PUBLIC SERVICE
COMMISSION

Dear Executive Director:

I am writing in
response to your notice
regarding Case number
2005-06445 which we
received November 9, 2005.

We are very much
opposed to the construction
of a new cell facility so
close to our property where
we have horses and
other livestock. We also
have four grandchildren
who play near this site.
We are opposed to
this construction for the

following reasons:

1. Some scientific data indicate that these facilities radiate radio frequency and microwave radiation which may initiate the development of serious adverse health effects such as learning disabilities and leukemia.
2. These towers also seem to affect cattle and other livestock - either sounds or radiation.
3. Property value decreases wherever these towers are located.

Sincerely,
John T. Cooper
