Mr Mark Goss, Chair.

I am writing you in regard to my appointment or lack of re-appointment to the Western Fleming Water Board. Judge Foxworthy refused to re-appoint me, even with all six magistrates wanting me re-appointed. We have to much partnership in Ky + across the nation.

The PSC knows all about what we do. You see our audits + set our rates. As you know by checking our records, we are a well operated entity for the people of Fleming Co.

When I went on the board one 12 years ago we barley had enough money to pay our bills, now we have over 900 thousand dollars in the bank. Of course we have some debt to RD + KFA.

We could possibly have the cheapest water in the state \$11.60 for the first 2000 gallons. Our water quality is real good, and we have very few defency in our labs several inspections

We have built two new elevated water towers in last five years, plus a major up-grade at the water plant.

Also we became a member of the Greater Fleming Co. Regional Water in order to have an abundant water supply for Fleming Co.

I'm retired and have a lot of time, and I enjoy being a benefit to my county.

I ask that you please reappoint to the West Fleming Co. Water board. If you have any questions please call me

Thank You

Jerry Neal
