PUBLIC SERVICE
COMMISSION

January 10, 2006

Mr. Mark D. Goss, Chairman
Public Service Commission
Sower Boulevard
Frankfort, KY 40601

Dear Mr. Goss:

I am writing regarding the Western Fleming Water District's board vacancy. I have served on the board for 14 years. In the years that I have served we have made many changes. We have erected two elevated water towers, renovated the water plant extensively, replaced two water filters with three new filters, added two new high service pumps and added an emergency generator. We have added new water lines in our service area to make water hook-up available in 95% of Fleming County. I do not hesitate to say that Mr. Jerry Neal has played a vital part in all of these accomplishments. Mr. Neal has shown excellent leadership skills and pursued numerous opportunities for Western Fleming Water. He has been the link between Western Fleming Water and the Greater Fleming County Regional Water Commission which assures water for our district in time of need.

I would like to request that Mr. Neal be reappointed to the Western Fleming Water District. He is currently working on funding for the district and has secured the #1 position when the funds are released. Now would not be the time to replace him.

Sincerely,

James Huston
