

Rusch Exhibit II

This exhibit contains the “.pdf” graphical printout that formed the basis for the report included as Rusch Exhibit I. There are two items included in Exhibit II:

- **“Index to Exhibit II.pdf”** – An index to the files contained in the companion subdirectory described below. The Index provides a cross reference to the file name combined with a description of the case.
- **CR Load Flow Cases** – A subdirectory containing the graphical printout from the GE PSLF load flow runs. Each case is identified as described in the Index listed above.
