service Commission of the Commonwealth of Kentucky (the "Commission") regarding your concerns with respect to the proposed construction of a cell tower to be located at 6644 West Highway 80, Nancy, Kentucky, 42544.

Pursuant to your letter, I understand your concerns to be: (1) safety issues attributable to the proximity of the tower to your home; and (2) lightning strikes.

(1)

Bluegrass Wireless proposes to construct a "self-supporting" tower which will not require guyed wires that are anchored to the ground. The plans for this tower are designed by engineers, licensed in the Commonwealth of Kentucky, to meet and/or exceed Kentucky's design standards which require the tower to withstand the highest wind speed ever recorded in Kentucky.

(2)

If, due to its height, the tower is struck by lightning, the energy will be safely funneled to the ground through the tower's grounding system.

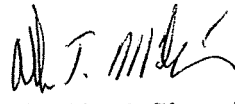

Mr. and Mrs. Duane Shourds
